True about 30 years ago, however, this has been weakened by the war on
drugs, the war on terror, the war on...

From http://www.ssa.gov

"If a business or other enterprise asks you for your SSN, you can refuse
to give it. However, that may mean doing without the purchase or service
for which your number was requested."

The above is in reference to situations where you are NOT required by
law to provide a SSN.

You can also find a long list of of situations where you are REQUIRED by
law to provide your SSN.

Lets see what the FCC has to say about that, Albert. In the Report & Order following the last round of restructuring, the FCC said;

> "We are persuaded that because the amateur service is fundamentally a technical service, the emphasis on Morse code proficiency as a licensing requirement does not comport with the basis and purpose of the service. We note, moreover, that the design of modern communications systems, including personal communication services, satellite, fiber optic, and high definition television systems, are based on digital communication technologies. We also note that no communication system has been designed in many years that depends on hand-keyed telegraphy or the ability to receive messages in Morse code by ear. In contrast, modern communication systems are designed to be automated systems. Given the changes that have occurred in communications in the last fifty years, we believe that reducing the emphasis on telegraphy proficiency as a licensing requirement will allow the amateur service to, as it has in the past, attract technically inclined persons, particularly the youth of our country, and encourage them to learn and to prepare themselves in the areas where the United States needs expertise."

Clearly, Morse code proficiency as a licensing requirement is out of place in Amateur Radio today, Albert. As is your attempts to urge anyone who opposes code proficiency as a licensing requirement to "forget" about Amateur Radio. The radio world is moving forward. Either we move forward with it or we become irrelevant. If we choose the latter path, we will no longer be worthy of the massive frequencies and operating privileges we enjoy - no irrelevant radio service is.

I have a GP300 UHF 438-470mhz, 16 channel, 4 watt portable for $135.00 plus
shipping.
It comes with rapid charger,rubber duck, and aftermarket battery.(about 60%
capacity) From very little use.
I've had the radio more than 10yrs and have had no problems with it. If you
have something you'd like to trade for it, let me know.
Please email direct. remove nospam from the email address
I'm looking for the following:
Dual band mobile
Kenwood TH45AT

thnx

Actually, I like the "code quick" program, myself. I am in no way
affiliated with the company that markets it, but it's money well spent. I
don't recommend the computer program, as much as the tapes, but the
computer program does allow you to paste in ANY text, and have it sent in
morse code, (your email, etc) thus giving you fresh stuff to copy all the
time. The tape set works with you on a more personal level, and actually
uses about 5 different methods, at once, to get the code stuck in your
head. It ignores the dits and dahs, and teaches you the characters by the

sound of the entire character, likening it to a phrase, which sounds just like the character, when sent.

Here is an interesting, and true story. I took a total of 9 cbers, who were all dead set against the code, but finally decided it wasn't going away any time soon. All of them wanting to get on HF, and with a little prodding by the origional fellow who agreed to let me teach him well enough to pass the test in less than two weeks, guaranteed. They showed up for one hour a night for nine days. The nine day mark just happened to be the first available code test, after commencing our little project. All of them, seeing how easy, and fun it was to learn code, decided to take a whack at it at that code test. All of the nine, except 1, passed with perfect copy, and didn't even have to take the multiple guess test. Of the 9, one was totally blind, and took the test with earphones and a "blind typewriter" (not knowing the correct term for this device). The one fellow who failed, had only been attending the group for about 4 days, but just had the balls to give it a go, anyway. He later passed on his own.

I taught them using the code quick method, lacking all the tapes, and materials. I just did it live, using the guys HF rigs built in keyer, set to no break in.

Just to let you know how easy it is to learn code, ONCE YOU DECIDE TO DO IT... I'de be willing to bet you that I could teach a monkey to copy, in his head, 3 characters, in a days time. The hardest code test to pass will be the 5wpm... why? Because first you must get over all the reasons why you

1)don't have time to

2)are never going to use it

3)shouldn't be required to

4)can't learn it

AND JUST DO IT!

Once you see how easy it is, when motivated, you'll probably start using it because learning a new skill is fun to do. when you use it, your speed will increase without even trying. I really feel sorry for you guys who will never do it. All I can say is, upon passing my 20wpm test, and walking out the door to meet my buddies, with that piece of paper in my hand, well.... I haven't felt that good, no... GREAT, since christmas morning, when I was 3 years old, and got my first bicycle. And yes... I did conform to the rules, and learned to ride with training wheels... I didn't think I should just be able to ride it, without working on it first. And by the way... I'm no brain surgeon, and I went from no-code to extra in 4 months time. Since then, serving on a VE team, I've seen several foriegn exchange students sit down, and go from ZIP, to extra, in a matter of hours... including the old 20 wpm code test.

Anyone want help in the WNY area, I'll help you too. It really is much easier to pass the code test, than to learn all the extra info to pass the expanded written exam. Just respond here, and we'll see what we can come up with.

Actually, I like the "code quick" program, myself. I am in no way affiliated with the company that markets it, but it's money well spent. I don't recommend the computer program, as much as the tapes, but the

computer program does allow you to paste in ANY text, and have it sent in morse code, (your email, etc) thus giving you fresh stuff to copy all the time. The tape set works with you on a more personal level, and actually uses about 5 different methods, at once, to get the code stuck in your head. It ignores the dits and dahs, and teaches you the characters by the sound of the entire character, likening it to a phrase, which sounds just like the character, when sent.

Here is an interesting, and true story. I took a total of 9 cbers, who were all dead set against the code, but finally decided it wasn't going away any time soon. All of them wanting to get on HF, and with a little prodding by the origional fellow who agreed to let me teach him well enough to pass the test in less than two weeks, guaranteed. > become a super CB'er gab medium "legally" allowing more distance and
power.

And we still are capable of performing emergency communications regardless
of your downplaying a hobby that you participate in like a self-hating ham.
Many of us train regularly with ARES/RACES groups and are ready when called.

> 1) Back in the mid 50's we had to travel to an FCC office and pay a few

Some universities might still do that. As far as the FCC issue, thank god
they did that..... less government intervention in my life is better. Only
a liberal democrat would wish it go back to the old scheme of testing.

> 2) Back then ALL us hams read thoroughly the ARRL Amateur Radio
> Handbook, some of us built our first receiver (usually
> super-regenerative) others purchased our receiver but definitely we all

Guess what.... some of us still do today! Generalizing the whole hobby by
experiences with a selected group does nothing for the growth of the hobby.

> 3) In keeping with the Amateur Radio Mission Statement us "old timer

And you were living in a delusional world if you think you were/are that
self-important but training in message handling and communications is
important if that ever does happen. Personally speaking, I also monitor
quite a few frequencies as well.

Get with the times man, instead of dwelling on the past.

Uniden Bearcat BC248CLT Scanner 50 Channel Excellent Condition

There's a world of drama out there. And with the BC248CLT scanner, you can stay on top of the news as it happens. Tune into police, fire, weather, emergency, "ham", FRS, Military, Government, and more. 29 - 54MHz, 137 - 174MHz, 406 - 512MHz. The BC248CLT scanner brings together the finest engineering and styling plus all the quality that has made Uniden a legend among scanner enthusiast. The first scanner with integrated Alarm clock.
Features:
50 Channels You can program all of your favorite frequencies.
10 Bands Covers public service, ham, federal and military land mobile.
Review Feature Full frequency LCD display shows frequencies entered into each channel plus weather frequencies. Also includes an emergency weather alert feature.
Manual Channel Access Go directly to any channel without stepping through other channels
Channel Lockout This feature allows you to skip over channels you currently don't want to hear.
Clock/Alarm Displays time and features any button snooze

$95.00 + $10.00 shipping

I wasn't trying to guilt trip anyone, I was only trying to get others
to look at themselves instead of knee jerking and complaining about
the lack of people who seem to be interested in cw. I myself have not
taught anyone in the last 3 years but I am just a no code ham trying
to learn myself. Thinking about an old saying, if you wanna change
the world, start with the man in the mirror. Cheers, 73

Billy ke4pjr

No, Ken, the posters already have enough trouble understanding the
fundamentals of contract law and paths of appeal. I was simply trying to be
gracious to non-USA Usenet readers. But you knew that.

Ed

Yeah - sorry to drift the topic here - I won't say any more on this.
However, I will just add as a final remark that the same happened in
our area. A referendum was sent out to ask the voters if they wanted
to build a light rail corridor between two cities. It passed.
Then the government said - "we are not going to fund it" right
afterward, and NOW they want to do the vote AGAIN after putting out a
lot of propaganda on why it should not be done!

Moral: If you don't like democracy, bend their minds a bit and try
again!

End Of Thread!

> Clearly, Morse code proficiency as a licensing requirement is out of place
>in Amateur Radio today,

Iff you read afgain at the top I did not address that issue.

You had been going on about the technical frontiers and what is and is
not "with it" today - FOR YOU (unlike the many thousands of CW ops)

My remarks and your response are almost entirely unrelated.
You have difficulty understanding logic and plain English, aparently.

I merely suggested that if you don't like old fashioned things like HF
and CW that you stay on the internet where you will be happier.

It was about YOU not the FCC.

>Albert. As is your attempts to urge anyone who
>opposes code proficiency as a licensing requirement to "forget" about
>Amateur Radio.

Not anyone - YOU!

You obviously don't LIKE muych about amateur radio and are far more
comfortable grousing about it on Usenet. So fine! Have at it!

>The radio world is moving forward.

No shit!

>Either we move forward
>with it or we become irrelevant.

Again you are using totally faulty logic.
I am involved with digital communications using the latest
techniques.
And that is NOT via an old-fashioned cable or twisted pair
like Usenet has to rely on (grin!)

>If we choose the latter path, we will no
>longer be worthy of the massive frequencies and operating privileges we
>enjoy - no irrelevant radio service is.

Well you are entitled to your opinoin, no matter how confused you try
to get yourself! Enjoy the new frontier. I will enjoy BOTH the
traditional AND the new.

Attacking CW is absurd, and as was pointed out in another
thread, the nastiness always starts with the anti-CW mob.

I don't give that much of a rat's arse about whether the testing
gets stopped, because I don't think it will be the death nell of
amateur radio any more than hundreds of other change sthat have
aoccurred in the past 25 years by the FCC and by hams.

However, I DO think that what bodes ill for amateur radio is

the ATTITUDE and BEHAVIOR of aggressive, divisive people!

My comments were for you personally, and not about the
proposed changes for VEC testing etc.

Again, my suggestion for a guy who dislikes CW and HF is
this, Dwight:
You should probably stay with the internet and FORGET
amateur radio.

 It's far too "dull and old fashioned" for a trendy "modern" guy
like you!

Thanks for the honest response Billy, and I truly wish you success in
mastering the code. You will NEVER regret it, even if they no longer
require it at soime point.

It's one of the most pleasant and ralzxing modes you can
ever use!

Good grief, Albert. You can't even figure out which person you're talking to. I didn't say any of those things and you didn't say any of those things to me. That was a discussion you were having with Clint, not me.

I, on the other hand, addressed your opinion that those more interested in modern electronics and radio than CW (what you called "trendy modern guys") should "stay with the internet and forget amateur radio." And I did so by pointing out what the FCC said about the need to reduce the emphasis on telegraphy proficiency as a licensing requirement to "attract technically inclined persons, particularly the youth of our country, and encourage them to learn and to prepare themselves in the areas where the United States needs expertise." Clearly, even according to the FCC, the United States does not need expertise in CW today.

> Again you are using totally faulty
> logic.

I guess it would appear faulty to a person who can't follow along well enough to figure out which person he or she is talking to.

> Well you are entitled to your opinoin,
> no   (snip)

It's not just my opinion, Albert. It's also the FCC's opinion - you know, the federal agency that regulates Amateur Radio.

> Attacking CW is absurd, and as was
> pointed out in another thread, the
> nastiness always starts with the

> anti-CW mob.

I've said nothing nasty to you, Albert. The only nastiness, in the discussion between you and me, is coming from you..

> I don't give that much of a rat's arse about
> whether the testing gets stopped, (snip)

Since the use of CW itself is not threatened in any way, the only issue at hand is the telegraphy proficiency licensing requirement (the code test).

> However, I DO think that what bodes
> ill for amateur radio is the ATTITUDE
> and BEHAVIOR of aggressive, divisive
> people! (snip)

The only bad attitude, bad behavior, or divisive behavior, here is your own. You're telling people who don't like CW to forget Amateur Radio. You've used more foul language in one message than I've used in these newsgroups in perhaps the last ten years.

> Again, my suggestion for a guy who dislikes
> CW and HF is this, Dwight: You should
> probably stay with the internet and FORGET
> amateur radio.

And my suggestion for someone obsessed with CW enough to urge others with different views to stay away would be to get out of Amateur Radio - attitudes like that don't "comport with the basis and purpose" of this radio service.

<<snip snip to Bull S***>>

With all the previous S*** House lawyers opinions eliminated.

I have been shopping at RS for a Christmas (oh my sacred
creator, a non-PC statement in a post) and was not even
asked for my name and address.

I was amazed and asked why they did not want the info
for their advertising list. The clerk stated this policy was
done away with except for credit card apps and extended
warrenty purposes. (I don't go into RS very often and
last time was about 3 years ago, when they still collected

names and addresses)

One things that amazes me is, for years people asked for
SSNs and that info is still floating around. Basically the
bottom line is this, if a government agency wants to find
you they will. If I want to find you I can from info ya'll
have passed out over the past 1 or more years.

Privacy is non-existant in the computer age, just face
that fact or move to some third world country where t
hey still use stone tablets and wax to record their history.

You should have insisted that they stop what they are doing to take down
the information. And you should have insisted that all the RS employees
stop hawking cellfones for a moment to gather 'round to look at your SS
card.

Whats good for the goose is good for the gander.

Have I missed the point, or do I gather that, in the USA, shops are
asking for an SSN when making normal credit card purchases? What has

this to do with creditworthiness as far as the shop is concerned? Surely
they get paid regardless?
Ian.

I was flabbergasted at what happened today at a local Radio Shack store.

I was waiting in line with several others while the cashier interrogated a customer.

1) Name, first and last
2) Telephone number
3) Address
4) Social security number

I interrupted his reciting his SS number, demanding loudly why the cashier needed to collect this information in public. The cashier, who also is the store owner got angry and told me it is Radio Shack policy to collect this information as part of the "Contract" between seller and purchaser. I turned to the line of waiting customers and began lecturing about invasion of privacy and identity theft. The owner started yelling about how I had to

leave immediately or he would call the police. So I left.

Please register your dismay at your local Radio Shack store at this policy which is an invasion of privacy and invites crime. Do not participate in this "Marketing Strategy" which only serves to desensitize consumers as to their personal rights.

Thank you & 73

If the person was signing up for a wireless phone account they do require
the SSN.

> If the person was signing up for a wireless phone account they do require
> the SSN.
>

If they did require the SSN I would go with another service. I am not sure of the law now, but if it was not for some US Government form (mostly for taxes but it could be others) , it used to be against the law to require you to give out your ssn.

Entity Ralph Mowery spoke thus:

>> If the person was signing up for a wireless phone account they do require
>> the SSN.
>>
> If they did require the SSN I would go with another service.
My point exactly, and especially in public. If they require a SSN they
should have the customer fill out a form in writing rather than announce to
everyone present.

> it used to be against the law to require you
> to give out your ssn.
Last time I renewed my driver's license it didn't have my SSN on it like the
previous one did. They explained that it was now a state law for security of
the individual.

Around here, they finally stopped asking for your name every time you make a
purchase. Possibly, because they no lomger send out (or print) a catalog.

They did not ask me for anything yesterday on a $ 20 purchase. If places
have a good warrenty service like a battery I purchased from autozone a few
years ago it would be ok. The battery in my car went dead and I got a new
one. Did not think it was covered as I had forgotten how long I had had it.
They asked for my name and telephone number. The computer popped up that
the battery still had a year to go on the warrenty and they saved me about $
10. Not much money but very nice of them . I will go back to that store as
much as I can for car parts just for that reason.

I ask if they are going to match the 496.80 check I get each month. If the answer is "No," then they don't get the number. Any service I get which requires it will not get it until I receive a letter over the store owner's signature. The signer is then responsible for any misuse of the number since no one else outside of gov't has it.

You must not live in the US. Here, any financial institution, credit card issuer, lending institution, credit clearing house has *either* your SS#, OR a taxpayer Identification number. If you buy and or sell stocks it is also required. Your SS# is widely and legally used by quite a few organizations.

You'll have to fix the return add due to dumb virus checkers, not spam

Even still they should give the person the opportunity to write that down as opposed to speaking out loud.

I think, because of credit checks, they need that for certain things like cell phones, satellite dish service, and any credit card sign-ups. But again, there should be some way that this could either be written down by the customer and also the sales rep should have some way of either calling the information in, in a way to protect privacy, such as keying the social security number via touch-tone pad.

I used to support Rat Shack but since they have gone the way of only computers, cell phones and satellite dishes and barely anything close to radio anymore, I probably won't be shopping there much anymore......

Yeah, your SSN was not allowed to be an identification number. But now, your government looks at you a bit differently, and that string of digits has become your Taxpayer Identification Number. Pay up, sucker.

Ed

Yes, at one time, it had become illegal to require the SSN on certain
documents. But life has changed. Beginning to sound like the "666 - Mark of
the Beast" If you don't show it, NO DEAL! According to scripture, you won't
be able to even buy food with out it. Hmmmmm. Interesting concept. I'm not a
very religious person, but it all sure seems to be coming together. Maybe
they of history had the 666 part wrong, but their vision may have been on
the mark as it were. Very interesting indeed.

I've seen R.S. people ask the person to write their SSN on a slip of paper when applying for things as well. A more subtle way of doing it so it isn't blurted out. What "I" detest is when going to some government offices, they keep you in the open and do just the same as most accuse RS of doing. You'd think the Govt of all people, would be more inclined to honor privacy and security. They want to know your SSN, your purpose for the visit, etc. It is no one else's business what you're there for. G.W.

Yeah... you are right for a normal cash sale. But as the message stated, certain transactions do require the social sec. number. Just don't ever buy anything that requires one I guess.

However, a private company CAN deny you their services for any reason

not specified under equal opportunity laws. You don't HAVE to give them
the SSAN, they don't HAVE to give you a cell phone.

Close but you have the grouping wrong.

001-01-0100 The officials all got the low numbers when they first
started out.<:-)) But if it says "Not to be used for Identification"
printed on it, it has to have been around more than a little
while<sigh>

Mine is 249-62-1167. Feel free to use it at Radio Shack. It won't make
a damn bit of difference to anybody.

   On the front of mine it says "For Social Security and tax purposes -
Not for identification"
   On the back of mine it says "FORM OA-702. Rev (9-61)

Michael A, yours seems as old as mine. I lost my wallet with the SS
card in Myrtle Beach when I was a teenager...1969-ish. It showed up in
the mailbox about a year later with the card and the 12 dollars still
there, sent from one of the shops on the strip.
I proceeded to lose it again and never got a replacement but I still
have the old mailer with the substitute card attached.
When I opened a bank account at one bank they refused to accept this as
'official' and obliged me to present a copy of a tax return with the number.
Another bank requested no evidence.
Duh-wuh, talk about high security.
I'm sure matching a SS to to a name may facilitate a clown bent on
identity theft but you can go to any number of legit sites on the
internet and match names and SS numbers, do a scam, and be gone. It
would be silly to work so hard to do this while standing in line at
Radio Shack or the DMV.
I agree that the SS numbering system is grossly abused...for that same
reason your number is hardly a guarded secret anymore. I get the annual
mailings at my address for a guy who lived here a decade ago that show
all his retirement perks, ss-number, et al.
Its laughable that someone could be offended by revealing this 'secret
number' but at the same time there's no reason that anyone like RS
should 'need' it.
The secret system is kaput. Just give 'em a number so they can fill in
the fields on their screen. Thats all they really want.

    I have been looking for a long time to find the gear that I used as a Novice. I can't remember the last time I actually saw a pair of these at one of our monthly Ham Radio Flea Markets.
    If you have these items and would like to sell them to me, they will be very satisfied with their new home. Again, the equipment I'm looking for are:
        EICO 723 60W CW XMTR
and   EICO 722 VFO

Thanks for reading this request,
Jim Chumbley, N6UF

It was more of an issue of if someone is so "evasive" about something like a
social security number and offended by being asked for one, that they should
avoid any transaction requires one for the transaction!

I can't believe you think companies won't accept cash! There is a ISP near here, which takes payment in most any form INCLUDING cash. IF you live close enough to stop by, why not? Of course an option as opposed to credit cards or debit cards if you don't want to use credit type information, is Money Orders. AND to answer another persons comment, USUALLY one knows when their subscription is to expire, SOOOOO you send in the payment a few days early! Not exactly rocket science. Sometimes I have to wonder where some people's minds are. CASH is not a dead option. I own a business and I too PREFER cash. No Credit card transaction costs, no running to bank to deposit checks, no waiting or worrying if a check will bounce. Yep, I prefer good ole cold hard cash. G.W.

I can't imagine running all over town to pay bills in cash anymore.
Looking for parking places, wasting time and gas, standing in line,
having to go to the bank to GET all that cash.
I pay 100% of my bills online or with automatic drafts...no fees and
there's no SS# involved :-)

-Bill

I can't imagine it either, but the point was, cash is still accepted. IF you
are chincy about presenting cards, then cash is the option. G.W.

Maybe. I used to work with a guy who did not believe in credit cards. One
time he went on a business trip and tried to check into a hotel. Only way
they would take cash was for him to pay in advance, and leave a $200
security deposit, and that was at least 10 years ago.

$496.80? Never heard of such an odd amount. Thought they always paid in
even dollar amounts, and that the minimum was $600

Or was this just a ploy?

I go to nearest bank to cash disability check then pedal my ASSets
[mainly stomach bulge - but it's diminishing] off to pay phone/'net bill
and, every six months, the insurance payment on mini-van I use mainly
for shopping and doing laundry.

That's the exception rather than the rule for me. I've never been asked
to post a security deposit since returning all my credit cards and
tendering cash. I've traveled the entirety of the western states by van
and M/C and never had a problem.

Maybe he had a known prior conviction for passing phoney paper?

I hear ya! Funny, they create this bull shit to "stop" people from
reproducing, yet it still happens. I think it was a week after the new $20
came out, someone reproduced one. Why bother? It probably costs them more to

redesign and retool than it is worth in the long run. G.W.

Wellll...That's a kinda, sorta, maybe, could be thing.
It's really a matter of scale and no, most companies no longer perfer
cash. Small businesses? Yes, but not the larger ones. Cash for
anything larger than a "mom-and-Pop" operation is an enormous
inconvenience. Then you have the risk of making night deposits. Get
robbed and it's only your word as to how much was taken. Plus more
than a few such reported roberies have been faked. Then again, it's
unlikely the cash is going to be covered by insurrance without a lot
of paper work and even then it's only the persons word.

First, any cash transaction with a business or bank of more than

several hundred dollars is supposed to be reported to the government as it's suspicious (money laundering among other little items brought that little problem about)

If I travel much, a car, or minivan is far too slow, then it's either commercial aviation, or fly my own plane.
Paying cash for an airline ticket sets off alarms and is is a really good way to gurantee the next clothest thing to a good physical while you wait, and wait, and wait... Now, flying my own 4 passenger plane? It does take gas and it doesn't take long of flying into strange airports and paying for $200 worth of gas in cash to raise flags. Even though a small plane is not capable of carying much in weight they have been a thing of suspicion for the unknowing general public. Rent a car? Credit card and drivers license... I know of one guy where I used to work who was able to rent without a credit card, but he really had to hunt and it took a big security deposit. the company finally told him to use the company credit card or else.

If I were to take a long vacation I certainly wouldn't want to take enough cash to support the whole trip. All I'd need is to have the wrong person see me peel off a 20 to pay for gas, or groceries. Certainly a person can be more discrete and use a money belt. I know one guy who always carried over $20,000 to the big fly-in at Oshkosh. If he needed cash it was a trip to the Port-O-Pottie where he could peel off a couple hundred without being seen. Had it been me I'd have always slept with my pants on.

Yes, my ISP would be willing to take cash as will the corner gas station, BUT a single credit card, plus checking account is much safer, more secure, and costs me nothing as long as I keep it paid up.

If I were to get robbed and reported some one stold $200 or $300 in cash, let alone enough for a trip, the police would probably have me as the prime suspect. If I'm robbed, they get $20 and my credit card it only causes me an inconvenience and maybe $50. However if purchases sho up that are not typical of my purchasing habbits the phone will be ringing by the time I get home to question the purchase. I know that for sure as it's happened.

Yes a person can get by using cash only, but not most of society could not and maintain their standard of living. It takes 5 minutes to pay the monthly bills. Some are automatically taken out of my pension check at the bank. If I did everything in cash it'd take me most of a day and probably 50 to 75 miles of driving. Cash only for me and most of the people I know would be a severe inconvenience and take a lot of time out of already busy lives.

You'll have to fix the return add due to dumb virus checkers, not spam

This is like comparing apples to oranges. CASH is accepted anywhere - for the most part. As to your argument, large corporations not preferring cash, I disagree. I don't see signs on the bigger stores like Wal-Mart telling you "Sorry, we accept credit cards, debit cards and checks only. No cash please." When that day comes, we're all in trouble. For a transaction or two, it isn't bad depending on amount - to carry cash. IF the transactions are for large amounts - big or many purchases such as Christmas shopping or a vacation, then you'd have to be a fool to carry large amounts of cash - it just isn't safe. So then a Debit or Credit Card would be a safer option. And, yes, using plastic or the numbers from that plastic, is a convenience for paying monthly bills or other debts. It is a way of life - a necessary evil. Paying monthly bills in cash COULD be done if the setting is right. But it would be an inconvenience to carry all the cash for security. There are places at least around here, where you can go to pay the phone, electric, gas, water bill all in one location - the majority of the necessary evils - not the luxuries of "credit". It is more a convenience to those who aren't lucky enough to have a bank account. Why don't they have one? With some banks, they require more than some people can keep in it for a minimum balance, thus get hit with service charges which then eats more of their income. Others prefer no accounts due to not trusting banks. Still others aren't adept at keeping an account for whatever reasons. You can't force everyone to open or keep a bank account or credit card active. So, CASH will ALWAYS be accepted.
Credit is a wonderful thing, but sadly, many don't have it - either because they don't trust it, not enough income for it or they ruined it and were forced back into a cash only status. CASH supports these folks. This is leaning to the argument of 666. If you don't have the mark (or number) you don't get service or goods. While the number may not have to be 666, it is coming down to in your example, if you don't have plastic, you plain can't exist. That is baloney. I'm not a really religious person, so I don't know if the day of the "mark of 666" will ever come. IF it does, we're all in deep dodo. Maybe in your example, we are leaning towards that goal. I certainly hope not. It sure would make life inconvenient for a hell of a lot of people. G.W.

Hi Need Aircap for HF Amplifier,
Perhaps from ded HF Amp.
Loading and Tuning cap.
Please specify air gap and capacity, and dimensions.
Ideal would be 250 pf 3 or 4 Kv and 500 to 1000 pf @ 500 Volt or so.
If you have good band switch let me know too.

QRZ and the "RF Keystone Kops" who fed them
the BS thereon are obviously paranoid.

The HR-2600 IS NOT..repeat...IS NOT capable
of being "modified" for out of band operation as was
it's immediate product predecessor radio the HR-2510.

I think the "kilocycle cops" who got your ad
cut off from QRZ don't know their freakin
ass from a hole in the ground. I and suprised
QRZ even fell for their line of BS.

Put it on E-Bay instead, and in so doing
tell QRZ.com to go pound sand.

Okay got an old repeater, hook up and transmitts 30 watts on 440. was tuned
and shop says will work on 220 mhz for 50 watts. I don't want to deal with
repeaters, got on a trade and never used it. It was tube based and has been
modified over to transisters for power amp and works on the test bench. I
even have a 1U rack mount computer to go with it. Before it goes to ebay
anybody want pics/ make an offer? KB9YMX

Hi Landshark,

I did try to email him twice for a clarification, but have gotten zero response. All I got was the initial email telling me to "read the rules before I post then I would know not to post illegal equipment" (I paraphrase, see above for exact quote). It's not that big of a deal anymore...it's only a $200 radio at issue here after all...but I have gotten an education at how some hams just can't help being self-righteous asses. You know guys, there is a war on, and our country is going bankrupt, etc.. So you would think they'd find a bigger issue to get their panties in a wad over if they really want to go on a crusade. No wonder young people are not coming into the hobby. One slip up, and they get jumped. It's almost like these old cratchety hams would rather see the hobby die completely than morph into something they don't approve of. They can go down with their ship if they want to, but this sort of attitude is what is killing the hobby, in my opinion.

By the way, in an attempt to be done with this nonsense, I've dropped the price of the radio to $195 or best offer. Again, see www.eham.net (my new favorite site!) for further info and pictures.

Thanks

Darren

>
> (Note: a service manual for a HR2510 isn't much good with a HR2600.
> Maybe he should auction that separately?)

Agreed. I noticed that it's really not worth that much. Whatever
it's worth, I figured the "market would decide" if I auctioned it. On
eBay I had it for sale with no reserve. It's not that I'm keenly
aware if it's value and wanted to get more than it's worth, just that
I don't really have the foggiest what the radio's worth so I was going
to auction it to make sure I at least go "about" what it was worth.
Right now it's up on www.eham.net for $195 or best offer. Hamprice
says it's worth about $150, so I figure with the Chipswitch and the
D-104 hand mike, I've got it priced roughly right.
The 2510 service manual is just a freebie. I'm not even concerned
about getting any money for it, I just would hate to throw it away.

I have a new in box Motorola M1225 LS 25-40Watt Mobile Unit,
MINT/UNPROGRAMMED. still with mic and clip, hardware, manual, and safe op
manuals. The split is 450-470 UHF. Never programmed. Photos upon request
Model # M44DGC95A2AA
 asking $300.00

Also, 1 pair (2) Motorola 2 channel Radius P110 with good batteries,
antennas, 2 chargers.
Model #'s P44QLC20A2AA

Asking $250 for the set OBO

Will consider trades in part for good working BC780XLT and cash. Photos of
both units available. Postal MO preferred.

Actually, it's not a Ham thing, it's more of a troll thing.
The individuals I mentioned before are nothing more
than trolls, a ham license has nothing to do with that.

> You know guys, there is a war on, and our

Yup, sad thing. It's those people that make you not want
to take the time, study, pass an exam if people like that
are on the airwaves. Believe me, if they talk like this
on the newsgroup, they can't be any better on the air.

Actually, it's not a Ham thing, it's more of a troll thing.
The individuals I mentioned before are nothing more
than trolls, a ham license has nothing to do with that.

> You know guys, there is a war on, and our

Yup, sad thing. It's those people that make you not want
to take the time, study, pass an exam if people like that
are on the airwaves. Believe me, if they talk like this
on the newsgroup, they can't be any better on the air.

It has nothing to do with crochety old hams and everything to do with
the fact that the guy converted his 10 meter ham rig to CB and can't
understand the FCC regs.

Don't blame eBay and the FCC for the fact you can't sell this radio
legally.

Blame the CB bootleggers, pirates and freebanders like Landshark,
Moparholic, etc. who operate illegally. They are the ones who forced
the FCC to ban these rigs.

Darren,
your is probably not the only case. However, the HR2600 does have a nasty
habit of opening into 11 meters when one does the chipswitch to open 12
meters. This is not neccessarily true in all cases (depending on the
version of the chipswitch used).

you might want to take the radio in, have it examined by a tech with a
G.R.T.O lic. from the FCC (commercial grade lic.). and then have him sign an
affidavit attesting to the specifications the radio is currently capable
of. submit a copy of that along with your posting back to qrz.com and see
what goes. Thats all I can suggest.

oh really? I know of 4 shops here in the southwest that used to do routine
mods on the HR-2600 line of radios without a problem. What are you basing
your info on?

> Put it on E-Bay instead, and in so doing tell QRZ.com to go pound sand.
good point. list it as "HAM GEAR". make no mention whatsoever about CB in
the ad.

That's a good one, doug. Tell everyone about how you made the
rain report for jamming repeaters, ya blowhard hypocrite.

This is the MFJ 1/4 wave ground plane antenna. It is currently cut for 220,
but can be cut down for 144mhz.
It is assembled at the moment. I had it up for about 6 months, but decided
to take it down.
It is in like new condition. Comes with U bolt for mounting.

$20.00 plus $5.00 shipping.

While I am somewhat adept at cutting a 144 to 220, for the life of me I do
not know how to do the converse...

Just how does one go abt STRECHING the radiator since 220mhz requires a
shorter radiator than 144mhz. If you would impart this information to the
ham community, I do beleive that you will be a hero!!!! Or at very least
well liked!!!

Dan

Hmmm ?? A construction project!! Or, is it a recipe?

Start with a 48 inch length of stainless steel 1/16 inch diameter rod.

Add a new coil at one end to be tapped for a 50 ohm match at 146 MHz.

Add a new capacitor connected in parallel with the coil.

Adjust capacitor and inductance to achieve 146 MHz resonance.

Using an antenna analyzer locate and solder a tap coil for 50 ohm match.

Seal all with a strong weather proof sealant.

Install in mount provided at point of sale.

Install on vehicle.

After failure, replace with commercial 146 MHz antenna

Deacon Dave, W1MCE

I guess then every other ham that has opened the transmit on their
tranceiver to get additional ham bands, MARS/CAP, etc., has "converted
their...rig to CB" if in the course of the modification it does
theoretically allow transmission on the CB band. following that
logic, there's a lot of $5000 Icom, Yaesu, and Kenwood HF rigs out
there that have been converted to CB's. I respectfully disagree that
by adding 12 meters to this radio it shows I "don't understand the FCC
regs." I would submit that it is YOU who doesn't understand the FCC
regs. Well, I see that trying to get any sense through to the "radio
police" is a hopeless cause. No matter, I've sold the damn thing.
Now, on to opening up my new 706 for 5 MHZ......

Funny thing is that I've spotted quite a few HR2600's on eBay both
before and since I tried posting my radio. And no, I didn't email
eBay about them nor am I going to post the links to the items (if the
radio police want to, they can just search eBay to find them). One
that has been up for several days even proudly advertises its
Chipswitch mod that covers CB. Ummm, can you say "selective
enforcement?"

It seems to me that folks have lost sight of the fact that HAMs are the
only ones that can legaly design, build/modify, and operate radios.
modifications/conversions don't mean squat as long as the equipment is
operated in accordance with 47CFR95 and 47CFR97.

which one of those is the one that Radio Shack just cleared out for $29.95,
new-in-the-box, warrantied, etc ?

it was the HTX-10 right ?

Selective enforcement is ebay's right. You can't accept that.
Solution: get off ebay. Duhhhh.

Well you see gentlemen, after spending a day up on the roof, it appears I
typed without proof reading.
You would all be correct, how would you cut a 220mhz antenna to work on
144mhz????? Good question!
So let me stand corrected and say, it can be cut for
440mhz..... NOT 144mhz.
Thanks for noticing my mistake.....

73

Lou

20 bux hu?

You can built one out of a SO-239 coax connector, a aluminum L bracket. A
U-bolt, and some welding wire/and or solid copper and some solder....maybe
5 bux at most.

Dan/W4NTI

Wrong again. eBay is a > business < and their business is connecting
sellers and potential buyers. You can't accept that. Solution, stop
being a Anti Girl. Duhhhh.

Typos do slip in. You could split the element about halfway and fold it out
the other way to make the elements longer.

Too expensive....all you need is an SO-239 and a coffee can with a piece of
copper wire and some solder

I'm done with this whole affair now that I've sold the HR2600 radio in question. A very educational and actually quite interesting discussion this has been. In closing I'd just like to say that there are still very many hams out there who have lent me a helping hand with many constructive comments. I've received quite a few emails from hams genuinely trying to help me with my questions. Thank You. There have also been a few (I don't know if they are hams or not since the dissenters usually won't post their callsigns) who have voiced their opinions as well. Thank You for those opinions also. It's helped me understand what all the fuss is about and the roots of the militant anti-freebanders. AND is a celebration of free speech. I say let it roll everybody and let's try to learn as much as we can from one another. But remember the old saying "divide and conquor." There's not that many people coming into any form of radio hobby anymore, and all the in-fighting will help no one in the end, when we wake up and all our radio spectrum has been taken from all of us. Let's pick our battles carefully. To the freebanders, I say get your ham license, to the hams I say open your hearts and minds to everyone who shows an interest in radio and being a good operator, including more than a few freebanders who fall in this category. And together we might just get the 11 meter band back. At the very least we'll protect the spectrum we've got.

73

So what? Radio Shack cleared out the DX-398 several months ago for $99.97
and as of this moment the fair market value of this radio is $150.

If you want to be a price cop, get a job at QVC.

Ahhh, but using loading coils enables one to access multi bands with one vertical element.

Remember, most of these were bottle fed and have no concept of self-help.

You're a good samaritan. Now you'll be bombarded with requests to build same for them for 5 bux shipping included!

Fagboy...if you run a business you have the right to refuse service.
Go eat a throbbing dripping boner, you localnet fag.

Gee, why so angry Paul ? Just another casualty of modern living I suppose.

I was actually interested in buying it and I wanted to make sure I didn't
have the model numbers mixed up since the original poster had two different
radios listed.

In the meantime good luck and keep your spirits up Paul.

Sure Pal, and you decided to do all this "number checking" via a newsgroup
posting and not by email?

Spoon-feed your BS to someone else who cares.....

Chill out Paul, all the guy asked was if it was the HTX-10. Easily confused
with the HTX-100. That's all he asked, but you accused him of being price
police with absolutely no provocation. Get up off yourself! Who made you the
newsgroup Nazi? Sheesh.

Jon

I think the only thing I can't program to Ham bands in this list (radio
wise) is the Radius P-100 (Don't have the cable/Software) and the RH252
Relms (Don't have programming instructions. A sampling of all the others
have been tested from 144 to 162 MHz. I think they will go higher and
lower, but antennas and internals are optimized for 150 through 160 MHz, or
there abouts.

It is nice to have a type accepted rig to use when you want to, and keep all
the finger-pointing to a minimum.

Granted, the VHF rigs are only good for the 2m part of the Ham bands, and
the UHF rigs are only good for the 70cm portion.

I'm Not a ham hobbyist, but a previous owner of our new/old house was.
 There is a telephone pole next to the house for the sole purpose of
supporting antenna. All that's left up there is the remnants of an
old rotary television antenna and a half dozen cables going up. It's
a regular sized telephone pole, including climbing rungs starting at
about 10 feet up.

The pole can be seen, just to the right of the house, in this shot:
http://www.writebyte.net/writebyte.dll/GetImage?ImageId=Pdrm2235

I'd be willing to swap the pole, you come and remove it, for a little
help with electrical stuff around the house. I need to upgrade the
old place from 100 amp to 200 amp. I can do most of the work myself,
but would appreciate some assistance/instruction on replacing the
breaker boxes, etc.

Location, Salisbury MD. (in town) Email if you're interested, I
don't frequent this board. sailingbum@writebyte.net

Tim.

Blank1. Kenwood transceiver TS-430s, with am, fm,
cw, ssb and cw crystal. With this transceiver
comes a PS-430 power supply, Mc-60 mike,
a hand mike, a AT-250 automatic antenna
tuner, and all their manuals. The price is
$475.00 US plus shipping costs.

2 One Kenwood 9R-59D communications
receiver and its' manual. The cost of this
rare receiver is $100.00 US plus shipping costs.

3 One Kenwood KPS-12 power supply. $50.00 US
plus shipping costs.

4. One Yaesu FRG-7700 communications receiver
with its' manual, a Yaesu FRT-7700 antenna tuner, a
Bencher audio filter and a Palomar lf converter.
The price is $250.00 US plus shipping costs.

5. One Radio Shack DX 440 portable communications
receiver. $50.00 plus shipping costs.

6 One ICOM IC-505 6 meter all mode transceiver.
$125.00 US plus shipping costs.

7.One Amrco 1.6-54 mcs pre-amp. $30.00 US plus shipping
costs.

8. One Astatic chromed and amplified mike. $50.00 us
plus shipping costs.

9. One Eico resistance-captaincy bridge. $30.00 US
plus shipping.

All this equipment looks good and it works well.

If you are interested please email me at
peter.christensen@shaw.ca
Thank you. Peter Christensen.

have forsale a tentec century 22 cw xcvr in nice condx with matching 979 5a
power supply.also has optional 226 crystal calibrator.radio works well but
needs the dial string adjusted, vfo works perfectly. also does not have
original band switch knob. this si a real nice qrp radio and also puts out
up to 20w high power. asking $250 shipped in the usa.

I am looking for the paperwork (instructions and schematic) for a Jackson
648-1T tube tester. I will buy originals or decent xeroxes. I would also buy
a complete tester, if necessary.

Anybody have an idea what a Drake TR-270 2m rig would be worth. I'm
looking getting one but I'm not sure what to make for an offer. I have
seen very little on these radios

Thanks

    I was going to list these items on Ebay, and figured I would give it a
shot here first. I have a Yaesu FT-51r HT with the MH-29 remote control
speaker mic. It has 1 Yaesu and 1 aftermarket 9.6v (5 watt) and 1 Yaesu 4.8

volt battery. It has the original Yaesu desk charger and an aftermarket quick charger. There is the E-DC-12 Mobile adapter/charger. Also the CSC-66 leather case for use with the 9.6v batts. I have owned the rig for about 2 years and am a non-smoker. It functions perfectly and has NO scratches on the displays, the radio or the mic. It has the factory dual-band antenna. I used it a few times in my truck, otherwise it sat here on my desk. I have the original box and manual. Also included in the package is a Power Plus 2mtr amplifier with receive preamp. Its 5w in 35-40w out. It also functions perfectly but is missing the mobile mounting bracket, as I never used it. You can see pictures of the equipment at http://home.earthlink.net/~snowleopard99/Ft51/ft51r.html

If you have any questions, feel free to ask here or in e-mail, just remove the NOSPAM

I am just getting out of the hobby for now, as other things have caught my interest (namely target shooting) and there isn't really much activity in my area anyway.

I will start out asking $400.00 for the package. If you have offers let me hear, and I would also consider trades on firearms.

Thanks, James KB9LTJ

I believe you need to change a reference crystal as well as fiddle with
the jumpers.....

1stly sorry Nick!!!...it is an xtal change as well!.
my jpg file was rather small!

go here for the service manual ftp://80.164.5.88/yaesu-service/
then see image47 in the ft23r service manual file.

i have had one for almost 20yrs now, magic 'bullet proof' radio.

though i warn u...the mod needs the VCO unit removing!!
NOT easy.

mike
P.S sri agn to Nick.

Thanks for the information.
I looked at the .jpg file, it wasnt all that clear (resolution).
The crystal needs to be replaced from 12.8MHz to 10.24MHz? (guess - can you
verify?).
-> Guess based on following idea that the crystal will be pulled by the
trimmer capacitor hanging
-> at the end of it and squinting at the side comments on the service
manual:
-> 12.8MHz in ratio to 12.5MHz
-> 10.24MHz in ratio to 10MHz

Looks like I have to remove a lot to get to the main board (i.e. free it
from the case)
and then unsolder the PLL board (which is a right angles to it) before I can
unsolder/solder the bridges and perform the crystal replacement.

The ensure that the frequency is correct - by altering the trimmer and using
a frequency counter.

It does look a bit difficult.

Regards,
GW7ABW

I am curious to see what the outcome is. I have had a couple of the PMR
versions of those sets (basically the same as the FT23) and you can make
the display read in 5/10khz or 12.5/25khz steps by changing a jumper
(not sure which now) but to actually change its RF operation from one to
the other a reference crystal change was required.........

Regards

Neil

I would like to sell the following rare, hard to find, and out of
print technical books.

Payment: When you buy these books from me, now you can pay me in the
U.S. by paypal, money order or check. If you are outside the US, you
can buy and pay me now by paypal or money order. You can also pay by
bank wire, but I have to charge you the $12 my bank charges me for
international bank wires.

Shipping: I will ship your book no later than the next day after I
have good payment. You pay $2.00 for media mail or $4.00 for priority
mail. I will pay the insurance. For overseas shipping rates, please
ask, giving the address the books will be sent to.

Availability: I know that there will be buyers who buy these books
right away, and I only have one copy, so it is first come, first
served.

Refunds: You may return the book to me for a full refund of the price
of the book if not satisfied.

Thank you,

Hania Lux

RADIO AND COMMUNICATIONS

SAGA OF THE VACUUM TUBE by Gerald E.J. Tyne, Research Associate of the Smithsonian Institute. Published by Howard W. Sams & Co., Inc. in 1977 ISBN Number 0-672-21470-9. Paperback in Like New Condition. $ 15.96.
RADIO ENGINEERING by Frederick Emmons Terman, Sc.D., Professor of Electrical Engineering, Stanford University. Second Edition. McGraw-Hill Book Company, Inc., 1937 From Professor Rhodes personal library with notes on the inside cover. Hardback. $52.50

EARLY RADIO WAVE DETECTORS, by Vivian J. Phillips, B.Sc. (Eng.) Ph.D., ACGI, CEng., FIEE, FIERE, published by the Institution of Electrical Engineers 1980. ISBN 0-906048-24-9 Good condition. From Professor Rhodes personal library as indicated by his bookplate and name on the insider cover. Hardback.
$65.00

THE CONTINUOUS WAVE – TECHNOLOGY AND AMERICAN RADIO, 1900-1932 by Hugh G.J. Aitken published by Princeton University Press 1985. ISBN 0-691-02390-5 Paperback in very good condition. $85.00

S. GERNSBACK'S RADIO ENCYCLOPEDIA 1927 by Sidney Gernsback, published originally in 1927, republished by Vintage Radio Publishers 1974. ISBN 0-914126-06-7. Paperback in Like New condition. $45.00.

WIRELESS COMMUNICATION IN THE UNITED STATES – THE EARLY DEVELOPMENT OF AMERICAN RADIO OPERATING COMPANIES by Thorn L. Mayes published by The New England Wireless ands Steam Museum, Inc. in 1989 ISBN 0-9625170-0-3. Paperback in Very Good condition. $39.50.

THE RADIO AMATEUR'S HANDBOOK by the Headquarters Staff of the American Radio Relay League, 1955, 32nd edition. Library of Congress Catalog Card Number 41-3345. Collectible hardback in acceptable condition. $24.50.

ACHIEVEMENT IN RADIO – SEVENTY YEARS OF RADIO SCIENCE TECHNOLOGY, STANDARDS AND MEASUREMENT AT THE NATIONAL BUREAU OF STANDARDS by William F. Snyder and Charles I. Bragaw. Published by the U.S. Government Printing Office 1986. Library of Congress Catalog Card Number 85-600619. Hardback in Very Good condition. $99.50.

CABLESHIPS AND SUBMARINE CABLES by K.R. Haigh. Published in 1968 by the United States Underseas Cable Corporation in association with Western Union International. Hardback in Very Good condition. $22.45.

PRINCIPLES OF RADIO COMMUNICATION by John H. Morecroft, Professor of Electrical Engineering, Past President of Institute of Radio Engineers. Published by John Wiley & Sons in 1927. Hardback in Good condition. From Professor Richard A Rhodes II's personal library as proven by his bookplate on the inside cover. $39.50.

RADIO ENGINEERS HANDBOOK by Frederick Emmons Terman, Sc.D. Published by McGraw-Hill Book Company in 1943. Hardback in Good condition. From

Professor Richard A Rhodes II's personal library as proven by his signature on the insider cover. $22.50.

EARTH CONDUCTION EFFECTS ON TRANSMISSION SYSTEMS by Erling D. Sunde. Published by Dover Publications in 1968. Library of Congress Catalog Card Number 68-12908. Paperback in Very Good condition. $44.00.

MEASUREMENTS IN RADIO ENGINEERING by Frederick Emmons Terman, Sc.D. Published by McGraw-Hill Book Company 1935. Hardcover. From Professor Richard Rhodes personal library as evidenced by his personal bookplate on the inside cover. $63.00.

GENIUS AT RIVERHEAD – A Profile of Harold H. Beverage by Alberta I. Wallen. Published by the North Haven Historical Society in 1988. Signed by the author on the title page. Library of Congress Catalog Card Number 87-62783. Hardcover with dust jacket. SOLD

FROM INVENTION TO INNOVATION Long Distance Telephone Transmission at the turn of the Century by Neil H. Wasserman. 1985 John Hopkins University Press.
ISBN# 0-8018-2715-9. Hardcover with very good d/j. Condition like new. Price $99.50.

COMMUNICATIONS IN SPACE From Wireless to Satellite Relay by Orrin E. Dunlap, Jr. Revised Edition. Published by Harper & Row 1964. First Edition.
LCC#64-18103. Hardcover no d/j. Condition very good. Price $24.50.
ELECTRONICS

THEORY AND APPLICATIONS OF ELECTRON TUBES by Herbert J. Reich, Ph.D. Second Edition. Published by McGraw-Hill in 1944. In Good Condition. From Professor Rhodes personal library as indicated by his signature in the book. $49.50.

ELECTRONIC FUNDAMENTALS FOR TECHNICIANS by Robert L. Schrader. Published by McGraw-Hill in 1977. Library of Congress Catalog Card Number 77-37105. Hardback in Good condition. $11.95.

ELEMENTS OF SOLID STATE THEORY by G.H. Wannier. Published by Cambridge University Press. 1960. Paperback collectible in very good condition. $18.50.

SAGA OF THE VACUUM TUBE by Gerald E.J. Tyne, Research Associate of the Smithsonian Institute. Published by Howard W. Sams & Co., Inc. in 1977 ISBN Number 0-672-21470-9. Paperback in Like New Condition. $ 15.96.

ELECTRICAL MEASUREMENTS by Arthur Whitmore Smith. Fifth Edition. Published by McGraw-Hill Book Company in 1959. Library of Congress Catalog Card Number 58-11193. From Professor Richard A Rhodes II's personal library as proven by his bookplate on the inside cover. Hardback in Good condition. $6.50.

FUNDAMENTAL OF CIRCUIT THEORY by `Norman Balabanian. Published by

Allyn and Bacon 1961 Library of Congress Catalog Card Number 61-13555. Hardcover. From Professor Richard Rhodes personal library as evidenced by his personal stamp on the inside cover. $24.00.

PRINCIPLES OF ELECTRICITY by Leigh Page, Ph.D. and Norman Isley Adams, Jr., Ph.D. Second Edition. Published 1949 by D. Van Nostrand Company.

ELECTRICAL MEASUREMENTS – PRECISE COMPARISONS OF STANDARDS AND ABOSLUTE DETERMINISM OF THE UNITS by Harvey L. Curtis. First Edition. McGraw-Hill Book Company 1937. From Professor Richard Rhodes personal library as evidenced by his bookplate and autograph on the inside cover. Hardcover. $86.00.

ADVANCED LABORATORY PRACTICE IN ELECTRICITY AND MAGNETISM by Earle Melvin Terry, Ph.D., and Hugo Barnard Wahlis. Third Edition. McGraw-Hill Book Company 1936. Harcover. From Professor Richard Rhodes personal library as evidenced by his bookplate and autograph on the inside cover. $150.00.

CHARLES STEINMETZ by Henry Thomas. Published by G.P. Putnam's Sons in 1959. Library of Congress Catalog Card Number 59-13608. Illustrated by Charles Beck. Hardcover with dust jacket. From Professor Richard Rhodes personal library as evidenced by his bookplate on the inside cover.

ADVANCED ELECTRICAL MEASUREMENTS by Walter C. Michels. Published by D. Van Nostrand Company in 1947. Hardcover. From Professor Richard Rhodes personal library as evidenced by his autograph on the inside cover. $16.50.

BELL SYSTEM

A HISTORY OF ENGINEERING AND SCIENCE IN THE BELL SYSTEM – THE EARLY YEARS (1875-1925) Prepared by Members of the Technical Staff, Bell Telephone Laboratories, M.D. Fagen, Editor. Published by Bell Telephone Laboratories, Inc. in 1975. Library of Congress Catalog Card Number 75-31499. Hardback in Very Good condition. From Professor Rhodes personal library as indicated by his bookplate on the inside cover. $49.50.

A HISTORY OF ENGINEERING AND SCIENCE IN THE BELL SYSTEM – NATIONAL SERVICE IN WAR AND PEACE (1925-1975) Prepared by Members of the Technical Staff, Bell Telephone Laboratories, M.D. Fagen, Editor. Published by Bell Telephone Laboratories, Inc. in 1978. ISBN Number 0-932764-00-2. Collectible hardback in Very Good condition. From Professor Rhodes personal library as indicated by his bookplate on the inside cover. $75.00.

A HISTORY OF ENGINEERING AND SCIENCE IN THE BELL SYSTEM – PHYSICAL SCIENCES (1925-1980) Prepared by Members of the Technical Staff, AT&T Bell Laboratories, S. Millman, Editor. Published by Bell Telephone Laboratories, Inc. in 1983. ISBN Number 0-932764-03-7. Collectible hardback in Very Good condition. From Professor Rhodes personal

library as indicated by his bookplate on the inside cover. $24.90.

THE ANATOMY OF A BUSINESS STRATEGY – BELL, WESTERN ELECTRIC, AND THE ORIGINS OF THE AMERICAN TELEPHONE INDUSTRY by George David Smith published by the Johns Hopkins University Press in 1985. ISBN 0-8018-2710-8. Hardback in New Condition $49.95.

THE TELEPHONE ENTERPRISE: THE EVOLUTION OF THE BELL SYTEM'S HORIZXONTAL ARCHITECTURE, 1876-1909 by Robert D. Garnet published by the Johns Hopkins University Press in 1985. ISBN 0-8018-2698-5. Hardback in New Condition $26.95.

ACOUSTICS

ARCHITECTURAL ACOUSTICS by Anita Lawrence. 1970 Elsevier Publishing Company isbn #444-20059-2. Very good condition. Hardcover. No d/j. Pages clean and bright, binding tight. Prof. Rhodes bookplate on back of the front cover. Price $86.00.

PROPAGATION OF WAVES by P. David and J. Voge. First English Edition 1969.
LCC #68-18521. Very good condition. Hardcover with d/j . Clean pages, tight binding.
Price $65.00.

FUNDAMENTALS OF OCEAN ACOUSTICS by L. Brekhovskikh, Yu. Lysanov, published by Springer-Verlag 1982 ISBN 3-540-11305-3. Very good condition. Hardback. $67.95

ACOUSTICS: HISTORICAL AND PHILOSOPHICAL DEVELOPMENT, edited by R. Bruce Lindsay, published by Dowden, Hutchinson & Ross in 1972 ISBN 0-87933-015-5. From the Benchmark Papers in Acoustics Series. Hardback. Very Good condition, $54.50.

PHYSICS

INTRODUCTION TO SPECIAL RELATIVITY, Second Edition by Wolfgang Rindler. Published by Oxford Science Publications 1991. ISBN 0-19-853953-3. Hardback in Like New condition. $52.50.

EXPERIMENTAL ATOMIC PHYSICS by G.P. Barnwell, Ph. D. and J. J. Livingood, Ph.D. First Edition, published by McGraw-Hill Book Company in 1933. A collectible book in acceptable condition. From Professor Richard A Rhodes II's personal library as proven by his signature on the insider cover. $15.50.

MATHEMATICAL STATISTICAL MECHANICS by Colin J. Thompson, published by the Macmillan Company in 1972. Library of Congress Catalog Card Number 77-150071. Hardback in very good condition. $14.55.

ELEMENTS OF HAMILTONIAN MECHANICS by Ter Haar. Second Edition 1964.

Published by North-Holland Publishing Company .Very good condition. Hardcover. Clean pages, tight binding, no d/j. Prof. Rhodes stamp on back of the cover. Price $71.27

ELEMENTS OF X-RAY CRYSTALLOGRAPHY by Azaroff. 1967 McGraw-Hill. Good condition. Hardcover. Clean pages, tight binding, no d/j. Prof. Rhodes signature on back of the cover.
Price $75.00

MATHEMATICAL THEORY OF RELATIVITY by Eddington. 1963 Cambridge at the University Press. Soft cover. Good condition. Clean pages, tight binding. Prof. Rhodes bookplate on back of the cover. Price $165.00

HYDRODYNAMICS by Lamb. Sixth Edition. (First American Edition 1945) New York Dover Publications. Good condition Hardcover, clean pages, tight binding. Prof. Rhodes signature on first blank page. Price $95.00.

PIEZOELECTRICITY an Introduction to the Theory and applications of Electromechanical Phenomena in Crystals. By Walter Guyton Cady. New Revised Edition in two volumes. 1964 Dover Publications. Softcover. Clean. Good condition
Price $125.00.

ORGAN BUILDING AND DESIGN by Poul-Gerhard Andersen. Published by George Allen and Unwin Ltd. 1969. Very good condition. Hardcover, No d/j. Clean and tight.
Price $75.00.

PHYSICS OF THE EARTH by Frank D. Stacey. Published by John Wiley & Son 1969. SBN# 471 81955 7. Very good condition. Hardcover, no d/j. Clean bright pages, binding tight. Price $87.50.

BIBLIOGRAPHY OF THE HISTORY OF ELECTRONICS by George Shiers. Published by The Scarecrow Press 1972. ISBN# 0-8108-0499-9. Very good condition.
Clean, tight and bright. Hardcover, no d/j. Price $64.

ELECTRICAL AND ELECTRONIC TECHNOLOGIES: a chronology of Events and Inventors to 1900 by Henry B.O. Davis. The Scarecrow Press 1981. ISBN# 0-8108-1464-1. Condition like new. Collectible: Signed by the Author.
Price $25.20.

THE AMBIDEXTROUS UNIVERSE by Martin Gardner. Published by Basic Books 1964. LCC# 64-23953. Hardcover, no d/j. Good condition. Clean pages, tight binding. Prof. Rhodes stamp on back of the front cover. Price $22.50.

KINETICS AND DYNAMICS OF MACHINES by George H. Martin, Revised Printing. Published by McGraw-Hill Book Company in 1969. Library of Congress Catalog Card Number 69-12261. Good condition hardback.
$17.50.

INTRODUCTION TO ATOMIC AND NUCLEAR PHYSICS by Otto Oldenbert and Wendell G. Holladay. Published by the McGraw-Hill Book Company in 1967. Library of Congress Catalog Card Number 67-10877. Hardback in Very Good Condition. $12.50.

THE NEW REFORMATION – FROM PHYSICAL TO SPIRTITUAL REALITIES by Michael Pupin. Published by Charles Scribner's Sons in 1927. Good condition hardback. $19.45

A TREATISE ON THE MATHEMATICAL THEORY OF ELASTICITY by A. E. H. Love, Fourth Edition, published by Dover Publications in 1944. A hardback book. Collectible in acceptable condition. $19.50.

PROBLEMS IN ELECTRODYNAMICS by V.V. Batygin and I. N. Toptygin. Published by Academic Press in 1964, Library of Congress Catalog Card Number 64-1746. Good condition. From the William Luther Cobb Library. Hardback. $54.50

SOLD A FIRST COURSE IN CONTINUUM MECHANICS, by Y.C. Fung, Second Edition. Published by Prentice Hall in 1977. ISBN 0-13-318311-4. In Good Condition. From Professor Rhodes private collection as indicated by his bookplate on the inside cover. $45.50.

ENGINEERING DRAWING by Thomas E. French, Sixth Edition, published by McGraw-Hill Book Company, 1941, Hardback. Collectible book in Very Good condition from Professor Richard Rhodes personal library as shown by his signature in the book. $34.50.

A TREATISE ON THE ANALYTICAL DYNAMICS OF PARTICLES AND RIGID BODIES WITH AN INTRODUCTION TO THE PROBLEM OF THREE BODIES by E.T. Whittaker, Professor of Mathematics at the University of Edinburgh, Fourth Edition, published by Dover Publications in 1944. Hardback collectible in Very Good condition from Professor Richard Rhodes personal library as shown by his signature in the book. $30.00

A SOURCE BOOK IN PHYSICS by William Francis Magie, Professor of Physics Emeritus, Princeton University. First Edition. Published by McGraw-Hill Book Company in 1935. Hardback collectible in good condition. From Professor Richard Rhodes personal library as proven by his bookplate and signature. $35.95.

ELECTRON AND NUCLEAR COUNTERS – THEORY AND USE by Serge A. Korff. Published by D. Van Nostrand Company, Inc. in 1946. Collectible hardback book in good condition. $24.50.

WAVE PHENOMENA by Dudley H. Towne. Published by Addison-Wesley Publishing Company in 1967 Library of Congress Card Catalog Number 67-15662. Hardback in Very Good condition. Professor Richard Rhodes personal library as proven by his bookplate. $34.50.

ELEMENTARY SOLID STATE PHYSICS by Charles Kittel, Professor of Physics, University of California, Berkeley, California. Published by John Wiley & Sons, Inc.1962 Library of Congress Catalog Card Number

62-17462. In Good Condition. From Professor Richard Rhodes personal library as proven by his bookplate. $29.50.

ATOMIC SPECTRA AND ATOMIC STRUCTURE by Gerhard Herzberg, hardback published by Dover Publications in 1944, second edition. Collectible in acceptable condition. $11.90.

CONCEPT OF MASS IN CLASSICAL AND MODERN PHYSICS by Max Jammer. Published in 1961` by Harvard University Press. Hardback. Library of Congress Catalog Card Number 61-13737. Good condition. From Professor Richard Rhodes personal library as proven by his bookplate. $14.95.

THE CALCULATION OF ATOMIC COLLISION PROCESSES by Kenneth Smith. Published by Wiley-Interscience in 1971. ISBN 0-471-80000-7. Like New condition. From Professor Richard Rhodes personal library as proven by his bookplate. $10.95.

THE GARLAND COLLECTION OF CLASSICAL PHYSICS APPARATUS AT VANDERBILT UNVERSITY by Robert T. Lagemann. Published by Folio Publishers in 1983 ISBN Number 0-9613702-0-3. Paperback $12.95.

THE VARIATIONAL PRIUCIPLES OF MECHANICS by Cornelius Lanczos, Fourth Edition. Published by University of Toronto Press, 1970 70-151376. Hardback in Very Good condition From Professor Richard A Rhodes II's personal library as proven by his bookplate on the inside cover. $19.95

CONCEPTS OF SPACE HISTORY OF THEORIES OF SAPCE IN PHYSICS by Max Jammer. Published by Harvard University Press in 1954 54-8630 From Professor Richard A Rhodes II's personal library as proven by his signature bookplate on the insider cover.
$12.90.

THE NATURAL PHILOSOPHY OF TIME, Second Edition, by G.J. Whitrow. Published by Oxford University Press in 1980. ISBN Number 0-19-858215-3. Paperback in Like New condition. $19.90.

A TREATISE ON THE MATHEMATICAL THEORY OF ELASTICITY by A. E. H. Love, Fourth Edition, published by Dover Publications in 1944. A hardback book. Collectible in acceptable condition. From Professor Richard A Rhodes II's personal library as proven by his signature on the insider cover. $19.50.

COLLISION PHENOMENA IN IONIZED GASES by Earl W. McDaniel. Published by John Wiley & Sons, Inc. in 1964. Library of Congress Catalog Card Number 64-13219. Hardback in Very Good condition. $27.50

INTRODUCTION TO PHYSICAL STATISTICS by Robert Bruce Lindsay. Published by Dover Publications in 1968. Library of Congress Catalog Card Number 68-11966. Paperback in Good condition. $8.90.

INTRODUCTION TO OPTICS GEOMETRICAL AND PHYSICAL by John K. Robertson, M.A., LL.D., F.R.S.C., F. Inst.P. Fourth Edition by D. Van

Nostrand Company, Inc. in 1961. Library of Congress Catalog Card Number 54-6281. Hardback in Very Good condition $7.35.

INTRODUCTION TO PHYSICS AND CHEMISTY by Arthur Reiser and Konrad Krauskopf. Published by McGraw-Hill Book Company in 1964. Library of Congress Catalog Card Number 63-22522. Hardback in Very Good condition. $12.40.

THE USE OF ULTRASONICS in Molecular Physics by V.F. Nozdrev. Published by Pergamon Press in 1965. Library of Congress Catalog Card Number 63-18965. Hardback with dust jacket in Very Good condition. $9.95.

RAYLEIGH AND LAMB WAVES – PHYSICAL THEORY AND APPLICATIONS by Igor Aleksandrovich Viktorov. Published by Plenum Press in 1967. Library of Congress Catalog Card Number 67-10537. Hardback in Very Good condition. From Professor Richard A Rhodes II's personal library as proven by his bookplate on the inside cover.
$55.00.

SOLD TRANSISTOR AND PHYSICS AND CIRCUITS by Robert L. Biddle and Marlin P. Ristenbatt. Published by Prentice-Hall in 1958. 57-14923. Hardback in Good condition. From Professor Richard A Rhodes II's personal library as proven by his bookplate on the insider cover.
$7.40.

TRANSMISSION-LINE THEORY by Ronold W. P. King, Gordon McKay Professor of Applied Physics at Harvard University. Published in 1965 by Dover Publications. Library of Congress Catalog Card Number 64-8269. Paperback in Very Good condition. $75.50.

A COLLECTION OF PROBLEMS IN ATOMIC & NUCLEAR PHYSICS by I. Ye. Irodov. Translation from the Second Edition. Published by Pergamon Press in 1966 Library of Congress Catalog Card Number 64-25444. Hardcover with dust jacket in Very Good condition. $52.50.

APPLIED THERMODYNAMICS by Virgil Moring Faires. Published by The Macmillan Company in 1943. Hardback in Very Good condition. From Professor Richard A Rhodes II's personal library as proven by his signature on the inside cover. $11.45.

THERMOPHYSICS by Allen L. King. Published by W. H. Freeman and Company in 1962. Library of Congress Catalog Card Number 62-8209. Hardback in Good condition. $9.45.

THE STRUCTURE OF LINE SPECTRA by Linus Pauling and Samuel Goudsmit. Published by McGraw-Hill Copyright 1930. Paperback in Very Good condition. From Professor Richard A Rhodes II's personal library as proven by his personal stamp on the inside cover. $19.95.

ATOMS, MOLECULES AND QUANTA by Arthur Edward Ruark and Harold Clayton Urey. Volumes One and Two of the two volume set. Dover Publications 1963. Library of Congress Catalog Card Number 63-19499 Paperback in Very Good condition. $20.45 for the set.

BASIC PRINCIPLES & LAWS OF MECHANICS by Alfred Zajac. Published by D.C. Heath and Company Library of Congress Catalog Card Number 66-12390. Hardcover. From Professor Richard Rhodes personal library as evidenced by his personal stamp on the inside cover.

STATISTICAL THEORY OF LIQUIDS by I. Z. Fisher. Published by the University of Chicago Press 1964. Library of Congress Catalog Card Number 64-22249.
Hardcover. From Professor Richard Rhodes personal library as evidenced by his personal stamp on the inside cover. $90.00.

INTRODUCTION TO PHYSICAL STATISTICS by Robert Bruce Lindsay. Published by John Wiley & Sons 1941. Hardcover. From Professor Richard Rhodes personal library as evidenced by his autograph on the inside cover. $49.50.

HIGH-PRESSURE MEASUREMENT, edited by Guardini and Edward C. Lloyd. Published by Butterworths in 1963. Library of Congress Catalog Card Number 63-20264. Hardcover. $120.00.

THE MOLECULAR THOERY OF FLUIDS by Herbert S. Green. North Holland Publishing Company `1952. Hardcover. From Professor Richard Rhodes personal library as evidenced by his autograph on the inside cover.

THE STATISTICAL MECHANICS OF SIMPLE LIQUIDS by Stuart A. Rice and Peter Gray. Published by Interscience Publishers in 1965. Hardcover. From Professor Richard Rhodes personal library as evidenced by his personal stamp on the inside cover. $85.00.

X-RAYS IN THEORY AND EXPERIMENT by Arthur H. Compton (Nobel Laureate) and Samuel K. Allision. Published by D. Van Nostrand Company in 1935. Hardcover. From Professor Richard Rhodes personal library as evidenced by his autograph on the inside cover.

INTRODUCTION TO PHYSICS AND CHEMISTRY by Arthur Beiser and Konrad Krauskopf. Published by McGraw-Hill, Inc. in 1964 Library of Congress Catalog Card Number 63-22522. Hardcover. $7.00.

HANDBOOK OF ELEMENTARY PHYSICS by Robert Bruce Lindsay. Published by the Dryden Press 1943. Hardback. From Professor Richard Rhodes personal library as evidenced by his autograph on the inside cover. $25.00.

CHEMISTRY

CHARACTERIZATION OF ORGANIC COMPOUNDS BY CHEMICAL METHODS by Terence C. Owen. Published by Marcel Dekker in 1969. ISBN Number 0-8247-1510-1. In Like New condition. $14.00.

THE SPECTRA AND STRUCTURES OF SIMPLE FREE RADICALS An Instroducti8on to Molecular Spectroscopy by Gerhard Herzberg. Published by Cornell University Press in 1971. ISBN Number 0-8014-0584-x. From Professor

Richard A Rhodes II's personal library as proven by his bookplate on the insider cover. $18.75.

BASIC INORGANIC CHEMISTY by F. Albert Cotton and Geoffrey Wilkinson. Published by John Wiley & Sons in 1976. ISBN Number 0-471-17557-9. Hardback in Very Good condition. $14.50.

SOLUTIONS MANUAL FOR FUNDAMENTALS OF ANALYTICAL CHEMISTRY, Fourth Edition by Douglas A. Skoog and Donald M. West. Published by Saunders College Publishing in 1982. ISBN Number 0-03-0548461-2, Paperback in Very Good condition. $12.95.

PHYSICAL CHEMISTY by Farrington Daniels and Robert A. Alberty. Published by John Wiley & Sons, Inc. in 1955 Library of Congress Catalog Card Number 55-5480. Collectible book in Good condition. From Professor Richard Rhodes personal library as proven by his signature. $24.95.

MOLECULAR STRUCTURE AND THE PROPERTIES OF LIQUID CRYSTALS by G. W. Gray. Published by Academic Press in 1962. Library of Congress Catalog Card Number 61-18803. Hardback in Very Good condition. From Professor Richard A Rhodes II's personal library as proven by his personal stamp on the inside cover. $7.85.

EXPERIMENTAL SPECTROSCOPY by Ralph A. Sawyer. Published by Prentice-Hall in 1944. From Professor Richard A Rhodes II's personal library as proven by his autograph on the inside cover. Hardcover in Very Good condition. $9.90.

KINETIC THEORY OF LIQUIDS by J. Frenkel. Published by Dover Publications in 1955 by special arrangement with Oxford Press. Hardback in Good condition. From Professor Richard A Rhodes II's personal library as proven by his autograph on the inside cover. $18.50.

EDWARD WILLIAMS MORLEY – His Influence on Science in America by Howard R. Williams. Published by the Chemical Education Publishing Company in 1957. Library of Congress Catalog Card Number 57-7756. In Fine condition. $22.45.

ORGANIC CHEMISTRY by Louis F. Fieser and Mary Fieser. Third Edition. Published by D. C. heath and Company 1956. Library of Congress Catalog Card Number 56-6691. Hardcover. From Professor Richard Rhodes personal library as evidenced by his autograph on the inside cover. $94.00.

THE CHEMISTRY OF ORGANIC COMPOUNDS by James B. Conant. Revised Edition. By James Bryant Conant. Published by the Macmillan Company in 1939.

THE MOLECULAR THEORY OF SOLUTIONS by I. Prigogine. Published by North Holland Publishing Company in 1957. Hardcover. From Professor Richard Rhodes personal library as evidenced by his autograph on the inside cover. $84.00.

OCEANOGRAPHY

HYDRODYNAMICS by Lamb. Sixth Edition. (First American Edition 1945) New York Dover Publications. Good condition Hardcover, clean pages, tight binding. Prof. Rhodes signature on first blank page. Price $95.00

THE OCEANS by Sverdrup • Johnson • Fleming. 13th printing 1964 Prentice-Hall.
Good condition. Hardcover, no d/j. Clean pages, binding tight. Prof. Rhodes
Bookplate on back of the front cover. Price $124.50

STRATEGIC ANTISUBMARINE WARFARE AND NAVAL STRATEGY by Tom Stefanick, published by the Institute for Defense and Disarmament Studies 1987 ISBN 0-669-14015-5 Hardback with Dust Jacket. Like new condition, including the dust jacket. $70.87.

THE SEA FLOOR • AN INTRODUCTION TO MARINE GEOLOGY, by E. Seibold and W. H. Berger, Second Edition published by Springer-Verlag in 1993. Hardback. ISBN 0-387-56884-0. Very Good condition. $32.50.

INTRODUCTION TO MINERALS AND ROCKS by Joseph C. Cepeda. Published by Macmillan College Publishing Company in 1994. ISBN 0-02-320452-4. Paperback in Good condition from Professor Richard Rhodes personal library as proven by his bookplate on the inside cover and further illuminated by his notes, underlinings and bookmarks. $39.50.

OCEANOGRAPHY by Jerome Williams of the U.S. Naval Academy, Annapolis. Published by Little, Brown and Company in 1962 Library of Congress Catalog Car Number 62-18105. A collectible hardback book in very good condition. From Professor Richard A Rhodes II's personal library as proven by his bookplate on the insider cover. $19.00.

PROGRESS IN OCEANOGRAPHY, VOLUME I by Dr. M. Sears. Published by The Macmillan Company in 1963. Library of Congress Catalog Card Number 63-15353. Hardback in Very Good condition. $24.50.

PROGRESS IN OCEANOGRAPHY VOLUME 2, Editor Mary Sears. Published by Pergamon Press 1964. Library of Congress Catalog Card Number 63-15353. From Professor Richard Rhodes personal library as evidenced by his personal stamp on the inside cover. $24.50.

GLOSSARY OF OCEANOGRAPHIC TERMS, 2nd Edition, edited by B.B. Baker, Jr., W. R. Deebel, R. D. Geisenderfer. Published by the U.S. Naval Oceanographic Office. 1966. Hardcover. From Professor Richard Rhodes personal library as evidenced by his personal bookplate on the inside cover.

OCEAN SCIENCES, edited by Captain F. John Long. Published by the Unites States Naval Institute, Annapolis in 1964. Hardcover. From

Professor Richard Rhodes personal library as evidenced by his personal bookplate on the inside cover.

OTHER

PRINCIPLES OF STRATIGRAPHIC ANALYSIS by Harvey Blatt, William B.N. Berry and Scott Brande, published by Blackwell Scientific Publications in 1991. ISBN Number 0-86542-069-6. In Very Good condition. From Professor Richard A Rhodes II's personal library as proven by his bookplate on the insider cover. $14.85.

FUNDAMENTALS OF AUTOMATIC CONTROL by Robert C. Weyrick. Published by McGraw-Hill Book Company in 1975. ISBN Number 0-07-069493-1, In Like New condition. $14.50.

FOURIER SERIES AND BOUNDARY VALUE PROBLEMS by Ruel V. Churchill. Published by McGraw-Hill Book Company in 1941. Hardcover collectible book in acceptable condition. $24.50.

THE NEW SOLAR ELECTRIC HOME THE PHOTOVOLTAICS HOW-TO HANDBOOK by Joel Davidson, published by AATC Publications in 1987 ISBN 0-937948-09-8. Paperback in good condition. $11.50.

Hi All,

Is anyone aware of the legal limit of power on the 2.4GHz band in the
US, I am aware that the limit is 10mW in countires in the EU, but
havve been unable to determine the limit in the US.

Thanks for your help!!

Alan Ward

Go to the FCC web site and find Part 97. It should have all you need to
know about power limit regulations for the ham bands.

To bad, your loss.
By the way, this was sold (yes, SOLD) on ebay MANY months ago!
Why is it still around??

Anything with FA is ignored.

I located this adult site on Google:

http://www.google.com/search?
num=1&hl=en&lr=&ie=UTF-8&oe=UTF-8&q=%22adult+newsgroup+constantly%22+pictures+
%22index.php%22

All the adult binary newsgroups are on the site and the pictures have been decoded
and ready for you to look at.

It's really cool and it seems to be all free.

Cheers,
  gylqyc

I found this on a bulletin board like this one and decided to try it.
A little while back, I was browsing through several newsgroups, just
like you are now, and came across an article similar to this that said
you could make thousands of dollars within weeks with only an initial
investment of $6.00! So I thought, "Yeah right, this must be a scam",
but like most of us, I was curious, so I kept reading.
Anyway, it said that you need to send $1.00 to each of the 6 names and
address stated in the article. You then place your own name and
address in the bottom of the list at #6, and post the article in at
least 200 newsgroups. (There are thousands) No catch, that was it. So
after thinking it over, and talking to a few people first, I thought
about trying it. I figured: "what have I got to lose except 6 stamps
and $6.00, right?" Then I invested the measly $6.00. Well GUESS
WHAT!!... within 7 days, I started getting money in the mail! I was
shocked! I figured it would end soon, but the money just kept coming
in. In my first week, I made about $25.00. By the end of the second
week I had made a total of over $1,000.00! In the third week I had
over $10,000.00 and it's still growing. This is now my fourth week and
I have made just over $42,000.00 and it's still coming in rapidly.
It's certainly worth $6.00, and 6 stamps, I have spent more than that
on the lottery!!
Let me tell you how this works and most importantly, why it works....
Also, make sure you print a copy of this article NOW, so you can get

the information off of it as you need it. I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy!
SUGGESTION: Read this entire message carefully! (print it out or download it.) Follow the simple directions and watch the money come in! It's easy. It's legal. And, your investment is only $6.00 (Plus postage).
IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!! If all of the following instructions are adhered to, you will receive extraordinary dividends.
PLEASE NOTE: Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay big bucks for quality lists. However, the money made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list.

<========= HERE ARE THE 4 EASY STEPS TO GET STARTED ========>

STEP 1: Get 6 separate pieces of paper, and write the following on each piece of paper

"PLEASE PUT ME ON YOUR MAILING LIST"

Now get 6 US $1.00 bills and fold each piece of paper in half and place one US dollar bill with each piece, place in individual envelopes ensuring the bill will not be seen thru the envelope, hold the envelope up to a light too ensure the bill is not visible through the envelope.

This is absolutely legal.

What you are doing is requesting a service and paying for it.

==========

Mail to

#1: Phonexay, Khoun Vongsa
5003 Lakecrest DN
Shawnee, KS, USA, 66218
#2: Tamara Ortiz
2471 Newsona Rd
Bellville, TX,USA, 77418
#3: Love Carter
#2 Jericho St
Victoriaville Homes, Antipolo City

    Phillippines 1870
#4: Ruby Jones
    PO Box 1594
    Rotorua
    New Zealand
#5: Ewan Elliott
    42 Coles Place
    St Albans
    Christchurch
    New Zealand
#6: Jon Dostert
    3209 Rustic Meadows Dr
    Bedford, TX 76021
      ==========

Step 2:

Now take the #1: name of the list all together Shift what was #1: to #2: and #2: to #3: and #3: to #4: and #4: to #5:
This leaves #6: clear =
 place YOUR name and postal address in the number #6: position

   ==========

Step 4:

    Copy this article, change anything you need to do but try and keep it as original as possible - Now post your amended document to at least 200 news groups (I believe there are up to 2 to 2.4 million news groups but all you need is 200) but remember the more you post to the more money you will make.
    This is perfectly legal, if you have any doubts refer to article 18, section 1302 and 1341 US Postal and Lottery Laws or Title 18 section 3005 in the US code, also in the code of the Federal Regulations Volume 16 sections 255 and 4336 which states "a product or service must be exchanged for money received" The simple note "Please put me on your mailing list" makes it legal, because you are paying for a service, which is adding your name onto their mailing list for a $1.00 dollar fee,

    Important keep a copy of the letter for yourself so whenever you need money you can repeat this over and over again.   Please remember this program remains successful because of the honesty and integrity of the participants

I checked with the US Postal Service (1-800-725-2161) to ensure this is legal
     ==========

Step 5:

        Use Google or other search engines on Netscape or Internet Explorer to search for various newsgroups (on-line forums, message boards, chat sites, discussion groups etc

Step 6:

Visit these message sites and post this article as a new message by highlighting the text in this message and selecting paste from the edit menu.

Fill in the Subject field, tis will be the first field that everyone sees as they scroll through the postings to a particular group, click the "post" message button.

CONGRATULATIONS You have done YOUR FIRST POSTING !!!!! THATS ALL THEIR IS TO IT!!!! All you have to do is repeat this exercise on other boards until you have posted the minimum 200

==========

*Now the WHY part; Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter.

Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still ONLY 5 persons per 200 newsgroups react I will receive $15,625,00!

With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is: do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really works?? I think so... People have said, "what if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual internet!!!

REMEMBER - PLAY FAIRLY AND HONESTLY AND THIS WILL WORK FOR YOU!!!

GOOD LUCK to all and please play fairly and reap the huge rewards from this, which is a ton of extra CASH.

By the way, please DON'T try to deceive people by posting the messages with your name in the list and not sending the CASH to the rest of the people already on the list, you will NOT get any. This is the fairest and most honest way I have ever seen to share the wealth of the world without costing anything but our time!!! You also may want to buy mailing and e-mail lists for future cash. Make sure you print this article out RIGHT NOW!

Also, try to keep a list of everyone that sends you CASH and always
keep an eye on the newsgroups to make sure everyone is playing fairly.
Remember, HONESTY IS THE BEST POLICY. IMPORTANT: If you're not
interested to my article, (don't want instant cash?), please pass this
message to anyone who wishes quick money.
Thank you so much.

FS: Yaesu FT-757GX and FP757HD/Speaker Power Supply

Before I take it to eBay, I thought I would give make it available here. I
have a Yaesu FT-757GX with the matching the FP-757HD (Heavy Duty)/Speaker
Power Supply. Both the radio and power supply are in very clean condition,
non-smoking environment. It works well in all modes (CW-N & CW-W, USB, LSB,
AM & FM), 10 thru 160 and WARC bands ,also including the new 60 meter band
(MARS modified), 100w output (25w AM), dual VFO, memories and much more.
Looks and sounds great! I would rate both units 9 out of 10. Also included
are the operator's and service manuals, power cable, and the original
handheld microphone with up/down buttons. Great looking combination. Selling
both units as a set. Excellent adjunct to your existing station or even a
new primary station. Asking $450.00. You pay shipping from Cleveland,
Ohio. Please feel free to email me if you have any questions or would like

additional info.

Thanks,
Pete, N8PB

Hi,

I am selling the following as a package (will not seperate-sorry):

Yaesu FT-847 (HF, 6M, 2M, 70CM)
Yaesu FC-20 Tuner (HF-6M)
Heil GM-5 Goldline Microphone
Heil PL-2 Balanced Microphone Boom
Heil SM-1 Shock mount for boom mics

Heil FS-2 Foot switch
Heil AD-1 Cable (Mic to Radio)

I have original boxes. Equipment is in prestine condition, purchased new in May 2003.
I have stock mic for radio which obviously I will include.

Retail price for package is $3000 + taxes

I'm asking $2500 CDN.

Only selling because my wife returned to school, and therefor is not working full time.

If you are interested, please call 905-789-9405

I am not a regular user of eBay, so needless to say, I was quite
surprised when my HR2600 was banned. I emailed eBay and they
basically said the HR2600 has been deemed by the FCC to be an illegal
radio since it's used frequently for out-of-band pirate operation.
Since I am a licensed ham, bought the radio legally from another ham,
and have always operated it legally, I can't see how they can ban
these radios (other than the fact that they can because it's their
auction site and I know this trumps fairness).

So my question, is what is the best alternative auction site for those
10 meter ham refugees who have been banished from eBay? I've heard
Yahoo's site is pretty good, are there others I should consider? I'm
not a dealer, just an ordinary ham wanting to get a fair price for my
prized HR2600.

Thanks in advance for your advice and suggestions.

Darren

If you "want a fair price", post it For Sale in any of these groups.
The fact that you want to auction it suggests that you want more than
a fair price.

QTH.com is good.
   Thats Ebay for ya, can't sell legal items but there are literally hundreds of low drive 10m amps listed there, and they are ALL illegal. Relist it but don't use HR2600 in the title, just put 10m transceiver.
   Ebay reminds me of the Bush/Cheney/Ashcroft cartel. They do anything they want, legal or not, and they don't care what anyone thinks of their actions. Bunch of arrogant bastards.
   Once I saw an item manufactured in 1999, "autographed" by a person who has been dead since 1990. It was being sold as authentic with a COA. I notified ebay of this obvious scam. They told me to mind my own business.

That is a stupid thing to say. On ebay you could have hundreds
of people looking at your item. Here you are limited to a
couple of dozen at best. You should use your cranium some time.

I know about the HR2600 ban and it does not make sense to
include it with the Lincoln and the HR2510. Those radios
are easily modified but the 2600 requires major surgery
in order for it to operate out of band. Common sense doesn't
seem to be all that common.

I did not see your auction so I don't know if this applies.
I put up a very nice HR2600 on ebay this year. It had the
Chipswitch so it was capable of 10 thru 12 meter operation.
I mentioned in my auction that it would operate on 11 meters

and ebay pulled it. I listed it again and only mentioned 10
and 12 meter operation and they left it alone. You could also
list it without mentioning the model of the radio. Bidders
could email you about specifics.

Yep, you guessed it. Same deal with mine. The wording I used was operates "10 *through* 12 meters." I emailed them and proposed that if I change the wording to "10 *and* 12 meters would it be ok. The answer was that the wording didn't matter.

Below is the exchange I had this morning with eBay. It seems eBay is guilty of merely blind obedience to the FCC and that the problem lies with the FCC's determination that all HR2600's are "problematic" and are of a "prohibited nature." When I bought the radio years ago from its original owner (also a licensed ham) I liked that the radio had a Chipswitch so I could operate it on 12 meters where I have operated it extensively. An added side benefit is that I can monitor CB during long roadtrips (I don't own a regular CB but can see their usefulness out on the highway). I have never transmitted out of band nor have I ever wished to. I guess my biggest problem with all of this is that I feel like I've been falsely accused and assumed to be a criminal. I must say I was somewhat offended by the whole episode. Here's the exchenge with eBay:

Hello Darren,

Thank you for taking the time to write eBay with your concerns. I'm happy to help you further.

We absolutely understand that you did not intentionally violate our policies. However, the Uniden HR2600 model is simply not permitted on eBay. Regardless of how the item is described, it just isn't allowed. I
apologize for the inconvenience.

Your item was ended because it was identified by the FCC as potentially
problematic. At eBay, we are not experts on transceivers and the specifications of each model and how it may be modified. Therefore, we rely on the FCC for guidance. eBay was contacted by representatives from
the FCC and asked to remove certain models of radios that, while legal,
may be problematic. Therefore, you may contact the FCC if you have any further questions about the prohibited nature of your particular model.

For further information concerning why your model was ended, contact Ray

LaForge at the FCC Laboratory, 7435 Oakland Mills Road, Columbia, MD 21046, (301) 362-3041, or E-mail: rlaforge@fcc.gov

We appreciate your patience and understanding regarding this matter, and
wish you continued success on eBay.

Regards,

Lara
eBay Community Watch

Message: Re: Item #: 3058207918

Dear Sir or Ma'am,

I believe you may have misunderstood the nature of my item that was removed today. The radio is a fully FCC type accepted and approved HF tranceiver. It is designed and advertised by the manufacturer (Uniden) as a 10 meter HF tranceiver with 12 meter capability after minor modification. As a consequence of the modification it is, admitedly, capable of operating between the 12 meter and 10 meter amateur bands. However, it is NOT a so-called "export," "CB," or other non-type accepted radio. It's fully FCC approved. Many, many, hams have modified
the Uniden HR2600 in this particular fashion to enable them to operate legally on 12 meters as well as 10, and is not at all inconsistent with
perfectly legal operation on these bands.

There are also many other FCC type accepted HF radios capable of operation outside the amateur bands that are listed on eBay right now, so I'm not sure why my radio is different. In reviewing my item's listing, perhaps if I had said "operates on 10 and 12 meters" rather than "10 'through' 12 meters" or included a disclaimer that the operator
of the radio must hold an FCC genral class or higher ham license, would
my listing be ok?

Also, I would like to point out that I am a law-abiding ham radio operator who holds a General class amateur radio license, call sign W5DKE, and that I legally operate this radio on both 10 and 12 meter amateur bands. If a purchaser "might" operate the radio outside the legal amateur bands, that should not preclude my being allowed to sell the item. Otherwise you would have to end the majority of transceiver auctions I see in the Ham Radio Tranceiver section of your website.

Lastly, you can see from my selling history that I am not a regular user
of eBay. Please understand that I in no way intended to circumvent or disregard your site's policies and if I have, please accept my apology.

Respectfully,

Darren Ream

This is definitely not right.
Hell, by that grounds, a pencil is "problematic" because it might be used to

plot a terrorist attack..

I'd forward the exchange back to riley and the arrl.

All prices are in US Funds.

QTY.	Part #	Unit Price	Description
OPTO.			
125	TIL311	$7.00 ea.	The TI TIL-311 is a Hexadecimal Dot Matrix Display with integral TTL driver electronics to accept, store & display 4-bit binary data, Epoxy package
		(Note: This	part wholesales at about $16.50 each)
8	TIL311A	$7.00 ea.	The TI TIL-311A is a Hexadecimal Dot Matrix Display with integral TTL driver circuit to accept, store & display 4-bit binary data, Plastic package
10	DIS1417	$7.00 ea.	The TI DIS-1417 is a Hexadecimal Dot

			Matrix Display with integral TTL driver circuit to accept, store & display 4-bit binary data, Epoxy package

For a copy of the TIL311 Datasheet see:
http://www-s.ti.com/sc/ds/til311.pdf and it is mirrored at
http://umwnt1.physics.lsa.umich.edu/mttc/images/til311.pdf

275	Green LED	$0.10 ea.	Rectangular 5mm x 2mm face/lens $17.50 per bag of 250 ($0.07 each) and
8,750	Red LED	$0.10 ea.	T1 3/4, 5mm Diameter or 0.2" Diameter Sharp P/N: GL5PR4 (5mA at 1.9V) $17.50 per bag of 250 ($0.07 each) and $100 per box of 2000 ($0.05 each)
106	MAN6440	$0.95 ea.	Dual Digit, Green 7 Segment display, 0.56" tall character, Common Cathode $15 per tube of 20 MAN- 6440 ($0.75 ea.)
85	FND6740	$0.95 ea.	Dual Digit, Red 7 Segment display, 0.56" tall character, Common Cathode $15 per tube of 20 FND-6740 ($0.75 ea.)

TTL CHIPS, DIP Package

550	7407N	$0.18 ea.	$4.00 per tube of 25 ($0.16 each) Hex Non-Inverted Buffer with Open-Collector outputs
605	74ALS20AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Dual 4-Input Positive NAND Gates
240	74ALS27AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Triple 3-Input Positive NOR Gates
1350	74LS74AN	$0.25 ea.	$5.00 per tube of 25 ($0.20 each) Dual D-Type Positive Edge-triggered Flip-Flops with Preset and Clear.
100	74ALS74AN	$0.25 ea.	$5.00 per tube of 25 ($0.20 each) Dual D-Type Positive Edge-triggered Flip-Flops with Preset and Clear.

RESISTORS

55,000	100 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100,		
			$15 per box of 5000 or $100 for 50,000 pieces.
4,000	220 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100,		

$12 per box of 4000 or

4,000 680 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100,
$12 per box of 4000 or

A pack of 100 resistors is $4 inclusive shipping to anywhere
in the US and Canada

e-mail: jrpart@excite.com

Minimum purchase $4 including postage.

No shipping is included in the above prices. To quote a
total including shipping, I require your full ZIP code or
postal code in addition to a list of what you are interested
in. Please specify the country for international orders
outside of North America. The shipping you will be quoted
is the cost of the postage stamp (plus insurance if requested).

The only part that I will ship for a total of $4 (by regular
mail) to anywhere in the US and Canada is a pack of 100
resistors.

All components are new. All semi-conductors are stored in
anti-static tubes/bags or on anti-static foam if you purchase
less than a tube/bag.

Offers on the lot are welcome. Keep in mind that I am looking
for a price below wholesale, but more than the commercial buyers
of surplus electronic parts are offering.

Since the HR2600 is only 10 through 12 meters, tell her you won't get very
much for it and it isn't worth selling.

From the current Hamprice document:
HR2600 10M ALL MODE 153, 142, 135, 103

More info on Hamprice at:
http://www.geocities.com/jacpbc@sbcglobal.net/

> > If you prize it so much, why are you selling it?

Those things don't like to be around radio towers. 2 meters is useless
when the tower is a half mile away.

Talking to Ebay is like talking to M$. They really don't care as long
as they make $. The are very "reactive" to issues, not "proactive". I
see nothing wrong with the 2600 but lets talk about the 200 watt "Ham
Amps" for $1xx.00 that cover 12 and 10 meters? They are still around.
Also the "Amateur amps, 250 watts for $2xx.00 that only cover 24 to 30
mhz. Funny, they still get listed?

What do I know and its for sure Ebay does not care at all.

Just my 3 cents, John W5CGU

"A couple of dozen at best"? How do you figure that? Do you have any
clue? If that's true, why did you ask your question here?

BTW, I merely made an observation. But you proved it for me: The "fair
price" you could get here wouldn't be enough.

It's pirates, freebanders and keyclowns who are responsible for the
"ban" in the first place, yet they are the ones who bitch the loudest
about the "unfair" eBay and FCC.

By the way, thanks everyone for their responses. I think I'll go
ahead and post it on eham and qrz and skip this whole auction thing
altogether. When I post it for sale, I'll post a link here so
everyone can look it up.

Thanks again.

Ebay is a wonderful thing most of the time.
Yes, you get the most cash from whatever you sell (most of the time).
Ebay is watched all over the world and if someone really wants to
spend more than you might think is a fair price, well, it's up to
them. It's called free enterprise.   I look at some of the high
prices and shake my head, but If an item is wanted bad enough,
make it so. Who is to say what an item is worth to somebody looking
for it.
ALSO, these newsgroups are nice to find stuff too, BUT, You have no
recourse if something goes wrong. Like what happens if you pay for
something and you never get it? Or if is not working as described?
Or it's beat up and not mint like the posting says? You're screwed.
True, most hams are honest but there are some chumps also.
At least on Ebay there are actions that can be done. Also, using
paypal to pay for something is great. Yes it cost a very small amount
but if you don't get your item and the seller does not have any proof
that he sent it Paypal can and does get your money back from the
sellers account.
73

>If you "want a fair price", post it For Sale in any of these groups.
>The fact that you want to auction it suggests that you want more than
>a fair price.

BTW, Ebay is so large that they usually do not go out of their way to
look for items to ban. What usually happens is some dirtbags out
there look for these radios and amps and e-mail ebay. Then "poof"
your auction is ended. Even though there is nothing illegal with the
item. Ebay is making way to much money to let a legal radio (or
whatever) that someone "might" modify" to be sold on their system.
They seem to be afraid of repercussions down the road.

With all ebays money how come they are afraid to have a telephone??

Wrong again, Doug: It's whining trolls like you who are responsible
for the "ban".

And if you continue to jam 2 meter repeaters in and around Toledo,
you'll get repeaters banned, too.

Pinhead? I guess you are.

Prove me wrong: Post it For Sale here. You'll get a "fair price".

But you didn't answer the question: How can you claim that you'll only
get "a couple of dozen at best"? A "couple of dozen" would only be the

flamers and trolls!

OK, everyone, as promised, I finally posted my radio on QRZ.com and
www.eham.com. Price is $225 or best offer. Go to either of those
sites and check out the description and photo.

Thanks again to everyone who helped me with advice. Much appreciated.

The Hamprice info is really neat. I saved the document for future
reference. I figure then that my radio is priced just about right
considering it comes with a pretty much new $50 aftermarket amplified
mike, and the Chipswitch enhanced microprocessor which is about $100
installed. Throw in a 2510 service manual and two mounting brackets,
and I figure all these extras have to be worth at least $75 over the
Hamprice price (which is presumably for just the basic radio).

It's been years since I've sold any equipment, so one variable I don't
know about is what the overall market conditions are like right now,
but since Hamprice says all their #'s are since March 2003, it's
obviously not too bad.

And yes, I've heard the 706 tends to get clobbered by intermod on 2
meters, but since I use it for a base radio and I live in an extremely
quiet location, that's not a concern for me. In fact the main
intended use for my new 706 is to monitor 2 meter SSB for band
openings.

This is getting really crazy! After my bad experience with eBay, I
posted a query in this newsgroup asking where I could sell my
perfectly legal HR2600. One fellow ham helpfully suggested eham.net
and qrz.com as viable alternatives. Well, I submitted my ad to
qrz.com and it kept mysteriously disappearing so I kept reposting
thinking I was doing something wrong (I rarely post anything for sale
so I'm no expert, I was thinking). Well after the third time my
posting mysteriously disappeared I got the following rather curt email
from the moderator of qrz:

"I have deleted your posting for the illegally modified ten meter
radio. We
do not allow postings for this type of equipment. Please read the
posting
rules at the top of the forum page you are posting in before you post.
73

Bob
W8KT, Moderator, QRZ"

In fairness, I should post what my ad actually read:

"I just bought a 706 and wife says the 2600 must go. 2nd fastidious

ham owner since new. Professionally installed Chipswitch giving this radio coverage of both the 10 & 12 meter bands. RD-104E hand mike recently bought new to replace stock mike that went bad (stock mike included if purchaser wants to fix later on). Includes original owner's manual, all documentation for the D-104 and Chipswitch, power cord, two mounting brackets, and all four original thumbscrews. I'm also throwing in a mint HR2510 service manual. Radio is in excellent condition and used mobile only a few times. Totally stock except for Chipswitch. I'm not a dealer...this radio's been in my shack for the last 5 years. $225 obo plus $15 shipping. Email me, Darren, W5DKE, at dream@alumni.utexas.net if interested or have questions. Thanks for looking at my ad!"

I had carefully read the rules before I posted and reread them again to make sure I had it right. This is what qrz.com's "rule" states:

"Amateur Radio equipment and related items only. For Sale ads only - no opinions, discussions. No illegal equipment, i.e. 10m Amps, 11m Amps, hacked CB's."

OK, now call me crazy, but I am some kind of idiot to have not realized my HR2600 was prohibited by qrz.com's "rule?" Bob, W8KT, seems to have implied that the only way for me to have not realized this was that I must not have even bothered to read the "rules" before I posted.

I used to be pretty militant about cracking down on "freebanders," "pirates," etc and had no sympathy for "whiners." [None of my HF radios have been "opened up" except for this HR2600 because that was a necessary side effect of expanding it to cover 12 meters.] But this is crazy. The anti-freebander crusaders have clearly gotten so militant and self-righteous they brand everone who possess a modified 10 meter tranceiver as scum of the earth. I'm being treated like a criminal for trying to sell a perfectly legal HF tranceiver to another ham. I am PRESUMED GUILTY just because I merely posess an HR2600. So what am I supposed to do with this radio? Since I've been banned everywhere (but not eham.net, thank you eham.net, and I even said 12 *through* 10 meters on that site) now I figure I have three options: 1) sell it at the truckstop, 2) donate it to the Boy Scouts (but then they'd be criminals), or 3) get rid of this equipment in the nearest dumpster before I get arrested especially now that the whole world knows I possess "illegal" equipment.

I've never had as bad of an experience as this in all my hamming days. This has really left a bad taste in my mouth especially when I realized it wasn't just the non-hams at eBay that were treating me this way (which I got over and it wasn't that big of a deal since I knew they were ignortant about ham radio), but now fellow hams are treating me like a criminal!

Someone please educate me and tell me what I'm missing here.

Darren
W5DKE

    Welcome to the world of N8WWM & WA3MOJ. They
have been trolling Rec.Radio.CB for a couple of years
now, with nothing to add other than harassment, foul language,
sick sexual pictures, accusations, signing you up for Spam,
sending you virus's and all around trolling.
    Sorry about your problems with QRZ, have you tried to
e-mail Bob direct, see if maybe things can be cleared up?

    Landshark

Seems that the warranty is only 90 days. I think I'd rather buy a new one with a year warranty.

$275.00 will buy me a new scanner, so why would I want to give you $280.00 for your used one??? I just bought another BC780XLT for $275.00 form:
http://www.rcelectronics.net/
Then theirs the rebuilt right from Uniden for $249.00
http://www.uniden.com/docs/store/itemdetail.cfm?item=BC780XLT
BC780XLT - "500 Channel, Continuous Band Programmable Scanning Radio with TrunkTracker III"
This item is in "Like-New" condition. "Like-New" units have been returned, repaired, and reconditioned. These products are inspected and serviced if necessary and are certified to work to the products original specifications.

So lots a luck trying to get $280.00 for your used unit.

I'm taking my Technician-class exam soon, and am going to be needing a
radio.
I have very little money available to invest in this, so I was
wondering if somebody had one they didn't need and could sell for
cheap.
A simple 2-meter transceiver will work fine for me; I've heard it's a
popular band. However, a multiband one would be nice...
I've only got about $50 max to spend here, maybe a tiny bit more. I'd
be willing to build or scrounge up some pieces, e.g. speaker box,
microphone, antenna, cables, etc. so if it's missing a few
accessories, that's OK.
Can someone help me out?

Thanks!
-Greg Courville

I have a nice older radio in good condition that I could sell you for $50
plus shipping. Shipping to San Jose shouldn't be much at all. E-mail me, the
mail's good.

I have a Bencher BY-1 in excellent condition (the "Bencher" sticker looks a little worn) that I recently swapped for and I don't use. I am trying to get back into CW and I think I would be better off jumping back in with a straight key.... SO

The BY-1 is not wired, although I have the adjustment wrench and phono plug for it. I do not have the original box nor any written material.

If you have a Good straight key in Good condition that you would like to trade, please contact me off list.

Thank you.

I am in the market for a 10-20 or 10-40m vertical antenna that will handle
legal limit.

 Wow thats a big picture there. Double WOW to the price on those green
laser pointers. Why do those things cost so much Mitchell?

First you people complain that his price was too high.

Now because he is posting several times.

You really need to find a new hobby.

A beautiful scratch-free ICOM IC-781. Complete with original box, rack handles, instruction manual, and full service manual. This unit is in perfect shape
with low time on it and standard filters. It is serial number 02290.

This is a 150 watt output rig with Spectrum Scope, Twin Passband Tuning, and Direct Digital Synthesizer.

Normally going for $2800 to $3200, this one is priced to sell.
I want only $2200 and I will pick up the shipping (about 55 lbs)!!

Both the speaker and Mic are in their
original boxes, neither have a scratch on=20
them and are less than a year old.

Both are a 10 out of 10. Price includes
shipping CONUS.

SM-20 $100.00

SP-21 $50.00

Thanks for reading this post.

I have a SignaLink SL-1 for sale that has only been used to decode, never transmitt. It is in excellent condition and comes with an un-terminated connector (RJ45 on one end, open on the other), jumper wires, the original manual and original box.

Asking $30.00, you ship.

Please contact me off list if interested.

I have a Ten Tec Scout, with band modules for 15m, 20m, 30m and 40m.

It also has the noise blanker and microphone thingie. I only used it on CW and at QRP levels. The Scout can run 50w or be turned down to 5w as it has a variable power adjustment.

I believe I also have the manual. It's a 9 out of 10.

Asking $325.00 plus $12 shipping in the USA

Let me know if you are interested.

Wanted: Kenwood TM-G707A. I'm ready to buy immediately for a realistic
price. Most used ones I've seen listed seem to be a bit high,
considering that I can buy one brand new from the dealer for $25 with
shipping. Will use Paypal for immediate payment. Reply to N5DJL via the
arrl.net mail gateway.

Please let the rest of us know where we, too, can pick up that radio for $25. I'd like to have a few more, myself!

Ed

Hello fellow hams.
I recently posted my Ameritron ALS 600 solid state amp for sale on several of the amateur radio classified sites.....I had the amp listed for $800.00 plus shipping.....I received the email below today offering me $1000.00 and no shipping cost because the buyer would arrange for pickup....I would not have thought much about this except I remembered another similar offer I had received when I listed my Emtron DX-2 SP amp for sale several months back.....That time I was also offered a good deal more in payment than I had the amp listed for, and they also would have their shipper come buy and pick up the amp.....in that case the procurement company said they were in some African country.....in this latest case the procurement company is in the UK.

My question is this....Have any of the rest of you ever been contacted by one of the procurement companies when you had listed items for sale on any of the ham classifieds? If so were they legit? My concern is that these companies are operating some kind of a scam operation.....I may be entirely wrong, but I just have that old feeling in my gut that something is wrong here....why would these people offer MORE for the item than it's listed price?.....Maybe I am just paranoid....I dont know....what do you think?

Thanks for your time and 73

Tom.....W4TH

I figured you left a number out.... just didn't really know what the number was. Your figure, $265, is the same price Gigaparts is selling them ..... you may pay some shipping, but you get a warranty.

I would accept the offer only if it was an international money order
and the pre-paid shipper could be delayed 7 days after you cash that
money order. If they accept that term, then go for it. This way the
money order is cashed and there will be no stop payment on that MO.
If they are using there own shipper, you shouldnt have to worry about
customs.

Sincerely,
John Johnson
kf6foz

Hi all I am after some parts for the Icom M-800 HF Marine Radio

I need a remote controller unit with all the leads and I need another set of connector leads and a mic Oh and the proper DC Leads :0)

does any one out there have any of these parts or any contacts for these parts ????

I have two Radio bodies and one controller but no connector leads or mics ..

The controller part number is EX-803 Remote Controller
DC Power cable for Controller 12v-1 amp OPC-089A
Interface Cable for Controller OPC-172A

Main Unit Power Cable 12v-30 amps OPC-077

Also is there a mod available to get general coverage TX ???

Please feel free to reply to my email.

maleaton@bigpond.net.au

My Kindest Regards to the Group.

73 De VK3UME

I have for sale a very nice condition 51J-2 receiver. The front panel is cosmetically about a 9 of 10 and not a repaint. The receiver has the correct band change knob and meter but no top cover. The receiver has the Lankford product detector mod and performs GREAT. Pictures available to interested buyer. $450 plus shipping from 76001.

I have for sale a very nice condition 51J-2 receiver.
The front panel is cosmetically about a 9 of 10 and not a repaint.
The receiver has the correct band change knob and meter but no top cover.
The receiver has the Lankford product detector mod and performs GREAT.
Pictures available to interested buyer. $400 plus shipping from 76001

It's been my experience that used transceivers which are still in
production maintain a high percentage of their selling price, and then
only begin to fall after the model is discontinued. If you want a
current model, and the G707A is a nice radio, pay the few extra dollars
and get a new one,in the box, with a warranty. You sound like the type
of guy who wants to buy a top quality rig at bottom dollar, and I can't
fault you for it, but buying a low priced current model usually invites
problems from someone who mistreated it or powered it once from 240 volts.

Ben K wrote:

I have for sale/trade IC-703 qrp HF radio. It looks like IC706, but it is only 10W with a build in AT.   It is in new condition, less than one month old. I am asking $500 plus shipping or trade for all mode VHF/UHF base radio that is also in good condition. I am located in west central Ohio. I can be reached at 419-675-0747 or via email, k8rb@arrl.net

73, Stan, K8SRB.

I have for sale a very nice condition 51J-2 receiver.
The front panel is cosmetically about a 9 of 10 and not a repaint.
The receiver has the correct band change knob and meter but no top cover.
The receiver has the Lankford product detector mod and performs GREAT.
Pictures available to interested buyer. $400 shipped to Continental USA.

I have for sale a very nice condition 51J-2 receiver.
The front panel is cosmetically about a 9 of 10 and not a repaint.
The receiver has the correct band change knob and meter but no top cover.
The receiver has the Lankford product detector mod and performs GREAT.
Pictures available to interested buyer. $400.

Since you advertised it for $400 Shipped when you first listed it, $350 PLUS
shipping is hardly a reduced price.

That old boat anchor would hold down a blimp and will probably cost more than
$50 to ship if packed as it should be.

Good luck! Great receiver however!

Michael wrote:

> I have for sale a very nice condition 51J-2 receiver.
> The front panel is cosmetically about a 9 of 10 and not a repaint.

> The receiver has the correct band change knob and meter but no top cover.
> The receiver has the Lankford product detector mod and performs GREAT.
> Pictures available to interested buyer. $350 plus shipping from 76001

Looking to Sell/Swap the following:

Motorola Radius P-100 VHF Handheld - Model:H43QPU7120BN 2 Channel, DTMF Keypad, 150.8 through 162.0 MHz... Hi/Lo Power selectable from top-mounted toggle switch Currently on 151.680 and 158.755 MHz.. Good Cosmetic Condition - No engraving on case or battery - Paint Dots on top for power position (high), Channel (2) and Squelch Position (Speaker Off Icon) - With Screw-In Rubber Duck; also in good cosmetic condition.

Motorola Desk Top Drop- In Battery Charger Model:NTN4881B
Motorola Battery: 10V NiCad - Model: NTN5451B Battery does not hold a charge.

$50.00 plus shipping

****

Motorola Drop-In Charger: Standard Charger HTN9046B - 16 hour charge cycle. With Motorola Wall Wart Model ICC-6-375 - 18 VAC @ 1.8VA $20.00 Plus Shipping

****

(2) Regency Desktop Battery Chargers - Model: BC-45.... Output 12.8VDC @ 1 Amp MAX. With Charge and Ready Indicators - $25.00 each - Plus Shipping

****

(8) New Relm Replacement Antennas for Relm WHS-150 VHF Handheld. Approximately 6" Tall and 3/8" OD $10.00 each

****

(2) New BP007 Batteries for Relm WHS-150 - Still in plastic wrapping.. 10.8 VDC @ 700 mAh Nicad Battery. $26.00 each Plus Shipping

****

(1) Relm WHS-150 - 5 Watt - 16 Channel VHF Handheld transceiver, with belt clip and BP007 10.8 VDC @ 700 mAh Nicad Battery. With Programming Manual copy. Field Programmable. Scan, Priority, Tone Squelch, Hi/Lo power selectable, DTMF Keypad - With Wall wart charger (needs new wire and coaxial end. Charger works, and has sufficient pigtail to connect new charging cable. Battery seems to be good - holds a charge and lasts well under the moderate usage I have given it - coaxial jack inside battery is loose and has to be manually aligned before inserting charger plug. (I have been charging it with an old Alinco HT Charger). Mis-matched Volume and Squelch knobs. Includes 3 new display panel trim pieces and 2 new Channel knobs. Perfect HT for those times when you want a Type Accepted rig that can go down to ham freqs, while still covering Marine VHF Band or VHF Business band needs. (See new batteries listed above). $150.00 Plus shipping

****

(1) GE "Spring Whip Antenna - 132 -174 MHz - NIB box with Cutting diagram for tuning to your frequency in this range. GE Part Number: 19B219888P1 $10.00 Plus Shipping

****

(2) Relm Model RFH252NB - 2 Channel VHF Mobiles. (tested at 20 to 22 Watts out on Bird 4304A) Currently on (radio 1) F1=154.370 MHz, F2=155.385 Mhz - (radio 2) F1=158.760 MHz, F2=155.805 MHz.. With Brackets, Power Cords and Mics and Manuals $45.00 Each Plus Shipping

****

(1) Relm RH256NB - 16 Channel - Keypad Programmable Mobile (Has problem in output - There are two 1 uH Chokes that are charred (Relm Part Number 1803-3268-210) - With Bracket - No Mic - With Instruction Manual and Copy of Programming Manual. $40.00 Plus Shipping

****

(2) Keypads for RH256NB Mobile - NOS repair Parts - $10.00 each Plus Shipping

****

(4) Relm Model SLV40 - 6 Channel 40 Watt VHF Mobile Transceivers - Programmable

2 are in the original box and packaging with New Power Cable, New Microphone, New Bracket, Manual, New Speaker (Radios do not match the serial number on box - look used, but in great shape and seem to be working properly.. $75.00 each Plus Shipping

On the other 2 :

1 has Mic, New Power Cable, Bracket, Manual - No Speaker $60.00 Plus Shipping

1 Has Bracket and Power cord only - No Mic, No Speaker, No Manual $45.00 Plus Shipping

****

(1) Relm SLU25 - 6 Channel - 25 Watt UHF Mobile Transceiver - Programmable - With used Bracket and Power Cable - No Manual, No Mic, No Speaker $55.00 Plus Shipping

****

(1) Relm Model SMV4099 - 99 Channel - 40 Watt VHF Mobile Transceiver with Instruction Manual - Programmable - Display has some segments out - New Display repair part included - $100.00 Plus Shipping

****

(7) Relm PT46B - Handheld UHF, 6 Channel, 4 Watt Transceivers with BP700 (7.2 VDC 700 mAh) Battery pack , Belt Clip and Antenna. $55.00 each Plus Shipping

****

(5) Relm PT46B - Handheld UHF, 6 Channel, 4 Watt Transceivers with Antenna - no battery, no belt clip... $35.00 each Plus Shipping

****

(8) Relm PT56B - Handheld VHF, 6 Channel, 5 Watt Transceivers with BP700 (7.2 VDC 700 mAh) Battery, Belt Clip and antennas - $50.00 each Plus Shipping

****

(6) NEW BP700 (7.2 VDC 700 mAh) Battery Packs - Still in original packaging $30.00 each Plus Shipping. (these will be offered with the 5 PT46B units that don't have batteries first, then made available as spares.

****

On the units that come with batteries - Most of the batteries are holding charge. Out of the lot of 18 used batteries; 2 wouldn't hold a charge, 3 didn't hold up to sustained use after the initial charge (I am cycling them now to see if that condition improves) and 1 had one of the plastic "slide rails" broken. I haven't tried to actually duplicate usage over a sustained time, but can confirm that none of the batteries have gone dead sitting after being charged in a 5 to 7 day period.

These HTs are programmable, hi/lo power switchable (mechanical), Tone squelch and , busy channel lockout options. All seem to work OK. Good overall cosmetic condition; some have IDs painted on them, non have any engraving on the case or batteries (that I have seen).

I have one (1) charger with the lot, and it will go when all are spoken for. It is a Relm Model BCS Battery Charger and it uses a wall wart that outputs 12 VDC @ 80mA. It is a drop in desktop base with detachable wall wart. Looks a lot like an old Icom charging base, but I am not sure of the contact positions being correct of the voltage requirements being the same..

I also have one of each that have bad internal Speakers. I have them patched with a temporary fix, but don't know how long it will last. They are available without battery or belt clip for $30.00 each Plus Shipping

When the smoke clears, I may have some extra belt clips for the ones that don't show them included..

****

BK Precision - Model 820 Capacitance Meter - Manual Ranging Capacitance Meter 4 Digit LED Display, 10 Ranges 999.9pF to 999.9 mF. Battery operated by 4 "C" cells - provisions for AC adapter operation, or for use with NiCad batteries. Capacitance meter only; no NiCads, Charger/AC Adapter or Manual. Seems to be in good operating condition. $50.00 shipped CONUS

****

BK Precision Model 1500 - 100 MHz - Quad Trace Oscilloscope with Instruction Manual, Schematic Diagrams and Parts Lists. Unsure of actual Vintage - Schematic and Parts book shows 1981 printing date. $150.00 plus shipping.. No Probes included

Features:

*Small and compact with high 5 mV/div sensitivity and 100 MHz bandwidth (1mV/div when X5 GAIN function is used and 500 uV/div for cascaded operation, CH1 to CH2).

*Bright 150 mm rectangular CRT with an internal graticle and a 16 kV accelerating potential.

*Vertical axis is capable of single, dual as well as 4-trace display.

*Dual sweep with independent A and B sweeps is provided in addition to single sweep. X10 magnification, delayed sweep and alternating sweep capability.

*Fast 20 ns/div sweep speed (2 ns/div with 10X magnification).

*A switching type power supply provides stable operation with varying power sources.

*A convenient channel 1 sampling output is provided.

*Gate signal outputs for both A Sweep and B Sweep are provided for use in synchronizing peripheral equipment to these sweeps.

*A convenient beam finder allows you to quickly locate elusive traces.

*Logic controlled switching and LED lighted push-button switches provides easy, reliable switching with setting hold capability when the instrument is switched off.

*Selectable 50-ohm termination for channels 1 and 2. No external terminations required when using 50-ohm input signals.

****

BK Precision Model 177/V-95 Vacuum Tube Voltmeter. With Instruction Manual and Parts List / Schematic Diagram. With BK Precision AV-2B High Voltage Probe. $40.00 plus shipping

****

****

BK Precision Model 2009 MTS TV-Stereo Generator - $45.00 Plus Shipping

****

Data Precision Model: 1455 - Bench Muiltimeter with AC or Rechargeable Battery Power options. Battery holding charge. $30.00 Plus Shipping

****

Data Precision Model: 258 Multimeter - Rechargeable - with leads and charger - Needs display $5.00 plus shipping

****

(8) AIM 15-5010 Coaxial Switches - Push button model designed for 2-75 OHM inputs to one TV Set Antenna system and cable system to one TV Set. 90 dB isolation. Push a button to change Signal Source. For VCR - CATV - MATV - TV - All "F" Connectors. In original plastic Bag with Double Sided Tape and Mounting Screws.. $5.50 Each Plus Shipping

****

ATV Research - Micro-Verter II RF Interface. Tuning Range Channels 7 - 10. Factory Set to Channel 7. Rear-Mounted "F" connectors for: Audio In, Video In, RF Out. 110 VAC Operated.. $35.00 Plus Shipping

****

ATV Research - Micro-Verter III Television Modulator. Factory Set to Channel 5. Front access to trim-pot based Level Controls for Audio,

Subcarrier and Video. Rear-Mounted RCA Phono Jacks for Audio In and Video In - Rear-Mounted "F" connector for RF Out. 110 VAC Operated.. $50.00 Plus Shipping

****

Listing will be revised and updated as items are spoken for. Still have more to add... I will be taking a load to the Jacksonville, FL hamfest in October, listing on Newsgroups until then.. Thanks for reading

If these prices are not reasonable, please let me know, with a link to current pricing for these models in the used market.

Shipping to be paid by buyer. I will pack these items myself, so Shipping will be actual costs - or costs estimated from on-line calculator based on shipping weight and container size to your Zip Code. I will not be using a drop-off shipping depot, so shipping will be as reasonable as I can make it.

I can accept PayPal, money order, or personal check (personal check will delay shipping until check clears). I can provide references in the form of eBay feedback. I have been buying and selling in the newsgroups for at least 5 years; on CompuServe and fidonet for 5 years before that.

I would consider swapping for high-end Nextel cell-phones; Current models or late models that are clear for activation. Other consideration given for good quality PDA and accessories that can be used for mobile data logging or data acquisition. Other electronic items considered for trade.

From you description, it doesn't look like you would be able to program this to amateur or ham bands.

Hi,

I have a Radio Shack Pro-89 race scanner for trade it has 200 memories
etc, covers 29Hmz - 900Mhz some gaps, email me for the specs. I was
wanting to trade it for a Realistic DX-394 / TenTec 1254 kit or built
or any other simillar receiver with SSB and a PPL VFO section.

You might try http://groups.yahoo.com/group/RADIOSHACKDX394/ to find a
willing trader or for info sharing should you get a DX-394. It has 434
members and has a sibling group of 66 members with an interest in

computer control.

I recently purchased an alinco 590 and failed to get a user manual. So
far I have felt my way through the programing except I don't know how
to set the memory so I can change frequencies on the mic instead of
pushing a small bar on the face of the radio which is kinda hard when
driving. Thanks to anyone who can help. e-mail kbirdsong@txucom.net

I want to get into amateur radio but its hard and I really have no
clue who to go to for advice in North Carolina. I have looked online
and taken the online practice tests and read up on the
classes/specifications/etc. but its hard to learn without some
guidance.

So I was wondering, does anyone know any place where I can receive
help, or at least minimal guidance and a test taking place to receive
a license in Eastern North Carolina (Or anywhere in NC, VA, SC)?

Thanks,
Emosion

Check the ARRL site and W5YI site for clubs in your area. (www.arrl.org or
www.w5yi.org).

Try a web search for ham radio and include the name of the nearest city.

ham radio cityname
     OR
amateur radio cityname

That's a good suggestion. I would go further and recommend visiting http://www.qrz.com/i/names.html for a name search. From there, you can enter your town, and state. Or better yet, enter your zip code. This will list all the hams who live in your neighborhood. Pick a few, and give them a call. I'm sure you will find one or two who may be willing to help, or at least point you in the right local direction.

Here's a story for you. I use a local repeater quite frequently. One day, I got an email from someone who heard me on their scanner tuned to that repeater. He looked up my call, and found my email on the internet. He was looking for help and guidance just like you. He is now an extra class operator. And we are pretty good friends now to boot.

Good luck, it's a great hobby, and you will have many different avenues to choose from to fulfill your ambitions.

73,

Rick

rec.radio.amateur.swap:4631 rec.radio.swap:95326

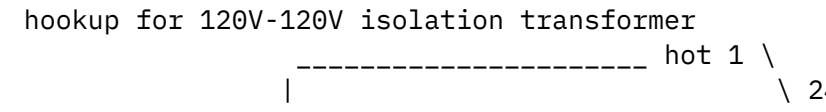
I am looking for a 120V to 120V isolation transformer, or a dual voltage unit, does not matter as long as it will handle at least 2KVA and as much as 3.5KVA and do 120 in 120 out, 60 Hz.

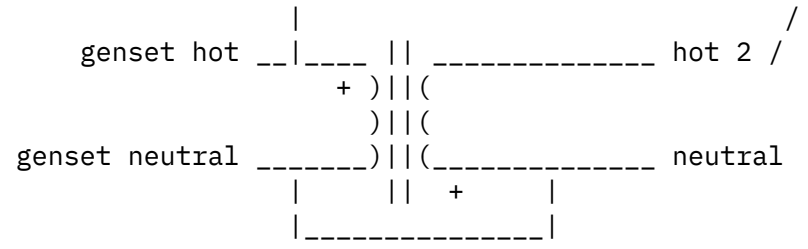
Proposed use is to connect to a 120VAC gasoline driven generator set, and thereby obtain 240VAC by 'stacking' the isolated 120VAC under the generator's 120VAC.

I have also been told that a 120 to 240 VAC center tapped transformer would do the job.

If you think you have something suitable to sell reasonably, and are within perhaps 100 miles of Dallas Texas, please let me know. hi-resolution images are welcome.

"best viewed with 'courier new' font"





I have posted to several groups, and can't always check all of them, so please reply to me.

-- Be sure to take away the "nounwantedemail" part of the email address, to reply to me please.

That would be neat to have happened. I found a local radio club in my
home town that I didn't even find anywhere else. I will visit them
very soon, indeed. So many people from my town as well! Thanks a
lot!

Paid $230 new from HRO.   The cabinet matched my TS-450/SAT radio.   It is
13.8v 20 Amps, 110v source.   AES recently listed a used one for over $170.
Will sell for $125 plus shipping.

An old timer that still does a remarkable job; but, I've sold all of my
Kenwood radios. Has a piece of plastic broken on one side of the upper
bracket, does not affect the quality of the microphone.   Take $40 plus
shipping.

I just bought an azden pcs-3000. It needs a new mic though. If any
one has one
I could bu it or trade for it. I have some vintage computers and odd
stuff. A couple of terminals you could use for packet. Also a Old
laptop that would be perfect for packet.

A NIB pair of Tung-Sol black plate 2A3's that tested 74 (Min. 38) on TV-7/U.
Insurance required for shipment.Great for audio ham applications. Have other
2A3's coming + single plate too.

See above at ebay under seller heytubeguy or 2A3

>I am looking for a 120V to 120V isolation transformer, or a dual voltage unit,
does not matter as long as it will handle at least 2KVA and as much as 3.5KVA and
do 120 in 120 out, 60 Hz.
>
>Proposed use is to connect to a 120VAC gasoline driven generator set, and thereby
obtain 240VAC by 'stacking' the isolated 120VAC under the generator's 120VAC.
Wouldn't it be a lot easier just to modify the regulator so the field coil
of the generator is twice as high, rather than dicking around with stepping
up the stuff coming off the armature? Be a lot easier just to start out with
the higher voltage to begin with.

I am looking for a set of Celwave 633-6A-1 Mobile Duplexers. This model operates in the 406-450 MHZ range.

Email,

wb5tty@hotmail.com

Thanks,
Anthony Mikulastik, WB5TTY

If you watch you can get ones in mint condition on eBay. Granted some
are going for a very high price but an equal amount are going very
cheap. I recently bought two, one for $249 + 10 s/h and one for $223 +
15 s/h. Both were in perfect condition.

I paid $249 for my Uniden BC780XLT at the Uniden store:

http://www.uniden.com/docs/store/itemlist.cfm?cattype=prd&prodcatselect=3

They call them referbished but mine was for all appearances brand new,
in fact thats what they tell you. I just checked and they are back
ordered but if you place your name on the waiting list it will come up
before you know it, just hold your horses for a while. You can continue
to check you status in line anytime you want.

Good luck
Dale, K9VUJ

I have a HP 410B VTVM. No, it does not have the tube in the AC probe. I wish
it did! It is in good condition.

Tubes light up and seems to work fine. Probes/wires are showing their age,
plastic from ohms probe gone. I hate to leave it laying around. I don't use
it. $20 plus shipping. USPS from 62521. I'll have to weigh it. It is not
light!

Email me please. If I don't get a good offer I'm going to throw it away!

Compaq LTE5400 laptop, P150MHz, 32 MB RAM, 2 GB hard drive, sound, color, Windows 98 is on it. Nice basic laptop. Battery won't hold charge for long. I was using it in my kid's room. Has floppy but no CD. I will throw in some kind of PCMCIA modem if you want it. Price is $85 shipped & insured (shipping and insurance would be $25!), OBO.
Need money for car repairs. Prefer PayPal.
Please email me. Thanks.

Yaesu VX-1R dual band & wideband receiver/scanner handheld in great condition. Li 750 mAh battery, AC adapter, and manual. Will throw in (2) four conductor plugs to make a data cable and audio cable; a copy of the programming software; and a dual band mag mount with SMA-BNC adapter.

This is a versatile radio, see:

http://www.icongrp.com/~sllewd/vx1rmain.htm

Will do cross band split, cell, free band, MARS/CAP. Has desirable A105 firmware. I hate to sell but need the money for car repairs.

Price is $95 shipped and insured, OBO. Prefer PayPal.

Please email me.

Compaq LTE5400 laptop, P150MHz, 32 MB RAM, 2 GB hard drive, sound, color,
Windows 98 is on it. Nice basic laptop. Battery won't hold charge for
long. I was using it in my kid's room. Has floppy but no CD. I will throw
in some kind of PCMCIA modem if you want it. Price is $85 shipped & insured
(shipping and insurance would be $25!), OBO.
Need money for car repairs. Prefer PayPal.
Please email me. Thanks.

I have a good working ICOM IC-03AT HT 220 MHz radio. Front and top are very clean, back of rig has wear from holding it. Comes with rubber duck, belt clip, wrist strap, manual, box and super BP-8 battery.

Asking $90 + shipping

Roland, NK2U

Hi all. Im looking for a Icom R-71A or Kenwood R-5000 so Im letting these go to fund it or make a trade. These are both real nice radios in working condition. S.H. from 55992 in Zumbrota, MN

The SX-9. Made in 1935-36. Is as close to perfect cosmeticly as you would hope to find. Restored front panel. The cabinet is the original wrinkle finish that has been cleaned and clear coated. Receives on all bands except Band 5 20mhz on up is very weak. A little tweaking may bring it alive. It needs the 6F5 tube for the 1st Audio. Somebody put a 6K7 in? This should

improve the performance of the set. I don't have one in stock or I would have replaced it. The AVC circuit seems funny. Havent had time to check into it. May need a new tube? All caps have been replaced. The radio is as nice as they get. Just needs a tuneup and minor work. $300 firm. + S.H.

http://home.jps.net/~jonnysocko/sx9b.jpg
http://home.jps.net/~jonnysocko/sx9c.jpg
http://home.jps.net/~jonnysocko/sx9d.jpg
http://home.jps.net/~jonnysocko/sx9e.jpg
http://home.jps.net/~jonnysocko/sx9f.jpg
http://home.jps.net/~jonnysocko/sx9g.jpg

The SX-23. Made in 1939. Is very nice cosmeticly and works very well. Great cabinet and original lettering. It has some scratches that are not very noticable. I restored the finish and repainted the dial. It is a real beautiful radio. It was modified at one point in its life by the evidence of two extra tube socket holes. I had to rewire the power supply and audio section. It has a replacement filter choke as seen in the pics. I used a differant audio output transformer. The original was gone Easily replaced if you want to go back to the original 500/5000ohm out. It could use an h logo cover on the power trans to spiff it up. I replaced all the caps and the hard to get at ones in the RF deck and several resistors. I installed new dial string on the main dial,band indicator and A.N.L. switch. It needs a meter that swings in the opposite direction. The one in it is all I had. It works. Just a left shoe on a right foot. The radio will probably need an alinement but its very sensitive and WWV was right on 10mhz. It will need the band change and selectivity knob(Like on an SX-28). The ones on it are Hallis but there not right.The earphone jack will need to be wired into the circuit. Its all there I just got lazy. By the way its a very nice sounding radio. It will need the original 455khz Xtal filter that plugs in the socket. I have the main dial plastic for it but its warped. Its the same as the S-20R or SX-25 etc.. Real easy to duplicate. i paid $200 for the radio and did a lot of work on it so I was hoping to get at least $265 +S.H. to cover the parts and work Ive done.

I am looking for a basic Timewave PK232 Terminal Node Control (TNC) to
support AMTOR ARQ, AMTOR FEC, Pactor ARQa and Pactor FEC. Unit should be
tested to know it is in working order. Also need manual.

Nye Viking MB-V-A 5KW Antenna Tuner in truly excellent condition. The unit worked flawlessly before I moved to FL and has been stored in my (air conditioned) closet for 4 years. I am selling it for $475 as-is, shipped.

Thanks and very 73,

Jim K9RII

Selling an RF Concepts 2 meter all-mode amplifier RFC 2-417 in truly
excellent condition in the factory box. This amplifier worked flawlessly
with my IC-970H before I moved to FL. It has been stored in my (air
conditioned) closet since that time. I will sell this amplifier as-is for
$195 shipped.

Thank you and very 73,

Jim K9RII

I was trying it w. a 10W (out) 75M AM rig & the 811As show color quickly,
their sum dissipation being 130W vs. 572B's 320. Not good.

Personal experiences?

  tnx,

    Marty AA4RM

Not even the same tube. Look at the specs on the amp and I will bet
that you can/should not use anything but 572s in the system. I think
you would need to change the bias to get them to work. Look around and
see if anyone has moded your amp for 811s as a thought.

Good luck, John W5CGU

Hello Martiiiiii....The 811a is spec'd at around 1800v whereas the 572B is around 2400. Thus the SB200 will put way to much 'E' on the plates.   Thus the 'red' problem.

How u been old boy?

Dan/W4NTI

OK, ok... maybe I shud ask if anyone's got a SINGLE 572B out there

I have 1 Cetron that tests 25 on the scale of 36. 36 is 'normal'

on a TV-7U checker set for 811s

  Tnx,

   Marty AA4RM

I have excellent quality 13 resonator ceramic filters for sale. they
are rated at 6/12.5K at 6/60db. complete specs at
http://www.componex.de/deutsch/produkte/keramikfilter/lf-d.htm

I can also send actual graphs of the measured selectivity.
they cost $18/pair including shipping.

811A's are not going to handle that kind of plate voltage for very long.

Hello,

WA7SON here. Just wondering if Embedded Research is still in business
selling the TICK series microprocessors, ie, the keyer chips?

I have sent them a couple of messages regarding their chips, but they
havent replied. The site is up and running, but apparently the only way
to get hold of them is via email.

Any information would be appreciated.

Thanks,

Bob/WA7SON

TM-D700 & TH-D7A(G)

I have the listed rigs in excellent condition. The H/T comes with the PB-38
& PB-39 batteries. Both radios will be shipped in original boxes with
original manuals. Looking to trade both for a Drake R8B in as new condition,
or HF rig (i.e. FT-897, Icom 7060MKIIG, IC-746...no QRP please) general
coverage transceiver. Also have an Alpha-Delta VRC active speaker (in as new
condition)that I can throw into the trade if necessary.

Additionally, will sell both for $825 + shipping

Please e-mail off list if interested & thank you.

John Schneider

Looking for a 23 CM mobile rig. Doesn't have to be
monoband, can be dual 70cm/23cm if you have one.

I was looking particularly for a Kenwood TM-541
or even a TM-833s (I don't know if those were even
sold in the US, or even at all, I just came across the picture
at http://www.rigpix.com/kenwood/tm833s.htm)

or even a Yaesu FT-6200 would be nice.

Please let me know rig model, condition, must be
fully operational (100%), few scratches ok.
Prefer nice cosmetics. Don't we all? :) Doesn't
have to be perfect but will consider all. Pics would
be great if possible.

Thanks!
Remove "nospam" to reply direct please.

Hello Group,

Anyone with a new or good used Weller W60P Soldering Iron for sale? Please let me know if you've got one you can let go of.

Thank you,
David

I have forsale a Ten Tec paragon, physical the condition is a 7 of ten, it
is missing a trim side panel, very minor. It occasionally displays a pll
error on startup, but function is flawless. I am selling because I have
limited room and would be best if this fine rig could serve someone else.
  This is a great cw rig and a good voice rig.
I'm good in the call book and am a member of qrz's site, where this rig is
also listed forsale.

Thanks 73

Hi Everyone,

I am in the market for an FT-817 preferably with all the standard accessories (and maybe a filter or two). If anyone has one they are looking to unload, drop me an email with your price!

Thanks,

Ryan Kingsbury

Hi all

Was wondering if there is anyone out there who can help? I have just purchased a 7 element ATN 18-30-7 log periodic that covers 18-30Mhz. I believe there is another ATN aerial with the same boom length of 6 metres that covers 14-30Mhz. I was hoping someone with one of these beasts could advise the element lengths etc so i can convert mine to cover 20metres. I assume i will need to rearrange the elements, drill alternate mounting holes and change some element lengths and make some crossover straps for phasing harnesses but thats just a formality. My aerial comes with a diagram of the element lengths etc so was hoping someone could scan and send. I could start from scratch and try and design a unit but this would save me a heap of time. It appears that ATN is long gone. Any help would be greatly appreciated. I have quite a collection of amateur radio related service manuals in pdf and or jpg format so maybe i can return the favour.

email for reference is tstone12002@yahoo.com.au

Thanks in advance.
Cheers
Tony

Nice clean Kenwood TS-50 that I used in my motor home, which is being sold. Current new price is $650.00 and I'll let this one go for $450.00 o/bo plus shipping. Radio is modified for MARS.

I also have the AT-50 Tuner that goes with it; but, its not working properly. It sells for $329.00 and I'll sell it with the TS-50 for an extra $100 plus shipping..

Tom

Mint condition Kenwood TS-450 SAT to be mailed in original box $650.00
plus shipping.

Matching TS-53 Power Supply can be included if bought with the radio for
another $125.00 ---most of these sell for about $175 used.

And if you buy both of the above I will include the 'matching' external
speaker as a bonus. .

Radio has extra filters and is modified for MARS.

I bought a new Yaesu FT1000MP and even though its a great radio, the Kenwood
TS-450 SAT with its filters hangs right in there with it under the bad
conditions we've had this past month. Its a great radio.

This QRO amp is fabulous and in mint condition.   It has 2 SVETLANA 4CX800A tubes, a huge power supply; and it is warranted to run max limit output all day with the key down. Can be easily adjusted for any power output. Has been configured for 10M. Full details are at the QRO homepage http://www.qrotec.com/

This QRO legal limit amp sells new for $3145.00 w/QSK plus shipping. Asking $2500.00 I will ship and include 2 extra 4CX800A tubes.   I've never needed to replace

one; but bought these direct from Russia on ebay as a backup if I needed them.

Reason for selling, I have an Alpha Power 87A amp.

AOR AR900 Handheld scanner with Radio Shack scanner antenna, and small

Li-Ion 6V batt.
Scanner always shows low batt, even when hooked to power supply. The battery cover clip is also broken, but is intact. The receiver is fine, works well.
Comes with wall charger and original hard leather case.
Features include:
100 channels
search mode
channel lockout
delay
AM & FM modes (user selectable), unlike the new handheld scanners.
27-54mhz
108-174mhz
406-512mhz
830-950mhz (no gaps)

Serial#7395

FS: Like New Icom IC-775DSP

This radio was a backup to my IC-781 and has had very little use. It looks
like a new unit. The serial number is 01637 and it has at least one optional
filter and one other optional accessory (the high stability crystal
oscillator, I believe). I am asking $1995, shipped in continental United
States. Thanks and 73!

Jim K9RII

$225 plus Shipping

IC-T81A Specifications

email km5bh at earthlink.net

This information is taken directly from the IC-T81A/E brochure

General
Frequency coverage (Unit: MHz)
50 MHz 144 MHz 440 MHz 1.2 GHz WFM (not guaranteed)
Rx/Tx:
50 - 53.995 Rx:118-173.995*1
Tx:144-148 Rx:400-469.995*2

Tx:430-450 Rx/Tx:
1240 - 1300 Rx:76 - 107.995

⋆1 Guaranteed 144-148 MHz only; ⋆2 Guaranteed 440-450 MHz only;
Mode: FM, WFM (Rx only), AM (Rx only)
Number of memory channels: 124 (100 regular, 20 scan edges, 4 call)
Frequency stability: ± 3 ppm (-10°C to +60°C;)
Useable temperature range: -10°C to +60°C;, +14°F to +140°F
Power supply : 4.5 to 16 V DC or specified battery pack
Current drain (at 13.5 V DC):
Tx: maximum power: 1.4 A (0.8 A at 1200 MHz)
Rx: rated audio: 220 mA (typical)
power saved: 40 mA
standby: 70 mA (90 mA at 1200 MHz)
Tuning steps (kHz): 5⋆, 10, 12.5, 15⋆, 20, 25, 30, 50, 100 (⋆not available for 1200 MHz band)
Antenna connector: SMA (50 ohm)
Dimensions (projections not included):
58(W) x 106(H) x 28.5(D)mm
2-9/32(W) x 4-3/16(H) x 1-1/8(D)in
Weight (approximate, with antenna):
290g; 10.2 oz (with BP-197)
270g; 9.5 oz (with BP-199)
280g; 9.9 oz (with BP-200)

Transmitter
Output power (at 13.5 V DC):
High: 5.0 W (1.0 W at 1200 MHz)
Low: 0.5 W (0.1 W at 1200 MHz)
Modulation system: variable reactance frequency modulation
Max. frequency deviation : ± 5 kHz
Spurious emissions : Less than -60 dB (-50 dB for Europe version at 1200 MHz; -40 dB for others at 1200 MHz)
External mic connector : 3-conductor, 2.5(d) mm (1/8")/ 2 k ohm

Receiver
Receive system: Double conversion superheterodyne
Intermediate frequencies:
1st: 69.45 MHz (13.35 MHz: WFM)
2nd: 450 kHz
Sensitivity (except spurious points):
FM 50 MHz=0.18 µV, 144 MHz=0.18 µV, 440 MHz=0.18 µV, 1.2 GHz=0.25 µV
AM 50 MHz=0.56 µV
WFM 91.5 MHz=2.0 µV
Squelch sensitivity (threshold):
0.18µV (FM; 0.25 µV at 1200MHz)
5.6µV (WFM)
0.56µV (AM)
Selectivity (except WFM):
More than 15 kHz/-9 dB
Less than 30 kHz/-60 dB

Spurious and image rejection ratio:
50, 144 MHz: Less than -60 dB
440 MHz: Less than -50 dB
1200 MHz: Less than -50 dB
(Except half IF, 2nd image, 50 MHz band IF and WFM)
Audio output power (at 13.5 V DC): 250 mW typical at 10% distortion w/ 8 ohm load (at 13.5 V DC)

Supplied Accessories
Battery pack
Wall charger
Antenna
Belt clip

For Sale

Icom IC-W32A

2m/70cm Handi-Talkie

Specifications:

Dimensions: 2.25 (W), 5.5 (H), 1.4 (D), 16 oz
5 Watts of power @ 13.5 V
200 memory channels
8 character alphanumeric memory channel identification, keypad entry
Backlit display and keypad
ICOM rugged! Meets MIL SPEC C/D/E for shock and vibration
Handheld to handheld cloning capability (opt. OPC-474 cloning cable) or PC programming capability (opt. CS-W32 cloning software and OPC-478 cloning cable)
Independent band controls for tuning and volume
VHF/UHF exchange function allows assignment of VHF/UHF band controls to either knob
Set your preferred band to the knob furthest from the antenna

Two Years old and in good shape. Factory box and manuals included.

Lots of Extras

SPECIFICATIONS

GENERAL 0
RX Frequency Range: 100 kHz ~ 30 MHz
TX Frequency ranges: 160 ~ 10m amateur bands only
Freq. Accuracy: <±5 ppm (except FM ±100 Hz)
Freq. Stability: <±2 ppm (0 °C ~ 50°C) (except FM ±200 Hz)
0 <±0.5 ppm (-10°C ~ 60°C) w/TCXO-1 (FM ±150 Hz 0°C ~ 50°C)
Emission Modes: LSB, USB (J3E), CW (A1A), FSK (J1D, J2D), AM (A3E), FM
(F3E)
Basic Frequency Steps: 10 Hz for J3E, A1A and J1D
0 100 Hz for AM and FMA3E, F3E and J2D
Antenna Impedance: 16.5 to 150 Ohm, 50 Ohm nominal
0
Supply Voltage: 100, 110, 117, 200, 220 or 234 VAC, 50/60 Hz
Power Consumption (approx.): 95 VA Receive, 1050 VA for 200 watts transmit
Dimensions (WHD): 420 x 150 x 375 mm
Weight (approx.): 51 lbs. (25.5 kg.)
0
TRANSMITTER 0
Power Output: adjustable up to 200 watts (50 watts AM Carrier)
Duty Cycle: 100% @ 100 watts, 50% @ 200 watts (FM & RTTY, 3-minute TX)

Modulation Types: SSB: Balanced, Filtered Carrier
0 AM: Low level (early stage)
0 FM: Variable Reactance
0 FSK: Audio Frequency Shift Keying
Maximum FM Deviation: ±2.5 kHz
FSK Shift Frequencies: 170, 425 and 850 Hz
Packet Shift Frequencies: 200, 1000 Hz
Harmonic radiation: at least 50dB below peak output
SSB carrier suppression: at least 40dB below peak output
Undesired sideband suppression: at least 50dB below peak output
Audio response (SSB): not more than -6dB from 400 to 2800 Hz
3rd-order IMD: -36 dB @ 150 watts PEP, -31 dB @ 200 watts PEP, or better
Microphone impedance: 500 to 600 Ohm
0
RECEIVER 0
Circuit type: quad-conversion superheterodyne (triple conversion for FM)
Intermediate Frequencies: 73.62 and 8.215 MHz and 455 and 100 kHz

Sensitivity (For 10 dB S/N):
Frequency 100 ~ 250 kHz 250 ~ 500 kHz 0.5 ~ 1.8 MHz 1.8 ~ 30 MHz
    0
Mode
SSB, CW (2.4 kHz) 1.25 uV 1 uV 2 uV 0.25 uV
AM (6 kHz) 10 uV 8 uV 16 uV 1 uV
29 MHz FM (12 dB SINAD) - - - 0.5 uV

Selectivity (-6 / -60 dB):
Button Modes Min -6dB BW Max -60 dB BW
2.4 kHz all except FM 2.2 kHz 3.8 kHz
2.0 kHz all exc. AM, FM 1.8 kHz 3.6 kHz
500 Hz CW, RTTY, Packet 500 Hz 1.2 kHz
250 Hz CW, RTTY 240 Hz 700 Hz
- AM (Wide) 6 kHz 14 kHz

Sensitivity (For 10 dB S/N):
Frequency 100 ~ 250 kHz 250 ~ 500 kHz 0.5 ~ 1.8 MHz 1.8 ~ 30 MHz
    0
Mode
SSB, CW (2.4 kHz) 1.25 uV 1 uV 2 uV 0.25 uV
AM (6 kHz) 10 uV 8 uV 16 uV 1 uV
29 MHz FM (12 dB SINAD) - - - 0.5 uV

Icom W2A Dual Band HT, comes with everything but the box. This unit
has NOT been modified, and works great. It is a true dual bander, you

can monitor VHF/UHF at the same time. It does crossband repeat.
For more info, or if interested in buying please email direct.

$150.00 shipped con't US only!!

thnx
Lou

I have a Heathkit hw-8 that is in good shape. the face has a few marks near
the tuning knob and the case has a few light scratches. I am guessing that a
good cleaning would help!.
I keyed the unit once on each of the 4 band settings (3500, 7.000, 14.000
21.000) and it could be heard at my brothers house 1 mile way, on a longwire
with an antenna tuner.
This is for the transceiver only, no key, no speaker and no power wire.
There do not appear to be any of the "mods" done to this transceiver. I will
include an adaptor for RCA to BNC.

This appears to be a nice little qrp rig .....

I am willing to trade for SSB cb stuff....

Bob

FS: Like New Icom IC-775DSP
This radio was a backup to my IC-781 and has had very little use. It looks
like a new unit. The serial number is 01637 and it has at least one
optional filter and one other optional accessory (the high stability crystal
oscillator, I believe). I am asking $1895, shipped in the continental
United States. Thanks and 73!

Jim K9RII

I have a spare Ten-Tec Model 282 - 250 Hz CW filter (6.3 Mhz IF) for sale.
Works fine as I just tested it in my Delta 580 transceiver. Asking $55.00
plus shipping.

Hi all,

I am looking for an Icom IC-375. This is a 220 All Mode Transceiver.
Working or not. Send me an email if you or you know some one that has
one and "Lets Make A Deal"

73,
Chuck

W6PNC is getting rid of 30+ years of accumulated radio and electronic
gear--test equipment, receivers, transceivers, MITREKs, test sets, scopes,
meters, components of all kinds, cables, computers, and peripherals at a
moving sale on Saturday, June 21 from 1000 until the stuff is gone. Spread
the word.

Address is good in the Callbook, or respond to this Email

I'm looking for a EJ-12U tone squelch board for the DJ-F1T. If you know
where I can get one it would be greatly appreciated.

thnx
Lou

1-Motorola Compa-stations cabinet with 12v power supply installed along
Maxtrac power cable and mounting bracket.
1- GE Master-Exec empty radio cabinet.
I'm asking $150 OBO for both, pickup only. I'm 45 miles NW of Phila.

Local sales only. If I don't sell, I'll be taking them to the MARC Hamfest
next month near Phoenixville Pa.

Email direct only.

Lou

have forsale a drake mn-2000 tuner. this is a good working unit. case has
been repainted. knobs have scratches on them and there is a little paint
chip on the front panel.this is an early unit with the silver trim.this is
not a collectors unit but a good functioning 2kw antenna tuner 80-10m.
asking $160 plus shipping. John w3ayt@arrl.net

As Alinco as well as all German dealers I contacted do have no further
DJ-180 battery packs on stock, I herewith kindly ask if anybody can
supply me with either pack, the small or the larger one. Please send
me a mail at db1oma@darc.de. Thank you.

For Sale:

A voice synthesizer for a TS-940S. This came out of my working
TS-940S. Works very good. I had sold the radio and the person that
bought it did not want the synthesizer. I do not have the 4 screws for
it, but chances are the other radio will already have the screws to
set this up. Very easy to install.

Asking $55.00 plus shipping.

Can e-mail me at gary92027@cox.net

This device will iron out those fading SW signals.
Brookline Technologies VS301E Volume Stabilizer featuring adjustable
stabilization from 10:1 to 1:1, bypass switch, 3 colored LEDs. $50 plus
shipping via USPS Priority Mail. I'm located in Plano, Texas.

This item may be viewed at the following web site...scroll about 2/3 down
the page for an excellent photo. Of course you may want to read the review
also that compares Brookline Technologies to Sima.

http://members.fortunecity.com/swradios/svs1.html

Much credit to Dave N9EWO for the review and photo

Have forsale an Icom ic-765 xcvr with Sp-20 spkr and Sm-6 microphone.
765 is just back from Icom service for a tuneup and will furnish copy of receipt.
radio has 6 kc, 2.4 kc, and 500 hz filters. has pbt tuning mod.
have original manual and real nice copy of service manual plus alot of info copied from the internet and such. have all original packing boxes. asking $1100 for all. would rather have equipment picked up in phila. or will meet within 150 miles of phila.
765 has a 5xxx serial number. can also demo on air 160-10m. John

Hello,
  I know that many of us have a terrible time finding parts to repair
  our broken electronics, gadgets, cars, etc. Sometimes you can find the
  part, but then it's real expensive because it's from a manufacturer or
  big company. On the other hand, people with weird parts left around
  often find themselves being wasteful and throwing them away. Because
  of this, the guys where I work decided it was ok to open a site for
  people to post and find parts without being hassled.
  http://www.info-services.net/gpr
  It is called the Global Parts Repository. If you have some odd parts
  around, post them. If you have any suggestions or want to help with
  the project, please send me an e-mail. I hope people find will find
  this useful.

Mike

hello mike,
What you have done is a good thing and it will help lots of car owners.

I think a more detailed description of what you are thinking about doing would be in order...

Points like frequency, and types of transmissions would be helpful.

Honestly, I think it is easier to say what is legal or not when given an example situation, rather than just trying to find out the boundaries. There are soo many different legislations that they are sometimes hard to keep straight.

Can you give more information? It would help in getting your answer..

Hello. I saw your group on ham radios and wanted to relay to you info
on these old ham radio pieces (boatanchors) that I have in my garage.
The transceiver is a Globe Scout 680 (non) A. It belonged to my
grandfather. He was one of the original ham radio guys in the country.
His handle was WA3FMJ. My mother was looking to sell this radio and I
have no idea what it is worth. It is in fair to good condition and I am
pretty sure that it works, but I am sure it hasn't been turned on for
over 20 years so I have no way in knowing what the working condition is.
Also there is a Globe electronics 755 vfo & a tweeter that he used.
They are generally in good condition, except for the ac cords which can
probably be replaced pretty easily. I know he was still using these
things over 20 years ago. The knobs are in pretty good condition. No
manuals that I can see. I was thinking of listing all three items on

e-bay for about $100 + shipping. Does this sound about right for these items. I really am not familiar enough with ham radios to know what they are worth. Thank you!

Paul Bixler

FS: Kenwood TM-741A

This is a great FM transceiver and has performed flawlessly for me. It has the 200 MHz band unit, providing coverage on 2 meter, 220 MHz, and 440 MHz FM. It is in excellent (or better) condition. I'm asking $350 and will consider reasonable offers. Thanks and very 73.

FS Yaesu FT-2400H 2 meter FM Transceiver

This radio is truly mint and has had VERY little use. I bought it new for my son, who never really carried on with ham radio. I am asking $195 and will ship it within the continental US.

Thanks and 73,

Jim K9RII

Hello,
  We are now inviting people to post requests for parts on the Global Parts Repository. Be sure to use a negative number for the quantity. Soon, requests for parts will be separated from parts available.

IC-T81A Specifications

email km5bh at earthlink.net

This information is taken directly from the IC-T81A/E brochure

General
Frequency coverage (Unit: MHz)
50 MHz 144 MHz 440 MHz 1.2 GHz WFM (not guaranteed)
Rx/Tx:
50 - 53.995 Rx:118-173.995*1
Tx:144-148 Rx:400-469.995*2
Tx:430-450 Rx/Tx:
1240 - 1300 Rx:76 - 107.995

*1 Guaranteed 144-148 MHz only; *2 Guaranteed 440-450 MHz only;
Mode: FM, WFM (Rx only), AM (Rx only)
Number of memory channels: 124 (100 regular, 20 scan edges, 4 call)
Frequency stability: ± 3 ppm (-10°C to +60°C;)
Useable temperature range: -10°C to +60°C;, +14°F to +140°F
Power supply : 4.5 to 16 V DC or specified battery pack
Current drain (at 13.5 V DC):
Tx: maximum power: 1.4 A (0.8 A at 1200 MHz)
Rx: rated audio: 220 mA (typical)
power saved: 40 mA
standby: 70 mA (90 mA at 1200 MHz)
Tuning steps (kHz): 5*, 10, 12.5, 15*, 20, 25, 30, 50, 100 (*not available for 1200 MHz band)
Antenna connector: SMA (50 ohm)
Dimensions (projections not included):
58(W) x 106(H) x 28.5(D)mm
2-9/32(W) x 4-3/16(H) x 1-1/8(D)in
Weight (approximate, with antenna):
290g; 10.2 oz (with BP-197)
270g; 9.5 oz (with BP-199)
280g; 9.9 oz (with BP-200)

Transmitter
Output power (at 13.5 V DC):
High: 5.0 W (1.0 W at 1200 MHz)
Low: 0.5 W (0.1 W at 1200 MHz)
Modulation system: variable reactance frequency modulation
Max. frequency deviation : ± 5 kHz
Spurious emissions : Less than -60 dB (-50 dB for Europe version at 1200 MHz; -40 dB for others at 1200 MHz)
External mic connector : 3-conductor, 2.5(d) mm (1/8")/ 2 k ohm

Receiver

Receive system: Double conversion superheterodyne
Intermediate frequencies:
1st: 69.45 MHz (13.35 MHz: WFM)
2nd: 450 kHz
Sensitivity (except spurious points):
FM 50 MHz=0.18 µV, 144 MHz=0.18 µV, 440 MHz=0.18 µV, 1.2 GHz=0.25 µV
AM 50 MHz=0.56 µV
WFM 91.5 MHz=2.0 µV
Squelch sensitivity (threshold):
0.18µV (FM; 0.25 µV at 1200MHz)
5.6µV (WFM)
0.56µV (AM)
Selectivity (except WFM):
More than 15 kHz/-9 dB
Less than 30 kHz/-60 dB
Spurious and image rejection ratio:
50, 144 MHz: Less than -60 dB
440 MHz: Less than -50 dB
1200 MHz: Less than -50 dB
(Except half IF, 2nd image, 50 MHz band IF and WFM)
Audio output power (at 13.5 V DC): 250 mW typical at 10% distortion w/ 8 ohm load (at 13.5 V DC)

Supplied Accessories
Battery pack
Wall charger
Antenna
Belt clip

Do you think you could make your post just a little harder to read???
Good lord buddy - learn a bit about formatting. I was interested until
I almost went blind trying to read this crap. And what's with the
'compare new' ? It AIN'T new, so why would I want to compare
new?

Greetings,

I have a K2 with the internal antenna tuner, SSB, NB, 160 meter, and
internal battery for sale. I've built two of these and both have
worked perfectly first time.

I'd be happy to provide pictures and even a sked on the air with it if
interested.

I'm asking $900 plus shipping.

Greetings!

I have a mint KWM2A with the power supply for sale.

I'm the third owner of this radio and the first owner was a service
rep that worked on Collins gear so all of the mods have been installed
and well documented in the manual. It has no scratches, dents,
cracks, or mods other than authorized factory type mods. It works
fine on all bands and has crystals for the WARC bands, although I
havne't ventured out on those bands with it.

I have the matching power supply and case, and again, in perfect
shape.

And....I even have the original BOX that the KWM2A came in.

I can supply pictures if interested.

I'm asking $1,300 for the radio and power supply plus shipping from
Chandler, AZ

Yep, the complete manual is there. I'll have to check but I'm pretty
sure it's the original and it has the notations on the mods that were
made on it.

My company is liquidating our RF Hardware assets on eBay including the
following RF components:

 - Narda High Power 30dB Attenuator DC-6000 MHz
 - SP6T RF Switch DC-18GHz 12VDC NO TTL Control
 - RF Circulator Set
 - Broadband RF Amplifier, Inline Coupling
 - 1 to 2 GHz RF Directional Coupler
 - RF Fixed Attenuator Set
 - DC to 26.5 GHz RF Power Divider
 - 5 to 3000 MHz Four-Port Junction Pad

Initial auction prices were set at pennys on the dollar.

This URL should take you to the eBay list:

Our Radio Club is attempting to clear out an inventory of NOS tubes.
These will be available at Dayton Hamvention. We will be in the
Flea Market spaces 734 and 735. We intend to be there all day Fri.
and Sat. The list of our inventory is attached.

I have an Alliance HD73 Rotor for sale. Control unit is in excellent shape
as well as motor unit. A bolt broke in one of the half shells that holds
the mast (not one of the bolts that goes into the motor unit.) Someone with
a drill press could drill it out.

Any reasonable offer will be accepted. Prefer local pick up in North New
Jersey or New York since the unit is heavy.

Roland Stiner, NK2U

I have a few Analog GE Panel Meters, Type RFW-91, Cat No Q 0123. They
use an external thermocouple. Any idea where I can get them? Or can
anyone save me the time of making a bridge to determine internal
resistance?

Thank You

This device will iron out those fading SW signals.
Brookline Technologies VS301E Volume Stabilizer featuring adjustable stabilization from 10:1 to 1:1, bypass switch, 3 colored LEDs. $50 plus shipping via USPS Priority Mail. I'm located in Plano, Texas.

This item may be viewed at the following web site...scroll about 2/3 down the page for an excellent photo. Of course you may want to read the review also that compares Brookline Technologies to Sima.

http://members.fortunecity.com/swradios/svs1.html

Much credit to Dave N9EWO for the review and photo

If interested or questions email cool1986@earthlink.net

Police State II The Takeover

Alex Jones exposes the problem-reaction-solution paradigm being used
to terrorize the American people into accepting highly controlled and
oppressive society.

From children in public schools being trained to turn in their peers
and parents, to the national guard and army patrolling our country's
highways, the takeover reveals the most threatening developments of
police state control in our age.

Hi all,

I have several RS HTX 202s that I have been collecting over
the years and now want to get rid of a few.

Each is perfect, not a scratch and operationally a 10.
Comes with original box, manual, decent battery,
charger etc. Pretty much one of the last real FM
HTs that were made.

$75 includes shipping, I prefer USPS Money Order.

Thanks for reading the post and let me know if anyone wants
pics.

I'm relatively new to the world of radio, and I've been trying to find
an answer to a question in regards to transmitters. I haven't had too
much luck with the FCC's website or any other radio FAQ sites, so I
thought I might post a question here in hopes that someone might be
able to point me in the right direction.

What's the strongest power output a transmitter can have without being
licensed or considered "illegal"? I'm sure the answer is complicated,
and dependant on variables like frequency, modulation type, antenna
location, etc. I'm interested in an airborne antenna, so that might
throw an additional monkey-wrench in the mix...

Thanks in advance for fielding a novice's question!

Dave

Dave,

    There are two answers if things are the same as several years ago.

    In general:
    What you are looking for is called "Part 15" in the US. Unfortunately, the limit is not on the transmitter power, but the amount of radiated energy. Most specificaly it is a limit on field strength some distance from the device.

    Part 15 was originally set up to help prevent, or limit, unintentional interference caused by one device and unintentionally emitted and picked up by another. However, then people realized that they could intentionally generate signals at these levels and use them.

    You ill see references to "A" and "B" limits, B being the more difficult to meet.

    I could be wrong, but I believe ther are two exceptions to this. One is a frequency somewhere around 100 or 200 KHz where, I believe there is a power limit, but there may also be an antenna length limit. The other may be the 88-108 FM broadcast band (US), but I don't recall any more and may be mistaken.

--
[please clip quoted postings down to the relevant parts, thank you]
Steve Noskowics...Pardon my paranoia, but my email has no U's in it:

Dear OM.
Opt into a Heathkit list to get or give info on Heathkits, or to sell or,
buy Heathkits. The list is coutesy of heathkits.com www.heathkits.com To
opt in, simply send an e-mail to majordomo@heathkits.com in the main body
of the e-mail type ... subscribe heathkits .... You then will be able to
post to the list with a simple e-mail. This will get you in immeadiate
touch with a bunch Heathkit NUTS.
thanks,
Gary K�IMJ Heathkits.com

I have a very good selection of tubes for CB/Ham/Audio/Antique use. These include most sweep tubes, ceramic transmitting tubes.
I do not have a web site, so suggest that you Email me with the tube number and quanity that you might need...I will check my inventory and get a reply back to you regarding availibiltiy and cost.

Thank you for your interest

I have the software and cable, but would like to duplicate another
cable. The serial port connector on the cable has a small circuit
board connected to all the 11 pins. Does anyone have a schematic of
this board? Alternately, does anyone have a cable available for sale?
Paul

To whom it shall concern:

It has been years since I have played on packet radio, so I recently dug out

my olde KAM, which by the way has firmware version 2.84!?! I am in desperate need for some upgrades for the unit!!! Any advice on where to get a firmware upgrade for a version greater than 2.84 would be very appreciated!

I am also looking for a KAM Enhancement Board!

I spoke with a friend of mine whom told me the firmware in the KAM is not public domain, therefore my understanding is that the only way I can ask someone to email me a copy of the firmware is if it a version that you paid for and are no longer using due to your unit being broken or a version you are no longer using that you paid for, since you have upgraded to a later verion of the firmware. I am looking for anything greater than 2.84, but 8.2E would be the most optimal to receive. I do own an EPROM programmer so an image is fine. Obviously if you are sending me the firmware via email, a notice indicative of your transfer of the license to me would have to be included with the image I imagine. I am trying to locate a copy of the firmware legally, though I suppose there is little I can do if someone just sends it.

The big problem is that Kantronics doesnt seem to want to help people with olde KAMs anymore, so I am left to my own devices to find what or how I can upgrade the unit!

Here are some of my questions:

What is the compatible version E2PROM (EEPROM) to use instead of a 27C512 EPROM?

What EEPROM/E2PROM will work to replace the 27C512 in the KAM?

Is 8.2E the latest firmware the KAM that I could have if an Enhancement Board is installed in the KAM?

What is the latest version of the firmware for the KAM that works if you do NOT have an Enhancement Board?

I understand there was a memory upgrade, can anyone tell me about that upgrade?

I also understand there was a clock upgrade, can anyone tell me about that upgrade?

Is there a place I can get a PDF or digital copy of the KAM manual, KAM Enhancement Board manual, or DVR 2-2 manual?

What can I do to upgrade or enhance my DVR 2-2 to make it work better?

Does anyone know what I must do to align or setup the DVR 2-2 if I want to add a second channel/crystal to it?

Where do I get crystals and of what type for the DVR 2-2?

Please carbon copy my email address on all replies if you can.

Thanks in advance,

Stuart

Hello all,

I've written Cushcraft to get a base section(with the trans-match box) for an R5
but was told they dont make parts anymore. So...

I'm looking for the base section(match box too) for an R5.

Write me here or N2STE@juno.com

Thanks

TJ, NN2J

Hello John,

Thanks very much! The Assembly and Installation sheets list the base section as simply as Part#: AA, Base Section, and the matching box as MN-1, Impedance Matching Assembly. I can paypal you if they have the parts...

TJ, NN2J
Mesa, AZ

TUBES AVAILABLE

I have a very good selection of tubes for HAM/CB/Audio/Antique/Transmitting
100,000+ NOS USA tubes in stock

I do not have a web site nor a formal price list ~~ Suggest that you Email
me with the tubes that you need, along with the quantity of each tube, and I
will check my current inventory and get back to you with availability and a
quote.

This is my only business, it is not a hobby, so I strive to supply quality
tubes at a very competitive price.

I have very few of the 'high end' audio tubes, but do have a good selection
of all others.

Specialize in sweep, transmitting and ceramic tubes.

Please Email you needs to:
thetubeman@earthlink.net

Thank you for your consideration

  Our Radio Club is attempting to clear out an inventory of NOS tubes.
  These will be available at Dayton Hamvention. We will be in the
  Flea Market spaces 734 and 735. We intend to be there all day Fri.
  and Sat. The list of our inventory is attached.

Nice clean Sony ICF-2010 portable shortwave receiver for trade. I am
looking into trading this radio for a general coverage ham receiver.
E-mail me at: KB1JQR@worldpath.net if you are interested. Thanks.

Some answers to questions you might have...

1- The battery is original and has very little use. I purchased the H/T
more for listening than transmitting. It is a BP-173, 9.6v and 650mAh.

2- The radio has never failed and I guarentee it to NOT be DOA.

3- The radio has been babied, it has never been dropped and never in a smoking environment.

4- The radio serial # is 14684. It is in as new condition and, with the exception of clear packing tape over the display lens, there are no marks/dents or scratches on the radio.

The radio will be shipped in the original box with the original manual, quick reference card, wall charger, stock duck antenna and wrist strap.

5- I am selling the radio to help defray the cost of a Kenwood TH-D7A(G) I just purchased.

6- I don't have access to a digital camera, I cannot provide photo's.

Although I haven't sold many things, I have a good eBay rating (see NPDXO) .

$190.00 + shipping from 11786

John, KB2COP

I have for sale a very nice condition R-390A.
It is from the Motorola 14-PH-56 contract and has original
meters and covers. It is in nice working and cosmetic condition.
Asking $575.00 plus shipping. Continental US only.

Thanks,
Michael

Hi All..

I've got 75 MHz transmitters, VHF linear power amps/modulators, mounting racks, ATV, etc items for sale.

Please visit http://members.rogers.com/wiecek6010/sale.htm to view the items I'm selling.
All items are located just west of Toronto, Ontario.

Thanks to all

73's Alex VE3GOP

I am looking for the following ICOM hand-microphones:

IC-HM56A
IC-HM23
IC-HM36

Please do not post your reply, email me at : nj3t@floodcity.net
Include price and condition.
Thanks,
Jim
NJ3T

Steve:

This sounds like TM-631A I just bought here 2 weeks back,
for ONLY $210 SHIPPED.&#65533; It arrived yesterday afternoon,
in its original box with owners manual and full DTMF mic.
But it also included the TM-631A Shop manual.&#65533; Sounds like
my deal was way better than yours at $350 + Ship.

I have for sale a very nice condition R-390A.
It is from the Motorola 14-PH-56 contract and has original
meters and covers. It is in nice working and cosmetic condition.
Asking $550.00 plus shipping. Continental US only.

Thanks,
Michael

I have one 16ch HT-1000 radio in excellent condition electronic and cosmeticly.
The radio is the "R" model 403-470mhz split. It will do the Ham and Commercial band at the same time.
Comes with a very good battey, belt clip, antenna and charger.
I will do free programming if needed, just send your info once purchased.

Price: $325 obo and that includes shipping in the U.S. only.
Payment via Money Order or PayPal

I have a 1U rackmount computer (333 Mhz AMD, 168 pin dimms with 32 mb on
board,
built in video, serial, parrellel, 10/100 network, support for disk on
chip boot, dual IDE and floppy controllers.)  four fans on case with dust
filter, power supply.
```

one PCI/ISA slot to add on other cards. You add your own drives due to liabilities of used hard drive data.
This would be perfect to put your repeater onto IRLP or any other computer add on for a repeater.

All offers considered.

I have a S & S Engineering ARK 40 QRP transceiver in "like new"
condition.
Rugged unit that got excellent review in QST. Comes with optional
internal Curtis keyer. New cost was $270 plus $40 for keyer.
Will part for $125 plus shipping. Also have a 12 volt supply for the
ARK if you need one for $10. John KM4TI
Some features:
Superhet
synthesized to 100hz
rit +/- 500HZ
iiiP > +10 dbm
Sensitivity 0.3 uv
CW crystal filter
CW audio filter

immediate recovery AGS
tunable from mw range to about 7 watts
full QSK
sinewave sidetone
12 vdc posered
very rugged cabinet
2 3/4" X 5 1/2" X 8"

I was driving up SR167 the other day and Liscense No. WR7QRT had no
right rear tail light on his green MERC. BENZ. Just thought I'd let
him know since almost no one nowadays lets one know this little fact.
It used to be that gas station attendants would let one know these
things but what with almost every station being self serve there is no
one left to pick up the slack these days. I was hoping that you folks
could let Mr. WR7QRT know about his tail light problem.

Thank you,

Terry(TL) L. Lull
Friend of Mr. Hicks

I just purchased a IC746 Pro. Can anyone offer advice on purchasing
either the Heil goldline mic or the Icom SM 20 mic. Both are priced
about the same. Thanks, K9OAT

I have one 16ch HT-1000 radio in excellent condition electronic and
cosmeticly. The radio is the "R" model 403-470mhz split. It will do the Ham
and Commercial band at the same time.
Comes with a very good battey, belt clip, antenna and rapid charger.

I will do free programming if needed, just send your info once purchased.

Price: $285 and that includes shipping in the U.S. only.
Payment via Money Order or PayPal

But, what is the chance that a non-ham would check the
rec,ham-radio.swap newsgroup? Hint: there is no WR7QRT in the FCC
database.

By the way, I can't find SR 167 on my maps. In what part of Florida
did you see this car?

Look at how it's coming this is the first day
http://community.webshots.com/photo/50669411/69514174MuHlXy

As a member of the Pennsylvania National Fire Museum.
http://members.aol.com/JCW37/FRmuseum.html

I am setting up a communication display. I want you folks to look in
your junk draws. And send me some old non functional control heads,
or dash type radios. I have a corner assigned to me. I have costume
built shelves and will mount all type and brands of radio heads. I
will have some stored old audio coming out of these speakers.

Please take it as a gift to the museum and cover the postage. I would
like to see all types and brands in this display.

Richard E. Lenker

A clean export model Titan (factory 10m) using a pair of 3CX800A7's on
160-10m. This amp is capable of QSK and uses a vacuum relay.

Power supply uses a full wave bridge for higher plate voltage regulation
as compared to something like the similiar amp by Command Technologies.
The hypersil power transformer weighs 46 lbs.

The tubes are a little over one year old and easily develop 1.5 KW +
output. An original manual is included. I understand that some might be
concerned about buying a used amp with expensive finals so I've priced
my amp with or without the tubes.

The power supply cabinet has a few minor scuffs.

I'll sell the amp with tubes for $1650, without tubes for $1250. Buyer
pays shipping (I'll ship in three cartons - 1) RF deck, 2) power supply,
3) power transformer

photo at http://www.home.earthlink.net/~k8mn/images/Titan_2.jpg

What looks like discolorations on the amp's panel are a camera trick.
They are not evident when viewed in the flesh.

Please:

If you can help me by providing photo copies of the manuals for the HG-10B and HW-16. I'm planning on working on these rigs so they will be completely functional. They work on 80 and 40 but not on 15 Meters.
In addition I wish to tune them to factory specs. My 11 year old twins are working on there code and theory and should be licensed in about 3 months. I would like to have the rig ready for them to begin having fun on the bands.

I will pay for your services, photo copies, handling and shipping. I do not need the original manuals unless they are available. Photo copies will be just fine for trouble shooting and aligning etc.

TNX for the read,

Don W6PJJ

Thanks for the information, I have been to many Websites and still no
detailed build instructions or diagrams....

I believe I have most of the parts, just need information on how to make the
coils and how to connect it all together..

Again,   Thanks..

Hello,

I'm new to this ham radio, and need some help from this group on
buying the radio, getting license and tips on using the most in ham.
Currently, I'm in Augusta, GA. I need someone from the same city to
talk to.

Is Anybody Out There?

thanks in advance.

To Whom It May Concern:

I am a post-secondary student who is working on an assignment that involves displaying the time on a cathode ray tube display. For some time now, I have been desperately trying to find hardware for cathode ray tubes- panel bezels, and the shields. Unlike CRT tubes commonly used in classic oscilloscopes, which can be purchased from many tube and antique radio supply sources, the hardware for the tubes is EXTREMELY difficult to find. I am not talking about hardware peculiar to manufactured equipment- there are many businesses who sell tube shields, filters, and bezels for well-known classic test and measurement equipment. Unfortunately, most of those items were made only in a limited range of types, or existed only in special configurations. What I am looking for are "classic" generic parts- panel bezels with the appropriate coloured filter and integral cushioning, in sizes ranging from 1" to 5" inches, but either 2 or 3 inch sizes would be best. In the case of shields, 1" to 5" inch sizes are suitable, but again, 2 or 3 inch sizes would be best. Normally, such parts were made for round CRT's, but those for square or rectangular tubes would also be suitable. Used parts are perfectly fine for my application, but the plastic filters for bezels should be reasonably free from scratches. I am also interested in NOS parts as well. Another

excellent source
would be old equipment
for scrapping, if it has suitable parts and a
reasonable cost.

I am also looking for CRT's that are
electrostatically
deflected\focused, with
the following part numbers (note - I only need
a few in this series
); 1CP1,

1CP31,1DP1,1DP11,1EP1,1EP11,2BP11,3AQP1,3AQP11,3ASP1,3ASP11,3BEP1,3BGP1,3BGP11,

3BMP1,3BMP11,3JP11,3KP16,3RP1,3RP11,3SP1,3SP11,3XP1,3XP11,3YP1,3YP11,4MP1,
and
4MP11. Some of these tubes are available from
tube dealers, but the
prices are
quite high. In the case of tubes, I would prefer
NOB\NOS, but used
tubes are
just fine if in good condition.

I am willing to pay any reasonable price for
hardware and tubes. Thank
you very
much in advance.

Sincerely,
Peter Magi

Hello to all,
I am looking for the front rubber feet for an old NCX-3 or other rig. Also need the four small knobs for the same transceiver. I believe that all these parts were used by National on several of their transceivers. (200, NCX-5 etc.)
Thanks for the responses on my prior quests, and once again thanks for any response to this one.

I do have for sale a fair number of tubes coming from a radio shop who
closed lately because of sickness...this fellow was servicing mainly radios
and linears.....there are about 375 tubes all in their box....the asked

price is $175.00 plus shipping...it comes to about. 45 cents a tube.I think this is a great deal for 375 tubes in their boxes...feel free to contact me for any information..

I have the following radio cabinets for sale in SE Pa..
1-Motorola Compa-station cabinet with 15 amp power supply, Maxtrac/Radius mounting bracket and Maxtrac power cable. Perfect for remote operations or repeaters.

1-GE cabinet from the old Master series base stations, this cabinet is completely empty.

I'll take $125 for both cabinets, will need to make arrangements for pickup.
If you have something for trade let me know.

please email direct if interested

I have for sale a very nice condition R-390A.
It is from the Motorola 14-PH-56 contract and has original meters and
covers. It is in very nice working and cosmetic condition. Pictures
available
upon request.
Asking $600.00 plus shipping. Continental US only.

Thanks,
Michael

Looking for manual for Wavetek 2407 Signal Generator.

Can anyone help?

Thanks,

Rick

These are the cables that go between the radio's and the RICK unit. They are
brand new, I also have two of the mic plugs used for to close the squelch
when radio is being used as a repeater.
First $20.00 takes them.

I have the following radio cabinets for sale in SE Pa..
1-Motorola Compa-station cabinet with 15 amp power supply, Maxtrac/Radius mounting bracket and Maxtrac power cable. Perfect for remote operations or repeaters.

1-GE cabinet from the old Master series base stations, this cabinet is completely empty.

I'll take $125 for both cabinets, will need to make arrangements for pickup.

please email direct if interested

This device will iron out those fading SW signals.
Brookline Technologies VS301 Volume Stabilizer featuring adjustable
stabilization from 10:1 to 1:1, bypass switch, 3 colored LEDs. $50 plus
shipping via USPS Priority Mail. I'm located in Plano, Texas.

This item may be viewed at the following web site...scroll about 2/3 down
the page for an excellent photo. Of course you may want to read the review
also that compares Brookline Technologies to Sima.

http://members.fortunecity.com/swradios/svs1.html

Much credit to Dave N9EWO for the review and photo

Yaesu FT-767GX (CAT System) 100 watt all solid-state HF radio with
dual VFOs, memories, built-in automatic antenna tuner, and keyer.
Comes with SP-767P external speaker module w/phone patch, installed 10
watt 2-meter module, MD-1 desk mic, hand mic, Bencher chrome iambic
key, heavy-duty straight key. Has seen very limited use. All very
good to excellent condition. Non-smoking household located just NW of
Catskill Mountains (Oneonta, NY). $650 plus shipping costs will take
everything.

I have an Icom IC-W32A for sale. With the exception of shipping tape placed over the display lens (I do this to all of my H/T's to protect the lens, and it is easily removable) the radio is in as new condition. It will be shipped in the original box with manual, quick programming card, stock duck antenna, battery and charger. In addition, I will provide a registered original RT Systems software disk.

Asking $200.00 O.B.O. + shipping from 11786

Please e-mail off list with questions.

Thank you,
John, KB2COP

I have a very nice set of Drake twins, which I have replaced (with the

ft-817 also in the picture). 10 hours on fresh tubes. A foolish family member discarded the original packaging in which they were kept until recently, but the rest is there, including the irreplaceable injector cable (to permit the transmitter to be tuned by the receiver).

I want to operate HF mobile. Anybody want to trade me a complete screwdriver antenna? It's a nice rig, in beautiful shape, but I don't expect an autotuner for it. I haven't seen one yet that will tune with QRP anyway. I'd prefer the k7ju or any other that also can do 160 meters. As I haven't built my HFpack antenna yet, I'm also highly susceptible to something along the lines of an outbacker joey.

Looking for a second or backup HF rig such as Kenwood TS-450, Icom 751, Icom
IC-718 or ?. Let me know condition and shipped price to 89503. Would prefer
to pay with PayPal or COD.

Thanks, John - WB7ACV

I am looking for the plans to build a screwdriver type antenna..

I am in an apartment and don't have access to the roof, therefore something relatively small, tunable, and not hard to look at it required...

I have many of the parts required to build one of these, I just do not have the detailed construction information./

ANy assistance would be appreciated.

All prices are in US Funds, for Price comparisons
from up to 20 distributors on these parts visit:
http://www.findchips.com

QTY.	Part #	Unit Price	Description
OPTO.			
~400	Green LED	$0.10 ea.	5mm Diameter,
~500	Green LED	$0.10 ea.	Rectangular 5mm x 2mm face/lens
10,200	Red LED	$0.10 ea.	5mm Diameter, Sharp P/N: GL5PR4 $18 per bag of 250 ($0.07 each) and $100 per box of 2000 ($0.05 each)
106	MAN-6440	$0.95 ea.	Dual Digit, Green 7 Segment display, 0.56" tall character, Common Cathode $15 per tube of 20 ($0.75 each)
85	FND-6740	$0.95 ea.	Dual Digit, Red 7 Segment display, 0.56" tall character, Common Cathode $15 per tube of 20 ($0.75 each)
137	TIL-311	$7.00 ea.	The TI TIL311 is a Hexadecimal Dot Matrix Display with integral TTL driver

			electronics to accept, store & display 4-bit binary data, Epoxy package
8	TIL-311A	$7.00 ea.	The TI TIL311A is a Hexadecimal Dot Matrix Display with integral TTL driver circuit to accept, store & display 4-bit binary data, Plastic package

For a copy of the TIL311 Datasheet see:
http://www-s.ti.com/sc/ds/til311.pdf and it is mirrored at
http://umwnt1.physics.lsa.umich.edu/mttc/images/til311.pdf

TTL CHIPS, DIP Package

550	7407N	$0.18 ea.	$4.00 per tube of 25 ($0.16 each) Hex Non-Inverted Buffer with Open-Collector outputs
605	74ALS20AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Dual 4-Input Positive NAND Gates
240	74ALS27AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Triple 3-Input Positive NOR Gates
1350	74LS74AN	$0.25 ea.	$5.00 per tube of 25 ($0.20 each) Dual D-Type Positive Edge-triggered Flip-Flops with Preset and Clear.
100	74ALS74AN	$0.25 ea.	$5.00 per tube of 25 ($0.20 each) Dual D-Type Positive Edge-triggered Flip-Flops with Preset and Clear.

RESISTORS

55,000	100 Ohm, 5%, 1/4 Watt Carbon film resistor, $2 per 100,	$20 per box of 5000 or $150 for 50,000 pieces.
4,000	220 Ohm, 5%, 1/4 Watt Carbon film resistor, $2 per 100,	$16 per box of 4000 or
4,000	680 Ohm, 5%, 1/4 Watt Carbon film resistor, $2 per 100,	$16 per box of 4000 or

My e-mail: centralub@yahoo.com

Minimum purchase $5.

No shipping is included in the above prices. To quote you a total including shipping, I require your full ZIP code or postal code in addition to a list of what you are interested in. Please specify the country for international orders outside of North America.

The only part that I will ship for $3 to anywhere in the US
and Canada are the 100 packs of resistors. So a pack of 100
resistors is $5 inclusive shipping.

All electronic parts are new. All semi-conductors are stored
in anti-static tubes/bags or on anti-static foam if you purchase
less than a tube/bag. Below is the complete listing of all parts.

Offers on the lot are welcome. Keep in mind that I am looking
for a price below wholesale, but more than the commercial buyers
of surplus electronic parts are offering.

I have for sale a very nice condition R-390A complete with original meters
and covers. This receiver is in great condition both operationally and
cosmetically. I do not want to ship this receiver and am looking for a
buyer in the DFW area of Texas. $600.00

Thanks,
Michael

HAVE A ICOM IC-2100 WITH FULL FUNCTION MIC.. WOULD LIKE TO FIND OR
BUILD A "BREAKOUT"/SWITCH BOX SO I CAN TAP IN RACE HELMET
MICROPHONE/HEADSETS.
would like this "breakout" box to have switchable inputs ie: icom
radio,cb radio, internal intercom.
any thoughts ??
please e-mail me directly   locopony@qwest.net

Check out this place for Auctions and Fixed price Sales (no
listing fee).

I personally liked the amazing : "AUTO-RELIST UNTIL SOLD" option.

click here:

Did they even make modems for the s100 bus? I think I still have
an old 300 baud modem with an accoustic coupler (you know the kind
you put the phone handset into). Assuming I can find it, I'd let it go for
the cost of mailing it.

This device will iron out those fading SW signals.
Brookline Technologies VS301 Volume Stabilizer featuring adjustable stabilization from 10:1 to 1:1, bypass switch, 3 colored LEDs. $50 plus shipping via USPS Priority Mail.

This item may be viewed at the following web site...scroll about 2/3 down the page for an excellent photo. Of course you may want to read the review also that compares Brookline Technologies to Sima.

http://members.fortunecity.com/swradios/svs1.html

Much credit to Dave N9EWO for the review and photo

If interested or questions email cool1986@earthlink.net

Hi every body,thanks for reading my post.....I am writing this add in case
one of you would have a HF transceiver that I could buy for an affordable
price...not that I want to sound cheap,my work situation is not too good at
the moment....so I can't afford an expensive rig..,if you have one you would
agree to sell for an affordable price...please let me know.....Thanks in
advance for your attention.....Rick

Thanks for the link. I don't know whether I can buy it from US (right
now, I'm in US) while going back to my country, Bangladesh. I don't

have any license right now. Is it legal or something? Like buying the
HAM radio before getting the license?

In the US, it is perfectly legal to buy the radio whether or not you have a license. You may listen to it all you want but you cannot transmit until you are licensed. Your home country may have different rules, I have no way of knowing.

Hello everyone....I am selling a balance of tubes from a radio shop who closed a few months ago because of the owner sickness...there are about 400 tubes all in their boxes.....they are mainly radio tubes (said he had barely nothing to do with TV.) about 85 to 90% of them are NOS....according to the

prices of the tubes these days...I think that .60 - .70 cents each would be
a killer deal....so I'll ask $275.00 plus shipping for the whole
lot...(picture of the whole lot available..let me know)...for any
question..feel free to contact me.....thanks....

Thanks Flint!

Well, now I've to talk to my country's regulator. Can I ask you
something like where to buy cheap radios? and what are the good
brands, please?

Thanks in advance.

Good brands:
Kenwood
Icom
Yaesu

Get a catalog from one of the outfits like AES to compare features on
radios.

Places to buy (these have web sites)
AES

HRO
COMDAC

There are other places too but I'm not so familiar with them.

Looking for either of these unit. In excellent working condition for a resonable price. Would like to move into an inexpensive tabl top shortwav radio....but on a bugdet. Would love to buy from someone that uses PAYPAL.

If you have one of these radios please e-mail me, and maybe we can come up with a good deal for both of us....

Thanks

Thanks Flint.

Now, I've got some point where I can start with. In the meantime, can
you please enlighten me with some kind of packet radio communication?
I heard that we can connect pcs with radio. So, people should be able
to send and recieve e-mail through radio. So, where do we get the
internet gateways for radio to do such mailing? Is is available in
Asia?

Thanks in advance.

Packet radio is specific method of sending messages over the airwaves where
the radio is controlled by the computer. I haven't run much packet and have
never connected to the internet via packet. So I can't be much help here.

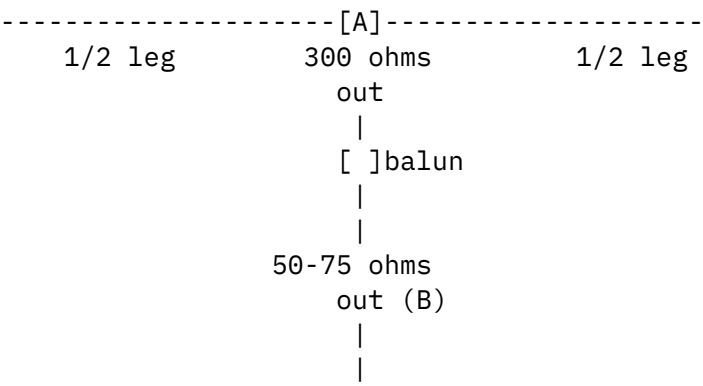
"BALUNs" (a contraction of BALenced/UNbalaneced) are transformers that transform the antenna impedance from 300/450 ohms to approx 50-75 ohms feedline impedance for connection to a receiver.

Normally used to connect a dipole with a normal feedpoint impedance of 300 ohms(A):



... to 50-75 ohm coax (B) which is a more convienient(and better shielded) way to run a transmission line from the antenna to the receiver. You COULD run TV(or twin-lead) line which has a 300 ohm impedance from the antenna feedpoint all the way to the receiver, if the receiver has a 300 ohm feedpoint(connection in back) and skip the balun, but twinlead, which is unshielded, is more susceptible to external noise and weather. Coaxial cable(or coax) is shielded,

stands up better to the elements and doenst have to be kept away from other metal while running to the antenna.

Does a balun HAVE to be used, only depends on the receiver. If it has a 300 ohm(or twin lead connection) (two screw connection) then no, you dont need one. If it has a PL-259 coax connector (single 1/2" wide screw-on terminal with a hole in the center), then yes you will need a balun.

Hope this helps,

TJ, N2STE

Anyone know what batteries or model numbers this charger works with?

If you could CC: directly to shortsheep@worldnet.att.net

that would be gREAT!

Zenith Laptop. Z-Star 433VL.   Completely clean hard drive. **There is no operating system on this computer. No windows, no DOS, no nothing!** Only has a 3.5 drive (no CD ROM) Works OK with a stripped down version of Win 95 but would probably work better with Win 3.x. Has a PCMIA card slot. Battery was replaced about 5 years ago but seems to have problems holding a charge. Unit comes with the power cord. 200 MB hard drive, 8 MB RAM, 33 Mhz.
Asking: $100

Amen! Hell will freeze over before I buy or sell ANYTHING out of
e-bay. Simply is not worth the risks or hassles in either direction.
Fortunately I live near Philly and have the luxury to be able to buy
and sell eyeball-to-eyeball based on the huge NE corridor population
density. 'Tis the only way.

I bought this Scout and accessories direct from Ten-Tec and never used
any of it. The transceiver was purchased reconditioned, the power
supply was purchased brand new, and the modules are acombination of
new and reconditioned.

Yours for $450, shipped anywhere in the continental US.

I want to trade for wide band recievers and a radio capable of working 6998 KHZ ....

The wide band reciever is for my brother (national guard soildier that was actived ...) I want a Broadcast band AM/FM and Shortwave radio that he can listen to for music and news (good moral booster) pocket size and rugged.

I also want a radio so that I can get into mars (I am KB9YMX) the radio needs to work on 6998(khz ?) so that my app will be approved.

I have tons of computer equipment, a ocilliscope a few mobile ANT. scanners and coax. The computers amount to several (6) cases with motherboards from 486 thru pentium III. I also have boxes of add-ons for computers ... sound cards to network cards to even a TV tuner card.... please contact me with what you got and what you would like to see if we can work something out.

I'm Mike Ratican, W9RAT.

My XYL and I own The Auction Block, a licensed retail business in NW Indiana.

We are going to be offering Oregon Scientific weather stations (full line), and Exact Set clocks, through direct sales via classifieds (QTH, QRZ, etc.), as well as for auction on our site, TheAuctionBlock. We anticipate opening this line of products by January 19.

All products are new, and will be shipped directly from the warehouse. We offer much lower prices and a superior return policy (60 days) when compared to AES, with full manuf warranty.

Compare a few of our prices with AES, page 41 of the current catalog:
WMR-968: $332.90

WM-918: $207.90
RGR-122: $52.90

For questions, or if you're interested, please email me:
w9rat@arrl.net, or webmaster@theauctionblock.tv
Thanks/73
Mike W9RAT

Hi to the list
Anyone out here got an old Heath AT-1 they might be parting out? I need the meter switch, and can also use the front panel.
Thanks ahead of time for the response
Mike

Hello fellow hams,

a friend of mine is in desperate need of a 5KW or greater FM
transmitter. He has a small solid state unit (500 watts) that can
drive it. The problem is he has no money.

Anyone wishing to donate a functioning tranmitter with or wihtout the
exciter ...please email me. It would be greatly appreciated!

I will pick the unit up and transport it.

Thanks,

Dan

I am looking for a nice set of paddles that I can use for CW on HF (as soon
as I get this Element 1 out of the way), but I don't want to pay for a nice
BY-1 brand new when I don't know how long it will last...plus I have a case
of sticker shock. I will pay $30 plus shpping. Thanks!

Ron - kc8ulu

Lets see, your 'friend' wants someone to give him a 5KW FM transmitter and
you will pick it up? What country are you in? Is he licensed to use it?
Is this for commercial radio? Has he ever thought of selling
advertisements, like every other radio station does?

If he 'has no money' shouldn't he be more concerned with food, shelter, and
rent or mortgage payments?

I am looking for the schematic for a Datapulse model 115 pulse
generator.
Willing to pay for it.

Please reply to w1lus@att.net

i was interested in buying a ham for packet radio. i wanted to find
out which ham would give me the full benifits of packet radio? What
would be the ideal model for packet radio? Im new to ham radio, any
info would be helpful. thanks

I wish to purchase at least two - SABER II Mobile radios.
Part Number H04KDF9PW7(AN) - used, or even inop.
They will be used in a military aircraft training simulator.
We need the look and feel of the SABER II - but it must be identical.
Tranmitter frequency not important - these won't be used to tranmit.
Email reply preferred.

hi i recently purchased a yaesu ft 2400 h 2 meter mobile.
i think this is a fantastic radio for rejection and sensitivity.

but i understand that this radio can be opened abit for
RX.
presently it is 140-173.995 for rx   and 144-148TX

i understand it is simple as removing the front plate
and un-joining a jumper from 1-2 and making a jumper
on 3. I can't seem to find these jumpers.

Can anyone help?

AND

is there anyway i can stop the doorbell sound everytime
the scan stops on an active channel. It is becoming very
annoying.

Can anyone help?

can you please email me with suggestions.

thanks
shyguy@cogeco.ca

Great Radio...

Modification is very easy...

Bell can be turned off...

I sugest going to the following website for a manual and all the info on the
modification...

http://www.mods.dk

Good Luck ...

I have for sale a very nice condition R-390A. Motorola manufacture,
original meters and original top and bottom covers. Very nice cosmetic
and operating condition. Local pickup in the Arlington, TX . I do not
want to ship this nice receiver. Asking $650.00.

Thanks,
Michael

I have for sale a very nice condition R-390A. Motorola manufacture,
original meters and original top and bottom covers. Very nice cosmetic
and operating condition. Local pickup in the Arlington, TX . I do not
want to ship this nice receiver. Asking $600.00.

Thanks,

Michael

I'm working on building an old S-100 system. Need S-100 CPU board or even a
complete S-100 system if you still have one around. Also still trying to
locate a modem for an S-100 system, or related peripherals if you have any.
email me directly please. Thank you.
Alan

LMR-900 cable assembly. This was used for testing and is in good
condition. The outside jacket of the cable is scuffed in places. There
is some tape residue on the connectors, but they are in good
condition. This auction includes:

Qty 1, 100 feet, Female-N to Male 7/16 DIN

LMR-900 cable assembly. This was used for testing and is in good
condition. The outside jacket of the cable is scuffed in places. There
is some tape residue on the connectors, but they are in good
condition. This auction includes:

Qty 1, 100 feet, Male-N to Male 7/16 DIN

HF6V Butternut Vertical w/160m kit. Old unit, but never been assembled.
Equivalent unit today would cost you $400.00+   I'm not asking nearly that
much. Email your offer, include estimate for shipping from South Carolina

I have the following radio cabinets for sale in SE Pa..
1-Motorola Compa-station cabinet with 15 amp power supply, Maxtrac/Radius
mounting bracket and Maxtrac power cable. Perfect for remote operations or
repeaters.

1-GE cabinet from the old Master series base stations, this cabinet is
completely empty.

I'll take $125 for both cabinets, will need to make arrangements for pickup.

please email direct if interested

I'm looking for an S-100 Kimsi Motherboard that enables a KIM-1 to be
expanded using S-100 boards. Please email me directly if you have one or
something similar. Thanks.
Alan

littlebigdog@yahoo.com

I am trying to write a research paper for a class in sociology here at the university of Oregon. I have been a ham for 15 years. I am 45 years old and I am working engineering degree with a minor in sociology.

73's my freind

1. Age?

2. What is your profession?

a. White collar

b. Blue collar

c. Retired

d. Other

e. Student

3. Sex?

a. Male

b. Female

4. Race?

a. European

b. African

c. Asian

5. How did you become interested in Amateur Radio?

a. Military

b. From a parent

c. School

d. Other

6. Why are you interested in Amateur Radio.?

7. How long have you had you call sign?

8. Are you married?

a. Divorced? Did radio play a part the divorce?

9. Is your wife a Amateur Radio operator?

10. Are your child Amateur Radio operator?

11. Has Amateur Radio affected your marriage and if so how?

12. Have you made friends as a result of Amateur Radio.

a. Friend: defined as someone you would bring home for dinner.

b. Acquaintance: define as someone you speak to but would not ask to your house.

13. How many hours a day do you spend talking on the radio?

14. How many hours a week do you spend talking on the radio?

15. How many radios do you own?

16. Do you have a radio in your car?

17. Do you carry a hand held radio?

a. Do you carry more than hand held radio at a time?

18. What is your best contact or the one you are most proud of?

19. Do you use your skills to benefit the public in any way?

20. What is the most positive use of Amateur radio you have given?

21. What kind of vehicle do you drive?

22. What is the best thing about your hobby

23. What is the worst thing about your hobby

24. What political party do you belong to?

25. Religion in radio?

You might also look for a product called the Betsi. This was a motherboard,
originally intended for the Commodore Pet, which provided for S-100
expansion. The name was changed from Petsi to Betsi due to legal pressure
from Commodore. IIRC, the KIM has the same parallel port as the Pet.

The IC706 and the FT100 are both on reasonable sale at Amateur
Radio Electronics, http://www.aesham.com . The FT100 is now out of
production so you can expect the price to go even lower as stock
diminishes.

I have a mint Alinco DJ-X2000 (US version) in as new condition with original
manual, accessories and box (original non-smoking owner). This item retails
for $499.00

I am looking for a high-end (big three) HT, dual-band with built-in TNC.
This unit must be in mint condition with original accessories and box.

Please e-mail direct with offers. Thank you.

I traced your IP in this message to:
credit-suisse-first-boston.Tokyo.cw.net
so, I suppose you are in Tokyo.....

There are thousands of Japanese ham radio operators. I would visit
electronics parts shops in your prefecture and ask them where the
local ham radio club is located. The club can help you get your ham
radio license and will help you get on the air. I am in South
Carolina USA and our club helps new hams get their licenses....
http://www.tridentarc.org/

Will look for you on the air in the future! Welcome to ham radio.

For my own interest, did you indicate that there were scratches on the radio
when you listed it?

The listing did state that there were scratches on the exterior, but I also said it does not effect the operation of the radio. And it does not. If he wanted a museum piece then this was not it, even the photos show the radio has wear and tear on it. But it does work like a champ.

I want to know is why you bothered to post this nonsense here for all of us
to read! Leave him a negative or another comment. Is this your first
negative or do you have many? Perhaps it's justified!

Hi all,

I've just read about HAM for the first time, somewhere on the packing
cover of some luggage. Got immensely curious. Pls. let me know
where/how do I start from to be a HAM !

Thanks
Ashok.

> TS-440S/AT that has scratches on the exterior case.

Thats not to descriptive
Scratches on the top cabinet shell, completely "gouged" up face panel or "both".
I seen many guys let gear tango in a box with some boatanchors for a couple hundred before putting it on Ebay.
A scratched cabinet shell is no big deal on a TS-440 but a scuffed up faceplate is.

> > What a knucklehead, the radio worked great, so what it has scratches from
> > one too many field day events.
A TS-440 can strap inside a $20 15 inch Laptop Case (Micro Center)....were you to cheap to buy one for all them field events. Are you one of them slob's who treats your radios like lug wrenches and ash trays ?
You should have used those exact words in the post.

Please the pic of this radio, item number and we will see
BTW your webpage is down

The pics in the link you posted do NOT show "the radio has wear and tear on it." In these blurry pics, the radio looks great! Upfront pics of the scratches would've probably prevented this from happening. It's probably wise to take pics of all the WORST features of something you're selling so there is no ambiguity.

It looks to me like you weren't clear enough about what you were selling and he didn't clarify or ask for scratch pics (which should've been supplied anyway). Looks like BOTH of you blew it on this transaction.

He should've returned it to you for his money back and you each should've paid shipping one way - equally dividing the shipping "loss" (shipping cost). No harm, no foul, nobody pissed off. Him keeping the rig and whining... then you whining here makes you BOTH look pretty purile, IMHO!

- Dave

      I am not saying you did anything wrong and feel your buyer overeacted, especially since you did mention scratches and if you would have taken it back. However I just started selling on Ebay and try to be very descriptive in my auctions and use a lot of pictures. I feel the six picture pack with supersize is money well spent on a lot of items. I take probably 30 digital

pictures and pick the six best and keep the rest or can take more for a prospective buyer. Here is a link to one of my completed auctions. Good luck. --- Steve

A word to the wise. I don't post feedback until the whole transaction is a done deal. I.E., both parties have received what they want and are happy. You can negotiate in the event of a problem and post equally negative feedback if the other party doesn't want to work out any perceived problems. Some here don't agree with that, but I really don't care. They are free to do it the way they want to and so will I.

LOL, thanks for all the posts. Even the critical ones, made me laugh and
helps put things in perspective. I own ALOT of radios, most of them I
bought used and didn't expect the exterior to be anything but USED.

Functionality and reliability is what counts with electronics. If I had the
time, I would have taken the two covers off and repainted them myself. But
I personally didn't think it mattered, the radio works great with or without
repainted covers. ;-)

73,
Rob N4RPD

Try hamradio.com that is ham radio outlet. They are one of the largest ham
radio dealers in the US and they have lots of books that will help you pass
your test to become a ham radio operator.

Just ask them for a good entry book and you'll be on your way. You can also
check out arrl.com. They should be able to give you local ham clubs which
can help you get started and will also be able to proctor your test.

For about $100 you can buy a brand new 2m VHF handheld radio from HRO which
would probably be a good place to start.

Best of luck.

I was ticked off because I have been a buying and selling on Ebay for 4
years now and have never had a negative feedback. If he would have asked
for his money back then I would have given it back with no hard feelings, no
negative feedback either, but he didn't ask anything.

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1943720516&ssPageName=ADM
E:B:EOAS:US:3

BTW, after he had posted the negative feedack, I sent an email asking if he
wanted his money back because he obviously was not happy. I still have not
received a reply.

I have for sale a very nice condition Drake R-4B receiver.
Works great and looks good. Pictures available by request.
Asking $225 shipped to continental USA.

Thanks,
Michael

Not everyone's perspective is the same. What are scratches to you, maybe be
the Grand Canyon to someone else.
Since you did mention scratches on the radio, pictures of the scratches
should have been shown so that the buyer could make a better informed
decision.

HOWEVER, the buyer could have emailed and discussed the problem with you
first as feedback is impossible to have removed.

Good lessons to be learned from this deal.

73,
Dan

Looking at it from the other perspective, if it was THAT
important to the buyer, he should have insisted on pictures
before bidding. No pictures, no bid.

The phrase "buyer beware" or its equivalent is probably as old as
the human race, and for good reason. I simply refuse to make an
offer an anything that is not described to my satisfaction, and
guaranteed to be as described.

Just forget it. If this is your first negative in 4 years and you're fairly
active on Ebay, then move on. That negative isn't going away no matter what
you do, but I know how it feels to be honest and get your first. Best thing
to do is make up for it by earning a boatload of positives. There's always a
few a-holes out there who want to complain about anything and everything and
do nothing to resolve the problem. They live in a world of gloom and doom
and get their "kicks" off of leaving negative feedback.

My only negative is from a guy who bought a $5 signal tracer clearly noted
as being untested and "as-is". He gave me a negative because it didn't work
and didn't bother to even E-mail me to discuss the problem! I would have
cheerfully given him a full refund including all shipping charges and
wouldn't even asked for the unit back. Some people are true jerks...

Hello, i'm looking for the ADMS-2 software for the FT-2600.

Please let me know if you have this software.

I need a manual for a pk-232mbx I have picked up.

If you have one you would like to sell please contact me at:

tel. 785-862-0914

or

ab0wr@arrl.org.

Thanks,

Tim, ab0wr

Cleaning out the closets and came upon this oldie. It works well and
seems to transmit on all the bands tested. It will have to go as-is
but has matching ps/spkr and gold D-104 microphone. I also will throw
in a Para Dynamics power meter (3 meter unit) and a Siltronics Model
80 VFO. I am asking $125.00 for the lot plus shipping.

I have a Kenwood TH-315A 220mc handheld with battery, speaker.mic, and
plug in charger. It is in fine working condition. Asking price is
$100.00 plus shipping.

Heathkit HM-102 and a Wawasee 2000 watt meter. Will sell them for 40.00 and
35.00 respectively. Buyer pays shipping. They are in good condition. They
are used so sold as is. I would trade them towards a 35 amp or something in
that range Power supply. Send responses to kc8qr@neo.rr.com.

Tnx
Pete Kc8qr

A bunch of us are selling some BoatAnchors tomorrow (1-18-03) at the
monthly ham swap at Cal Poly.
Some things that will be sold are: SX28, 75A1, more
Hallicrafters,Heathkits, Gonsets, Hammars, Nationals, etc, etc, etc.
No prices available at this time (most of these aren't mine).
Cal Poly is near the intersection of the 10 and 57 freeways. It starts
early and is pretty much finished by 10 or 11.
John, KU6X

This is a Kenwood TS-520SE ham radio transceiver. The SE model uses AC power only. Includes manual and desk microphone.
I have used this radio quite a bit, made several contacts with it. However, some caveats:

1) The 10m high band section has been retuned and recrystalled to operate in the 11-meter band. In order to use the radio on the high end of 10 meters it will have to be retuned. Therefore I will only accept bids from a licensed amateur radio operator.

2) On transmit, the built-in meter indicates a higher-than-normal plate current.

3) The microphone provided is not a standard Kenwood mic, but is wired to work with the TS-520SE and works fine.

Pictures will be provided upon request. (My digital camera -- freebie from Earthlink, you get what you pay for ;-) -- doesn't take very clear pictures, so I will have to take a Polaroid and scan it at work to provide pictures.)

Buyer to pay ACTUAL shipping costs.

Again, if you intend to bid on this radio, you MUST be a licensed amateur radio operator. Proof of license may be required in order to complete the purchase of this equipment.

I accept cash, personal check, money order or PayPal. If paying by personal check, allow time for the check to clear.

I also bought a radio from him. Needless to say it was not as advertised.
Excellent and owned by non smoker must mean...scratched to hell with dings
and dents and every knob and dial is covered in brown nicotine residue. I
emailed him and told him about it. He wanted to know what he could do to
make me happy . For starters he could have been truthfull when he described
the item . Also i think he sent it by pack mule , it took forever to get
here and the packing job sucked. I give John and his auctions two thumbs
down!!!

1 QRP+ Index Labs HF Transceiver for sale.

This radio was purchased for Xmas 1996. Serial number is #1029.
This radio has not been modified in any way and is still in MINT
condition. I paid $600 for it new and used it 3-4 times a couple of
years ago. Begining to do some shack cleaning and getting into
another hobby.

Will be shipped in original box with original operating manual and
xerox copy of manual.

Some of the features are:

SSB / CW full break in
All band 160m - 10m
General Coverage Rcvr from 1.8 mhz - 29.7 mhz
20 Memories
Split operation
Digital filters
Built in iambic Keyer
Requires 12v power supply of 1.5 amp or better

Asking $450.00 + shipping Or Best Reasonible Offer......

If you have any additional questions, please e-mail me...

Thanks for looking....   73s Evert WA5OJI

Icom IC-2AT Handi Talkie.

Purchased by my Dad (W5WJQ Silent Key) back in 1982
for $250.00.

This unit is in Excellent condition and has seen minimal amount of
use. To my knowledge it has never been worked on or been
modified in any way. It has a rubber duckie antenna with the
rubber tip missing. It comes with the standard battery pack
and 110v ac charger.

It is capable of 800 channels with Touch Tone Encoder dial pad
on front of unit. Can be switched from 1.5w High power out to
0.15w Low output. Possible 2.3w output could be obtained
if used with optional power pack purchased from Ham Radio
Vendors.

Worked well last time I used it a couple of years ago and still works
with present battery pack.

Also have instructiona manual and schematics.

Please e-mail me if you have any questions or need any additional info.

Asking $150 + shipping Or Best Reasonable Offer....

Thanks for reading.....

Hello,

Looking for a Icom W21AT HT that is good to excellent condition at a fair
price for the YL.

I am in the W21AT only, not other models.

Ideal unit will be in good to excellent cosmetic condition, may have
electronic defect -will repair. Ideally will have acessores, manual and
original box, but will consider all.

Please email to w1ujr@arrl.net

Thanks much!

73 Bruce W1UJR

$50 to $75 would be a better price range. Just a suggestion.
